The Olive Branch from Palestine Jerome M. Segal, 2022-05-31 Israeli settlements are proliferating in Palestinian territory and if they are annexed the possibility of a future Palestinian state is virtually impossible Could it have been otherwise Can it still be These are the questions Jerome M Segal poses in *The Olive Branch from Palestine* Carefully argued and highly informative this book is centered on an original strategy that Segal devised a strategy adopted but only partially implemented by Palestinian leadership leaving its feasibility untested The first step of this strategy was the issuance in November 1988 of the Palestinian Declaration of Independence That document authored by Palestinian national poet Mahmoud Darwish and modeled on Israel's own Declaration called for a Palestinian state that would live in peace with Israel In *The Olive Branch from Palestine* Segal provides in the first part an analytical and historical study of the 1988 Declaration a remarkable act of unilateral peacemaking through which the PLO accepted the legitimacy of the 1947 Partition Resolution and thereby redefined Palestinian nationalism In the second part he proposes a new strategy based on solutions to the two core issues of 1948 the preservation of a Jewish state and the rights and circumstances of Palestinian refugees With *The Olive Branch from Palestine* Jerome Segal offers a new narrative of the peace process and details a Palestinian led strategy that could end the conflict

Philosophical Dimensions of Public Policy William Galston, 2017-07-12 At the mid point of the twentieth century many philosophers in the English speaking world regarded political and moral philosophy as all but moribund Thinkers influenced by logical positivism believe that ethical statements are merely disguised expressions of individual emotion lacking propositional force or that the conditions for the validation of ethical statements could not be specified or that their content however humanly meaningful is inexpressible *Philosophical Dimensions of Public Policy* presents thirty four articles written by research scholars numerous fields philosophy political theory medicine law biology economics ecology and sociology treating a broad range of topics in practical philosophy The Institute for Philosophy and Public Affairs has been home for these ideas pioneering a distinctive method of conducting inquiry into the moral dimensions of public life and contributing to public discussion and deliberation Members of the Institute reject the idea that public philosophy means reaching into the philosopher s tool kit and applying prefabricated theories to particular problems They set in motion a dialogue between the distinctive moral features of practical problems and the more general moral theories or considerations that seem most likely to elucidate these problems The volume is divided into five areas Politics Civic Life and Moral Education Diversity Identity and Equal Opportunity Human Rights Development Ethics and International Justice Biotechnology Genetic Research and Health Policy and Natural Environment Human Communities *Philosophical Dimensions of Public Policy* presents empirical data and philosophical arguments with the intention of informing public policy and public deliberation Scholars as well as graduate and

Jean Meyer Centre for Research and Teaching in Social Sciences Mexico City Book Jacket *Postdigital Theologies* Maggi
Savin-Baden, John Reader, 2022-09-01 This book is about the relationships between technologies and the content of religious
belief and practice A number of models are now starting to emerge but each of these depends on the theological or
philosophical framework within which the debate is set At the same time there are dilemmas operating at different ends of
the spectrum For example at one end there is a tendency towards subsuming the digital within the divine and at the other an
instrumental stance relating to how technology is deployed Either of these stances could be said to ignore rather than
acknowledge that the human itself is being changed as a result of the interactions with the digital The book explores the
following areas Where is God to be found or present in the postdigital condition What are the implications of the postdigital
condition for spirituality and indeed for the activity of God through the Holy Spirit How do concepts of transhumanism or
posthumanism effect understandings of the incarnation Does the doctrine of the Trinity need revisiting in the light of the
digital as medium of relationship Does Creation now include the postdigital What of the Kingdom of God now that the
kingdom of the Tech giants is so powerful all consuming **Graceful Simplicity** Jerome M. Segal, 2003-04-30 Despite the
United States economic abundance the good life has proved elusive Millions long for more time for friends and family for

mind appreciativeness and generosity of spirit **Trance Forms** Ronaldo Morelos, 2010-05-21 This study investigates forms
of theatre performance practice and training that can be seen to employ trance states or engage the concept of states of
consciousness as performative practice Trance is considered to be the result of sustained involvement with detailed
information that is structurally organised invoking imaginative and affective engagements that are maintained as interactions
between the performer other performers the environment and audience of the performance This thesis investigates trance
performance through the conceptual lens of dramatic arts practice In their respective cultural contexts trance and theatre
attain qualities considered as sacredness Trance practice and performance across a range of cultural contexts are analysed
as social processes as elements of power relations that influence the performer audience and environment of the
performance As performance traditions and events this study will examine strands of praxis that can be drawn from
Constantin Stanislavski to Lee Strasberg to Mike Leigh from Antonin Artaud to Samuel Beckett and Jerzy Grotowski from the
Balinese trance performance form of Sanghyang Dedari in the 1930s to the 1990s from the Channeling practitioners in the U
S in the 1930s to Seth and Lazaris in the 1970s to the 1990s and from traditions of military training performance violence
and rhetoric associated with the attacks of the 11th of September 2001 in the U S and its aftermath *On the Nature of*

Ecological Paradox Michael Charles Tobias, Jane Gray Morrison, 2021-05-18 This work is a large powerfully illustrated interdisciplinary natural sciences volume the first of its kind to examine the critically important nature of ecological paradox through an abundance of lenses the biological sciences taxonomy archaeology geopolitical history comparative ethics literature philosophy the history of science human geography population ecology epistemology anthropology demographics and futurism The ecological paradox suggests that the human biological and from an insular perspective successful struggle to exist has come at the price of isolating H sapiens from life sustaining ecosystem services and far too much of the biodiversity with which we find ourselves at crisis level odds It is a paradox dating back thousands of years implicating millennia of human machinations that have been utterly ruinous to biological baselines Those metrics are examined from numerous multidisciplinary approaches in this thoroughly original work which aids readers particularly natural history students who aspire to grasp the far reaching dimensions of the Anthropocene as it affects every facet of human experience past present and future and the rest of planetary sentience With a Preface by Dr Gerald Wayne Clough former Secretary of the Smithsonian Institution and President Emeritus of the Georgia Institute of Technology Foreword by Robert Gillespie President of the non profit Population Communication *Social Structuration in Tibetan Society* Jia Luo, 2016-12-20 This volume is unique in the literature concerning both the sociology of education and Tibetan society It aims to propose a Tibetan sociology of education something that no other author has attempted as well as to provide insights into the nature of Tibetan society both historically and currently through the application of Giddens structuration theory supplemented by the work of ancient Tibetan philosopher Je TsongKhapa Previous Western accounts of Tibetan history and society have lacked insider perspectives as well as access to original documentation in the Tibetan language The author of this volume is Tibetan and does not experience these limitations He has also taught sociology at the university level and in 1999 published a general textbook on sociology in Tibetan which attempted to draw on Western theories and apply them to the Tibetan context In short the author appears to be highly credible in taking on this extremely ambitious project **Alienation and Wellbeing** Chris Yuill, 2023-12-21 Marx argued that capitalist society acts against the core capacities skills and talents of human beings and that it also limits their realisation or channels them into activities related to profit rather than need Bringing Marx's theory of alienation forward to the present day this book uniquely links it to health and well being Using case studies and vignettes of workers across different industries it reveals their lived experiences offering crucial insights into the insidious ways in which capitalism continues to damage human well being This is a resounding call for how society can change for the better **Annual Review of Anthropology** William H. Durham, 2001-10 **Current Law Index** , 1993
