Air Superiority M0788ae Combat Roles:

Air Superiority Operations J. R. Walker, 1989 Another excellent addition to this series Very detailed and not for the amateur Annotation copyrighted by Book News Inc Portland OR Case Studies in the Achievement of Air Superiority Air Force U. S. Air Force, Benjamin Franklin Cooling, 2005-01-01 Writing in 1978 General William W Momyer former Commander of the Tactical Air Command and a distinguished veteran fighter pilot stated that The contest for air superiority is the most important contest of all for no other operations can be sustained if this battle is lost To win it we must have the best equipment the best tactics the freedom to use them and the best pilots Certainly the wide ranging case studies examined in this book confirm this message as do more contemporary experiences from the Falklands War the Bekaa Valley and most recently the Gulf War of 1991 The historical roots of air superiority date to the First World War which marked the emergence of the fighter airplane offensive and defensive fighter doctrine and the trained fighter pilot By the end of the war the Imperial German Air Service had been decisively outfought and though occasional bitter air combat still occurred the Allied air arms were free to harass and attack German ground forces wherever and whenever they chose After the war there were defense commentators who injudiciously predicted not for the last time that the era of dogfighting was over higher aircraft speeds would make maneuvering air combat a thing of the past Instead the lesson of the importance of air superiority was rediscovered in the skies over Spain and confirmed again throughout the Second World War Having tenaciously wrested air superiority from the Luftwaffe the Allies in 1941 went on to achieve genuine air supremacy a situation acknowledged by General Dwight Eisenhower who riding through Normandy after D Day remarked to his son If I didnt have air supremacy I wouldnt be here Sadly many of these lessons were lost in the post Second World War era when technology advances supersonic design theory nuclear weapons and robot aircraft seemed to signal an end to the traditional air to air fighter even though the experience of the Korean War demonstrated that transonic jet combat was not merely possible but the new normative form of air warfare Indeed the fighter airplane underwent a dramatic transformation into a nuclear armed strike aircraft now that popular wisdom held that surface to air and air to air missiles foreshadowed the end of the era of classic air combat That prediction collapsed in the face of the Vietnam war and the experiences of the Middle East The 1970s witnessed both a revolution in fighter aircraft design spawned by the technology advances of the 1960s and 1970s and a return to basics in both design fundamentals and the training of fighter pilots Operations in the Falklands war over the Bekaa Valley and most recently during DESERT STORM confirmed not only the benefits of this revolution and rediscovery but also the enduring importance of air superiority During DESERT STORM which occurred while this book was in press the airmen of the United States Air Force established air superiority over Iraq and occupied Kuwait from the outset of the war defeating the Iraqi air force both in the air and on the ground By so doing they created the conditions essential for decisive air war Strike and support aircraft and helicopters could go about their duties without fear of molestation from enemy aircraft Iraqs

forces pinned in place were denied any respite from punishing air attack. Because of coalition air supremacy, coalition land operations could be undertaken with an assurance of speed and rapidity of pace never before seen in warfare. Bluntly stated, the Gulf war demonstrated that with air superiority General Norman Schwarzkopf could undertake his famed Hail Mary play. Lacking air superiority, Iraq paid dearly. Its III Corps became vulnerable to air attack, stuck in a traffic jam out of Kuwait City on the Highway of Death. Air superiority, like democracy itself, must be constantly secured and renewed.

Air Superiority Fighter Characteristics, 1998. This study determines the essential characteristics of an air superiority fighter. Its importance stems from the assumption that air superiority is paramount in any military operation and that fighter aircraft play a major role. Air superiority, as well as roles, functions, and missions, are defined in chapter one to develop an understanding of the operative terms and definitions used throughout the thesis. This thesis is an in-depth study of the historical characteristics of the air superiority fighter. A complete review of air superiority fighter evolution is divided into four distinct generations. The review includes example aircraft that highlight the consistent characteristics found in each generation. The thesis research and analysis chapters focus on three key areas of interest: They are 1. aircraft design, 2. avionics and weapons, and 3. training. The key areas of interest are coupled with a discussion of cost considerations during analysis. Fiscal constraints are a major factor in design and employment limitations. The thesis concludes that there are three essential characteristics of an air superiority fighter: 1. the aircraft is designed for the air-to-air role, 2. the aircraft has the first launch opportunity, and 3. the aircraft is flown by singularly trained air-to-air pilots.

Air superiority at Red Flag Joseph W. Locke, 2009 **Air Power's First Among Equals: Why Air Superiority Still Matters**, 2008

Air superiority has become non negotiable in conducting U S military operations In fact the maturation of airpower has ensured that we have not been challenged by a conventional military in a fair fight in over 50 years Air superiority is not an end in and of itself its value is directly tied to the role air superiority plays toward the overall campaign objectives History is replete with examples of successful or failed air superiority campaigns This paper details air superiority s role in both the Battle of Britain and the 1967 Six Day War s Operation MOKED Today s operations may not face a similar air superiority challenge but tomorrow that may well change We must not allow ourselves to succumb to the cult of the now Not all future conflicts will be insurgency focused Russia is producing and continues to export sophisticated modern air defense systems that place our current fourth generation fighters at significant risk China is currently purchasing advanced air defense systems which may pose significant challenges to our options in East Asia In the future we will be challenged for control of the air we must be ready to fight for what has become our domain since the Korean War The cost of developing and producing advanced stealth fighters is high the cost of losing air superiority would be incalculable for the Joint Force Commander
