The Telegraph *Air Force Magazine* , 2006-07 **The Paths Of Heaven: The Evolution Of Airpower Theory: The School Of Advanced Airpower Studies** Philip S. Meilinger, 2000 **The Influence of Airpower upon History** Robin Higham, Mark Parillo, 2013-03-01 From early zeppelins to the Luftwaffe and the Enola Gay to the unmanned aerial vehicles of today air power has long been regarded as an invaluable instrument of war However nations have employed aircraft for many other purposes as well they provide security and surveillance and they are vital to myriad diplomatic and humanitarian efforts Air power has become a means for statesmen to advance a variety of goals opening up new possibilities and problems in times of peace as well as war The Influence of Air Power upon History examines the many ways in which aviation technology has impacted policymaking since 1903 It analyzes air strategy in nations around the world and explores how a

country's presumed technological capability or lack thereof has become a crucial aspect of diplomacy. Together the essays in this insightful volume offer a greater understanding of the history of military force and diplomatic relations in the global community.

**One Hundred Years of Sea Power** George W. Baer, 1996-07-01 A navy is a state's main instrument of maritime force. What it should do, what doctrine it holds, what ships it deploys and how it fights are determined by practical political and military choices in relation to national needs. Choices are made according to the state's goals, perceived threat, maritime opportunity, technological capabilities, practical experience, and not the least the way the sea service defines itself and its way of war. This book is a history of the modern U.S. Navy. It explains how the Navy in the century after 1890 was formed and reformed in the interaction of purpose, experience, and doctrine. *Air Force Civil Engineer*, 1968

**Landpower** Association of the United States Army, 1984 *Air University Periodical Index*, 1955 **Army**, 1955 *An Air Power Bibliography* Raymond Estep, 1956 *Air University Library Index to Military Periodicals*, 1999 **Sea-Based Airpower—The Decisive Factor In Expeditionary Operations? Norway 1940, Falkland Islands 1982** Major Willard A. Buhl, 2015-11-06 This essay examines the British use of sea-based aviation in support of two modern amphibious campaigns: the British campaign in Norway in 1940 and in the Falkland Islands War in 1982. The purpose is to determine whether or not aircraft carriers and sea-based aviation were at the root of the success or failure of British efforts. In April 1940 there were no airfields in central Norway capable of supporting modern high-performance aircraft. As the Norwegian campaign unfolded and the British faced a significant land-based air threat from the Luftwaffe, they failed to appreciate the tactical and operational potential of sea-based aviation. At the same time, British naval aircraft were technically inferior in design and capability compared to their Luftwaffe land-based counterparts in 1940. Nevertheless, despite determined attacks on British naval assets at the tactical level, at the operational level the German command limited their campaign goals and did not exploit their advantage in the air to the extent possible. Their actions did, however, place great pressure on British sea-based lines of communication in central Norway, the operational pivot of the campaign. In 1982, against the Argentines, the British faced another opponent with superior land-based aviation. Although the British fully appreciated the need for air superiority, they employed a tactical scheme not unlike what had occurred in Norway. Nevertheless, the British were able to successfully contest the airspace above the Falklands and ultimately succeeded in defeating Argentine ground forces and ejecting them from the islands. *Air & Space Power Journal fall 04*, *Britain's War At Sea, 1914-1918* Greg Kennedy, 2016-04-20 In Britain, memory of the First World War remains dominated by the trench warfare of the Western Front. Yet in 1914, when the country declared war, the overwhelming expectation was that Britain's efforts would be primarily focussed on the sea. As such, this volume is a welcome corrective to what is arguably an historical neglect of the naval aspect of the Great War. As well as reassessing Britain's war at sea between 1914 and 1918, underlining the oft-neglected contribution of the blockade of the Central Powers to the ending of the war, the book also offers a case study in ideas about military planning for the next war.

Questions about how next wars are thought about planned for and conceptualised and then how reality actually influences that thinking have long been and remain key concerns for governments and military strategists The essays in this volume show what realities there are to think about and how significant or not the change from pre war to war was This is important not only for historians trying to understand events in the past but also has lessons for contemporary strategic thinkers who are responsible for planning and preparing for possible future conflict Britain s pre war naval planning provides a perfect example of just how complex and uncertain that process is Building upon and advancing recent scholarship concerning the role of the navy in the First World War this collection brings to full light the dominance of the maritime environment for Britain in that war and the lessons that has for historians and military planners

**How Strategic Airpower has Changed the World Order** Nigel David MacCartan-Ward, Anthony Wells, 2024-06-30 This work demonstrates how maritime deterrence strategy in a challenging world is critically underpinned by strategic air power at sea and on land In this book the history and utility of land and carrier based strategic airpower is brought to life by the gallant exploits and photographs of B 17 aircraft Quittin Time and of its Navigator Fred Julian in the Second World War and by the unforgiving and unswerving dedication of Sharkey Ward and his Sea Harrier team in the Falklands war The overarching message is that the strategic airpower lessons of the past eight decades underpin the urgent need for the UK government to invest more wisely in its Fleet so that the latter may work effectively in conjunction with the US Navy on the global mission to deter those that would harm us and to maintain the freedom of passage of all shipping throughout the global commons The authors show how a maritime deterrence strategy in a challenging world is critically underpinned by strategic air power at sea and on land
