Air Transport And Ec Competition Law Modern Legal Studies:

International Airline Alliances : EC Competition Law/US Antitrust Law and International Air Transport Angela Cheng-Jui Lu, 2003-01-01 This new study takes a keen look at the problems facing the international community due to conflicts arising from applications of varying competition laws by different competition authorities to international airline alliances As a result of privatisation deregulation liberalisation and globalisation international air carriers form alliances with one another in order to cope with growing competition in the international air transport market This book clearly provides an introduction to the background to and origin of airline alliances different models of alliances and the related anti competitive practices resulting from existing international airline alliances The potential anti competitive practices resulting from these cross border alliances trigger a great deal of concern from various competition authorities Thus this study goes on to provide a detailed analysis regarding the relevant EC competition law and US antitrust law and their applications to alliance activities The comparison of different applications of EC competition law and US antitrust law to international airline alliances provides leading research results first hand In the conclusion the essential elements regarding establishing a level playing field in the international air transport market are identified and the author provides possible solutions for the harmonisation of different applications of competition law to international airline alliances *Competition and Investment in Air Transport* Ruwantissa Abeyratne, 2015-12-17 This book addresses emerging legal and economic issues in competition and investment in air transport against the backdrop of the role governments and airlines should play in avoiding protectionism and encouraging innovation and creativity It evaluates current trends in air transport and the direction the industry is taking in the twenty first century There are discussions on key aspects of air transport such as safety assurance and environmental protection as they are impacted by competition The rapid evolution of aerospace transport and its effect on competition in air transport is also examined A recurring theme of the book is the influence of creative destruction and disruptive innovation on air transport This is addressed through an in depth study of the contentious areas of law relating to the abuse of dominant positions and state aid as reflected in the ongoing claim by the three largest US carriers against Gulf carriers such as Emirates Airlines Etihad and Qatar Airways The US carriers claim that Emirates and Etihad which operate air services into the United States by virtue of an open skies agreement between the US and The United Arab Emirates are using generous subsidies given to them by their governments to illegally capture the legitimate market belonging to the US carriers These issues are clarified in the book using analyses of competition law and investment law as they apply to air transport free trade agreement analogies and an open skies case study **Competition Law in Times of Crisis** Conor Talbot, 2018-12-11 This book examines the role and utility of competition law within the EU's legislative and regulatory dialogue using its response to crisis conditions as a test of its aims and abilities As such its main conclusion is that competition policy acts as a forum for debate as to the direction of the European integration project while competition law can serve as a tool for aiding in the

implementation of broader policy objectives The analysis here explores the role of the general economic context in the application of competition law the existence of identifiable baselines applicable in crisis conditions the ability and role of national competition authorities in applying competition law and the ways in which the European Commission s overarching policy goals can influence the application of competition law The decision to take an empirical approach to this research project stems from a conviction that an investigation into the real world situations faced by firms and consumers should underpin the evaluation of the applicable legal rules Over the past number of years the Commission has exerted more and more influence over the development of the regional and global airline industry and this book identifies the emergence of an apparent overarching aim on the part of the Commission to create a market with a handful of ultra competitive airlines with international reach serviced by an array of smaller feeder airlines on a regional basis The study of Irish beef processing on the other hand identifies a high level of government involvement in providing the strategic thinking behind a crisis cartel scheme and then demonstrates how the economic context exerted considerably more pressure on the government and the national court than on the competition authorities involved

The Governance of the Single European Market Kenneth A. Armstrong, Simon Bulmer, 1998 Examines the regulation and governance of the single European market Topics explored include air transport liberalization the protection of pregnant women at the workplace and the removal of technical barriers to trade European Policy Research Unit

ITF Research Reports Liberalisation of Air Transport International Transport Forum, 2019-05-03 Aviation is one of the most regulated industries in the world Much of this regulation is safety related to mitigate the inherent risks tied with air transport But aviation is also subject to economic regulation that influences which airline flies which route at which frequency capacity and price It even stipulates the nationality of its owners and decision makers Aviation has freed itself from some restrictions over the past three decades with many benefits to society Yet liberalisation has also raised issues with regard to maintaining fair competition high labour standards and mitigating aviation s growing environmental impact

The European Court of Justice and the Policy Process Susanne K. Schmidt, 2018 This book analyses the European Court of Justice s power from a political science perspective It argues that this power can be assessed through studying the policy implications of there being a supranational constitution that was drafted as an international treaty An international treaty contains a set of policy goals for future cooperation Direct effect and supremacy give constitutional status to these policy goals allowing the Court to develop the Treaty s implications for policymaking at the European and the member state levels By focusing on the four freedoms of goods services persons and capital and citizenship rights the book analyses the implications of case law for policymaking in different case studies It shows how major EU legislation for instance the Services and Citizenship Directives are significantly influenced by case law and how controversial policies such as EU citizens access to tax financed social benefits are closely linked to the Court

Regulating Utilities Colin Robinson, 2001-01-01 Every year the Institute of Economic Affairs and the London Business

