

Aims

So an aim in its simplest form is a description of what a research wishes to investigate.

Aims Of History

Ben F. Meyer

Aims Of History:

The Aims of History David Thomson, 1969 *The Aims of History*, 1969 **Teaching of History** Y.K. Singh, **The Aims of Jesus** Ben F. Meyer, 2002-01-01 Based upon Meyer's conviction that a human being can only be truly known by understanding his principal aim or goal in life this work explains Jesus of Nazareth in exactly that fashion Jesus of Nazareth was a Jew of the 1st century of this era and to understand him you must have some understanding of the Judaism of that time Catholic Signs of Hope **Reflections on the Marxist Theory of History** Paul Blackledge, 2006-10-31 This volume offers a defence of the study of history against traditional empiricism and the relativism of postmodern historiography It discusses the relationship between Marx and Engels theory of history their methodology and their politics **The Heritage Crusade and the Spoils of History** David Lowenthal, 1998-05-13 Heritage has burgeoned over the past quarter of a century from a small lite preoccupation into a major popular crusade Everything from Disneyland to the Holocaust Museum from the Balkan wars to the Northern Irish Troubles from Elvis memorabilia to the Elgin Marbles bears the marks of the cult of heritage In this acclaimed book David Lowenthal explains the rise of this new obsession with the past and examines its power for both good and evil Timely and provocative brilliant and stimulating pyrotechnic everything from the Pilgrim Fathers to the Inuits from Homer's Greece to the rainforests of Brazil Roy Strong The Sunday Times entertaining and enthralling Ben Pimlott The Guardian **Postwar History Education in Japan and the Germanys** Julian Beatus Dierkes, 2010 How did East and West Germany and Japan reconstitute national identity after World War II Did all three experience parallel reactions to national trauma and reconstruction History education shaped how these nations reconceived their national identities Because the content of history education was controlled by different actors history education materials framed national identity in very different ways In Japan where the curriculum was controlled by bureaucrats bent on maintaining their purported neutrality materials focused on the empirical building blocks of history wh **Reconsidering Historical Epistemology** Matteo Vagelli, 2024-06-27 This book explores the key conceptual stakes underpinning historical epistemology The strong Anglophone interest in historical epistemology since at least the 1990s is typically attributed to its simultaneously philosophical and historical synthetic approach to the study of science Yet this account considered by critics to be an unreflective assumption has prevented historical epistemology from developing a clear understanding and definition especially regarding how precisely historical and philosophical reflections on the sciences should be combined Thus this book uniquely analyses how the problems and tensions inherent to the contemporary phase of historical epistemology can be clarified by reference to the classical French phase The archaeological method of Michel Foucault which draws on and transforms fundamental insights by Gaston Bachelard and Georges Canguilhem is used to exert an enduring influence on the field especially through the work of Ian Hacking and his philosophical cum historical analyses of styles of scientific reasoning Though this book is of great value to academic specialists and graduate students the fact it addresses questions broad in

scope ensures it is also relevant to a range of scholars in many disciplines and will provoke discussion among those interested in foundational issues in history and philosophy of science Vagelli's book provides a both unique and uniquely important window into historical epistemology and its relation to contemporary philosophy of science Unique because nowhere else can one find a single work that treats the range of topics that he covers Uniquely important because Vagelli's clear concise and comprehensive survey details key interrelationships among a range of American British and European views currently in play regarding historical epistemology and philosophy of science as well as the institutional and intellectual vectors driving their associated epistemological positions Paul Roth UC Santa Cruz USA Uneasily the history and philosophy of science have bolstered and undermined each other for all too long Would history offer nothing but potted episodes to confirm or contradict transhistorical claims about science Would philosophy dismantle uncritical historicist accounts of scientific discoveries Historical epistemology offers a more integrated path at once a history of the present and a philosophy of the past Matteo Vagelli draws together the insights of the Francophone Anglophone and Germanophone traditions to give us a sparkling lucid account of seeing our standards of scientific understanding as developing across time always asking how did we come to our standards of demonstration and argument Peter Galison Harvard University USA

An Analysis of Objectives of Teaching History Myrtle Elanore Jensen, 1931 **History As Propaganda** John Powers, 2004-10-14 By now most Westerners probably think they understand the political situation in Tibet But John Powers argues most Western scholars of Tibet evince a bias in favour of one side or the other in this continuing struggle

