Donald F. Featherstone

Airborne Forces:

Airborne E. M. Flanagan, 2003 The United States Army's experiment with airborne forces started at Fort Benning Georgia in early 1940 with a single platoon of paratroopers From this tiny seed grew the mighty American airborne legion that spearheaded America's attack against Nazi Germany in Sicily and Normandy Ultimately this branch included an airborne corps headquarters five full airborne divisions and several independent battalions and regiments On the nights of June 5 and 6 1944 the parachutes and gliders of six regiments of American airborne infantry filled the dark sky over Normandy Paratroopers and glidermen of the 101st Airborne Division Screaming Eagles were literally dropping into battle for the first time harbingers of the vast Allied D day armada Moments later they were joined by the veteran All Americans of the 82d Airborne Division who had first jumped into combat almost a year earlier in Sicily For the American airborne troopers the road to victory in Europe led through the ill conceived Arnhem campaign and on to the Bulge where the American paratroopers saved the day for the Allies The 17th Airborne Division bounced the Rhine in the last airborne operation in Europe and fought across Germany until VE Day with their band of brothers In the Pacific the Angels of the 11th Airborne Division saw hard combat in the Philippines The independent 503d Regimental Combat Team fulfilled General MacArthur's promise to return when it daringly parachuted onto the small area known as Topsy on the rocky fortress island of Corregidor Following World War II the airborne fought with distinction in Korea Vietnam and the Gulf War Along the way American paratroopers have also given yeoman service on smaller battlefields such as the Dominican Republic Grenada and Panama Written by a former paratrooper Airborne is the definitive combat history of these elite forces

Churchill's Spearhead John Greenacre, 2010-06-19 This book covers the inception growth and employment of Britain's airborne forces parachute and glider borne formations between June 1940 and March 1945 It takes a comparative approach and follows tailored lines of development Each of these lines politics and policy equipment and technology personnel and training command and control and concepts and doctrine influence each other The contents include Politics and Policy The political environment within which the major decisions were made concerning the concept of development of Britain's airborne forces Churchill's personal contribution the effect of inter service rivalry and the influence of other government departments Equipment and Technology The methods and obstacles of procuring and supplying the bespoke equipment required by airborne forces The supply of combat equipment the provision of support aircraft and the procurement of gliders Personnel and Training The effort incurred to man the new force and the effect of different approaches to recruitment and training The selection and recruitment of airborne personnel the individual training of paratroops and glider pilots and the role of collective training prior to operations Command and Control The ability of individuals in key appointments to influence the path of development and the operational and tactical employment of the force The reaction and approach of higher commanders to the new capability the selection and impact of commanders within the airborne force and the

influence of the airborne staff Concept and Doctrine Examines the manner in which Britains airborne forces were employed and performed on operations in the Mediterranean and northwest Europe How the development of the airborne concept was influenced by physical constraints equipment and personnel the ideas of higher commanders and the German example The impact of individual commanders and physical limitations Paras David Reynolds,1998 This is the story of the birth of the Regiment during World War II and its rapid development into one of the British Army s pre eminent fighting regiments

WWII Mark Magreehan,2021-05-31 The Second World War saw huge advancements in military tactics and technology occurring at an unprecedented pace One such development was the employment of forces able to deploy at short notice by parachute across the globe utilizing the opportunities created by the advancements in aeronautical technology These forces were created to deliver an in depth shock effect and few have attracted more attention than Britain s famed Parachute Regiment This formation was born from the humble beginnings of a fledgling unit drawn together from the British Army and Royal Air Force after Winston Churchill called for a new capability to be created following German airborne successes in the opening stages of the Second World War Despite being initially poorly equipped operating outdated aircraft and wearing clothing copied from captured German examples the Parachute Regiment rapidly grew into what would become two complete airborne divisions formations which played a key role in the destruction of the Axis forces The equipment needed by these men rapidly changed as the war evolved and this is clearly illustrated in the author s fine and unique collection of rare airborne items from that period several of them being the sole surviving items known to exist The chronological historical information on Britain s paratroopers role and development during the Second World War in this highly illustrated book is not only supported by a comprehensive and rare collection of items displaying the development and expansion of their equipment for each operation but also by hundreds of original pictures which embrace the entire period Additionally the book also briefly covers the Polish Parachute Brigade and the Canadian parachute formations embedded into the British order of battle This book provides a comprehensive pictorial display of Britain airborne forces which will prove to be a must have tool for military history enthusiasts airborne collectors re enactors and modelers as well as current serving soldiers linked by service to this truly special military formation **A Photographic History of Airborne Warfare, 1939-1945**