School publish a volume of essays about Britain's system of utility regulation with additional discussion of regulation in other countries. The book is a must for those interested in regulation because it is an up to date review of the major issues in the field and includes the views of the sector regulators and the general competition authorities. Strategic Issues in Air Transport Ruwantissa Abeyratne, 2012-01-05. There are broadly four strategic issues in aviation: safety, security, environmental protection and sustainability in air transport. These issues will remain for a long time as key considerations in the safe, regular, efficient and economic development of air transport. Within these four broad categories come numerous subjects that require attention of the aviation industry as well as the States. In six chapters this book engages in detailed discussions on these subjects as they unravelled in events of recent years. The issue of safety is addressed first following an introduction of the regulatory regime covering the four issues. Within the area of safety, the book covers such areas as safety management systems, safety and aeromedicine, safety and meteorology, the use of airspace, unmanned aircraft systems and safety oversight audits. In the security area, subjects covered include cyber terrorism, the integrity of travel documents, full body scanners, civil unrest and aviation, the suppression of unlawful acts on board aircraft and the financing of terrorism. The chapter on the environment focuses mainly on climate change, particularly on carbon credits, market based measures, the carbon market and emissions trading schemes and their effect on air transport. Finally, the chapter on sustainability discusses in detail market access along with such issues as slot allocation, open skies, the use of alternative fuels as an economic measure and corporate foresight. The concluding chapter wraps up with a discussion on where air transport is headed. Research Handbook on General Principles in EU Law Ziegler, Katja S., Neuvonen, Päivi J., Moreno-Lax, Violeta, 2022-04-22. This Research Handbook offers a comprehensive study of existing and emerging general principles of EU law by scholars from a wide range of expertise in EU law, international law, legal theory and different areas of substantive law. It explores the theory, content, role and function of general principles in EU law to better understand general principles as a mechanism for the substantive openness of the EU legal order as well as for cross fertilization and coherence of legal orders. Their potential as a tool to manage the interaction of legal regimes and orders is a particular focal point and will make this Handbook a must read for scholars of EU Law. **Subject Guide to Books in Print**, 1996. *Labour Regulation in International Aviation Law* Yuran Shi, 2025-11-12. This book critically examines how international law can address the pressing issues of labour regulation in the airline industry, highlighting the insufficiencies of current international labour standards and air law in safeguarding workers' rights and improving working conditions. In an era of rapid growth and globalisation within the civil aviation sector, the labour landscape has become increasingly complex and hybrid, characterised by diverse business models, atypical employment arrangements and weakened union influence. This complexity coupled with gaps in international legal frameworks leaves aviation workers vulnerable to inadequate labour protection and skewed bargaining power. By delving into social and technical deficiencies, the book underscores the challenges posed by forum shopping, fragmented employment

structures and the limitations of Comprehensive Air Transport Agreements CATAs Proposing a pragmatic crawl walk run approach the book advocates for the progressive enhancement of labour regulations starting with refining CATAs and advancing towards more comprehensive and enforceable standards This seeks to harmonise decent work principles with the demands of a liberalised aviation market Offering an in depth exploration of landmark legal cases international agreements and State practices this book provides a nuanced understanding of the interplay between international law and aviation labour This book will be of interest to researchers in labour law international law and air and space law

The Economic and Social Law of the European Union Josephine Shaw,Jo Hunt,Chloe Wallace,2017-09-16 This title provides students with a clear accessible and highly engaging analysis of substantive law of the EU in the most comprehensive text of its kind as well as containing chapter summaries questions suggestions for further reading and annotated web addresses *Current Law Index* ,2007

The British Regulatory State Michael Moran,2003-08-14 For the first two thirds of the twentieth century British government was among the most stable in the advanced industrial world In the last three decades the governing arrangements have been in turmoil and the country has been a pioneer in economic reform and in public sector change In this book Michael Moran examines and explains the contrast between these two epochs What turned Britain into a laboratory of political innovation Britain became a formal democracy at the start of the twentieth century but the practice of government remained oligarchic From the 1970s this oligarchy collapsed under the pressure of economic

crisis The British regulatory state is being constructed in its place Moran challenges the prevailing view that this new state is liberal or decentralizing Instead he argues that it is a new threatening kind of interventionist state which is colonizing dominating and centralizing hitherto independent domains of civil society The book is essential reading for all those interested in British political development and in the nature and impact of regulation *The Air Transport Industry in Africa* William Kiema,2025-11-05 This book provides legal analysis of the multilateral liberalisation of the air transport industry in Africa within the framework of the African Union Agenda 2063 initiative the Single African Air Transport Market SAATM Offering a detailed examination of the regulatory framework and policy considerations that have shaped the political economy of air transport in Africa the book offers a comparative analysis with the European Union EU and the Association of Southeast Asian Nations ASEAN By highlighting the need for a tailored approach to air transport liberalisation in Africa it underscores the importance of considering the continent s unique socio political context diverse values identities circumstances and challenges arising from its vast and varied landscape The book proposes a principled approach to the implementation of the SAATM initiatives and calls on stakeholders to consider holistic implementation that favours the principle of variable geometry stakeholder engagement and alignment with Agenda 2063 It also emphasises the significance of supporting aviation policies such as safety security financing competition and environmental sustainability The Air Transport Industry in Africa will be of interest to researchers in the fields of aviation law economic law and regional integration in Africa *Index to Legal Periodicals & Books* ,2006 *Competition Law's Innovation Factor* Viktoria H S E Robertson,2020-02-20 In recent years market definition has come under attack as an analytical tool of competition law Scholars have increasingly questioned its usefulness and feasibility That criticism comes into sharper relief in dynamic innovation driven markets which do not correspond to the static markets on which the concept of the relevant market was modelled This book explores that controversy from a comparative legal perspective taking into account both EU competition and US antitrust law It examines the manifold ways in which courts and competition authorities in the EU and US have factored innovation related considerations into market delineation covering innovative product markets product differentiation future markets issues going beyond market definition proper such as innovation competition innovation markets and potential competition intellectual property rights innovative aftermarkets and multi sided platforms This book finds that going forward the role of market definition in dynamic contexts needs to focus on its function of market characterisation rather than on the assessment of market power