Religion and Community Keith Ward, 2000 Religion is an important social force both for good and evil in the modern world In the final volume of his comparative theology Keith Ward considers the main ways in which religion and society interact and the ways in which the major world religions need to adapt themselves in the modern world These religions are examined as forms of social life ranging from communities which seek to renounce the world to those which seek to embody the laws of God in society those which see religions in critical dialogue with social structures and those which see religion as a primarily individual matter The ideas of *eretz Yisrael* the *umma* of Islam the Buddhist *sangha* the Christian church and the Hindu *sampradaya* are critically analysed Ward also considers the doctrine of the church in Aquinas Calvin Schleiermacher and Tillich and develops a view of the church in a global perspective by means of both a historical and thematic approach He proposes a radical vision of the church as a person affirming world transforming society in the emerging global community of many faiths and cultures The relation of religious belief and morality and the ambiguous role of religion in society is investigated and the need for a new religious paradigm is defended expressing a global perspective without insistence on uniformity *The Aims of History* David Thomson (Historien.), 1974 Higher Education, 1948 Initial Training for History Teachers Alois Ecker, 2003-01-01 The Council of Europe's work on history teaching in secondary schools has three main thrusts curriculum development textbooks and teaching materials and teacher training which should take into account

societal developments and the cultural needs of coming generations This pilot study is the first comparative study on the structures of initial training for history teachers to be carried out in several European countries Its aim is to provide information that will raise the level of professionalism not only of history teaching but also of teacher training Publisher s description *Marxism and History* S. H. Rigby,2024-06-04 This critically acclaimed book now in its second edition is firmly established as an essential guide to this recent historiographical debate Adopted as a set book by the Open University An indispensable guide to Marxist historiography for undergradu **Studies of Left-Wing Ideas** R. G. Williams,2022-07-13 This book is a collection of essays on radical left wing ideas specifically Socialism and Socialist Humanism It outlines the basic ideas which make up left wing thought and ultimately provides a political argument that the ideas of Socialism and Socialist Humanism are crucial to building a better world **The Pursuit of History** John Tosh,1984 This study examines questions about historians and their work Why do we study history How do we construct our knowledge of the past What are the limitations of historical evidence and What different kinds of history are being written today **Building a National Literature** Peter Uwe Hohendahl,1989 Building a National Literature boldly takes issue with traditional literary criticism for its failure to explain how literature as a body is created and shaped by institutional forces Peter Uwe Hohendahl approaches literary history by focusing on the material and ideological structures that determine the canonical status of writers and works He examines important elements in the making of a national literature including the political and literary public sphere the theory and practice of literary criticism and the emergence of academic criticism as literary history Hohendahl considers such key aspects of the process in Germany as the rise of liberalism and nationalism the delineation of the borders of German literature the idea of its history the understanding of its cultural function and the notion of a canon of major and minor authors **In Defence of Modernity** Efraim Podoksik,2013-05-14 Although Oakeshott s philosophy has received considerable attention the vision which underlies it has been almost completely ignored This vision which is rooted in the intellectual debates of his epoch cements his ideas into a coherent whole and provides a compelling defence of modernity The main feature of Oakeshott s vision of modernity is seen here as radical plurality resulting from fragmentation of experience and society On the level of experience modernity denies the existence of the hierarchical medieval scheme and argues that there exist independent ways of understanding our world such as science and history which cannot be reduced to each other On the level of society modernity finds expression in liberal doctrine according to which society is an aggregate of individuals each pursuing his or her own choices For Oakeshott to be modern means not only to recognise this condition of radical plurality but also to learn to appreciate and enjoy it Oakeshott did not think that it was possible to find a comprehensive philosophical justification for modernity therefore the only way to preserve modern civilisation seemed to be an appeal to sentiment As a consequence he was a passionate defender of liberal education as the best way to underwrite the conversation of mankind **Imitation (Routledge Revivals)** Joel Weinsheimer,2014-08-01 In this book first published in

1984 Joel Weinsheimer advocates revitalizing the practice of imitating literature as a mode appropriate for literary critics as well as artists. The book is not only about imitation; it is itself an imitation, specifically of Samuel Johnson. As both the focus and mode of presentation, imitation is presented not merely as a kind of poetry that once flourished in the eighteenth century but also as a kind of criticism particularly relevant today. Applying arguments from philosophy of science, deconstruction, psychoanalysis, literary theory, semiotics, and hermeneutics, Weinsheimer shows that the three main currents of thought responsible for forcing imitation underground were empiricism, originalism, and historicism. The three central chapters of the book concentrate on their representatives: John Locke, Edward Young, and Thomas Warton. The author then applies Johnsonian arguments supported by those of Gadamer and Peirce to challenge those objections and re-establish imitation as an intellectually defensible mode of writing.