Simon Forty,Jonathan Forty,2022-01-12 On 10 May 1940 German Fallschirmj ger stormed the Dutch fort of Eben Emael south of Maastricht The brilliantly executed operation was the first signal success by airborne troops in the Second World

War and it made the military world sit up and take notice Improved parachutes and the creation of gliders that could carry troops meant that assault forces could be dropped or landed behind enemy lines This was a significant new tactic which had a dramatic impact on several of the key campaigns and it is the subject of Simon and Jonathan Forty's in depth highly illustrated history They tell the story of the development of airborne forces how they were trained and equipped and how they were landed and put into action in every theatre of the global conflict The results were mixed German airborne forces were victorious on Crete but the cost was so great that Hitler vowed never to use them in the same way again The Allies saw things differently After Crete they built up elite units who would play important roles in later battles in Normandy for example where the British 6th Airborne Division took vital bridges prior to the D Day landings These are just two examples of the many similar operations on the Western and Eastern Fronts and in the Pacific which are covered in this wide ranging book It offers the reader a fascinating insight into airborne warfare over seventy years ago

Airborne Forces at War
Robert K. Wright, John T. Greenwood, 2007 This handsome large format book takes the reader on an illustrated tour of the U S Army's hard hitting airborne forces from the original Parachute Test Platoon of 1940 to the multiple global commitment of the twenty first century Featuring more than 150 photographs some rare or seldom seen and many in color the work highlights the extraordinary history of the airborne units as they added new dimensions to national power and military operations arriving from the sky by parachute and aircraft and compressing time by their swift deployment and flight to objectives thousands of miles distant Airborne operations of World War II in the Mediterranean Europe and the Pacific begin an inspiring story that leads through Korea Vietnam and into the twenty first century The operations take a prominent place in the story along with the paratroopers who received the nation's highest award for heroism the Medal of Honor The esprit de corps of the airborne volunteers and their sacrifices in peace and war are consistent themes throughout the book Whether operating as small groups of paratroopers scattered about the countryside or as powerful parachute infantry regiments brigades or divisions the airborne spirit is always evident Coauthors John Greenwood and Robert K Wright highlight key leaders and crucial battles spanning more than six decades to help tell this exciting story Through skillful integration of photographs and text they show how lessons learned in combat led to improved doctrine and the development of equipment that enhanced the mobility and striking power of these versatile units This book is published in cooperation with the Association of the United States Army

Airborne Landing to Air Assault Nikolaos Theotokis, 2020-07-30 Many books have been written about military parachuting in particular about famous parachute operations like Crete and Arnhem in the Second World War and notable parachute units like the British Parachute Regiment and the US 101st Airborne Division but no previous book has covered the entire history of the use of the parachute in warfare That is why Nikolaos Theotokis's study is so valuable He traces in vivid detail the development of parachuting over the last hundred years and describes how it became a standard tactic in twentieth century conflicts As well as depicting a series of historic parachute operations all over

the world he recognizes the role of airmen in the story for they were the first to use the parachute in warfare when they jumped from crippled aeroplanes in combat conditions Adapting the parachute for military purposes occurred with extraordinary speed during the First World War and by the time of the Second World War it had become an established technique for special operations and offensive actions on a large scale The range of parachute drops and parachute led attacks was remarkable and all the most dramatic examples from the world wars and lesser conflicts are recounted in this graphic and detailed study The role played by parachute troops as elite infantry is also a vital part of the narrative as is the way in which techniques of air assault have evolved since the 1970s Paras William F. Buckingham,2005 The British Airborne Forces as we know them today began life as a small handful of parachute raiders in 1940 Prompted by the groundbreaking German use of airborne troops in the Low Countries in May 1940 Winston Churchill had ordered the creation of a raiding force that included a parachute capability William F Buckingham charts the early history of the air transportation of troops and material from their first use by the British following the end of the First World War to Churchill's Raiders of the Second World War and their first missions into occupied Europe **The Sky Generals** Victor Dover,1981

Paras Roger Payne (OAM),2016 The Red Devils G. G. Norton,1971 Green Devils - Red Devils Edmund Blandford,1993-08-16 World War II introduced a new chapter to the history of elite troops the parachute and glider borne soldiers of Germany and the Allies whose story is told in this book Despite their experimental nature there is no doubting the successes achieved by both sides The story of the German airborne corps is traced from its inception the policemen co opted into becoming Goering's paras their army rivals the revelations of the German disasters and triumph in Norway Holland and Belgium before their ultimate test of May 1941 The crucial Battle of Crete is described through the experiences of men who were there the struggle that broke the back of Hitler's airborne army Late starters the British Red Berets came to achieve worldwide fame as crack troops and the book includes the tales of men who volunteered at the start and saw it through to the end the triumphs and tragedies of the ordinary soldier proud to serve in these distinguished regiments Readers will find not only authentic detail and personal stories but insights into airborne operations **Unfulfilled Promise** Leroy Thompson,1998-09 **Storming Eagles** James Lucas,2022-05-26 Unstoppable and deadly this is the gripping story of some of the most feared soldiers in the war The daring courage and skill of the highly trained men who spearheaded German assaults in the blitzkrieg of 1940 dropping from the air to seize and overwhelm key invasion points showed to an alarmed world that a new dimension had been added to the science of warfare One spectacular success was the invasion and capture of Crete in May 1941 all be it achieved at a terrible price The German paratroopers were an elite justifying again and again their great reputation for courage and hard fighting in Russia North Africa and Italy Bestselling military historian James Lucas has researched deeply in Allied and German archives and interviewed many of the leading members of the Fallschirmjaeger who survived the war This is an unmissable and dramatic account of the Second World War's most

frightening elite perfect for readers of James Holland and Max Hastings Airborne Forces ,1990 Wargaming Airborne Operations Donald F. Featherstone,1979 **Airborne Armour** Keith Flint,2004 Despite all the works on airborne forces published since 1945 the full story of Britain s airborne armour has remained untold This book is intended to correct that omission The story has two main strands the project to fly tanks onto the battlefield to support airborne forces and the history of the unit which operated those tanks and supported 6th Airborne Division in the ground role the 6th Airborne Armoured Reconnaissance Regiment The book is the result of considerable original research and contact with surviving members of 6th AARR It contains the full development background of both airborne tanks the British Tetrarch and American Locust and also that of the Hamilcar glider It examines rival or complimentary projects in particular the German Me 321 Gigant glider and analyses the extent to which the British airborne armour project was a success The history of 6th AARR is traced back to the little known Special Service Squadrons of the RAC which were pioneers of armoured amphibious assault and who saw action in the invasion of Madagascar in 1942 One of these squadrons became the Airborne Light Tank Squadron which grew into the Airborne Armoured Reconnaissance Regiment in time for D Day This unit flew 20 Tetrarch tanks into battle on the evening of D Day in the first ever assault landing of tanks from the air and did the same 10 months later when 8 Locust tanks were landed as part of the massive Rhine crossing operation 6th AARR also had a proud history in ground combat in Normandy the Ardennes and Germany often forming the spearhead for the advance of 6th Airborne Division The unit has a fair claim to be the forgotten regiment of British airborne forces a fate which this book aims to put right Airborne Armour describes and analyses a unique unit of the British army and some unique military operations
