Fertility Transition in the Developing World John Bongaarts, Dennis Hodgson, 2002-09-01. This open access book provides an overview and analysis of the causes and consequences of the massive and highly consequential transition in reproductive behaviour that occurred in Asia, Latin America and Africa since the mid 20th century. In the 1950s contraceptive use was rare and women typically spend most of their reproductive years bearing and rearing children. By 2020 fertility and contraceptive use in Asia and Latin America reached levels commonly observed in the developed world. Africa's fertility is still high but transitions have started in all countries. This monograph is the first to provide a comprehensive analysis of these trends and their determinants, covering changes in reproductive behaviour, e.g. use of contraception and abortion preferences, e.g. desire to limit and space births, and the role of socioeconomic development, e.g. education. The role of government policies and in particular family planning programs is discussed in depth. Particular attention is given to provide a balanced assessment of several political and scientific controversies that have beset the field. As such, this book provides an interesting read for a wide audience of undergraduate and graduate students, researchers and public health policy makers. *Food Security and Sustainable Development*, 2002. This key resource for anyone interested in the United Nations' global issues or world politics provides accessible and comprehensive coverage of the history, growth and development of ideas and institutions governing the globe. The United Nations has been an essential actor in world politics for 75 years. Its entities have eliminated smallpox, protected the ozone layer, promoted arms control and helped to save the lives of over 90 million children. Yet it is frequently criticized as ineffective and antiquated. This book provides a balanced and systematic overview of the UN's contributions and challenges, highlighting areas where it plays an essential role in global governance as well as areas of redundancy and needed reform. This book provides readers with a clear, well-organized reference resource to the entire UN system, its principal organs, specialized agencies, programs and funds, and key issues of engagement. Through individual entries, it examines the history of UN engagement ranging from peace and security to migration and climate change. It moves beyond a simple description of UN entities as it assesses the development of ideas such as that of sustainable development as

well as responses to changes in world politics Finally it presents both the significant successes of UN work and continued challenges *Migration and Health* ,2002 **Levels and Trends of Contraceptive Use as Assessed in 2002** United Nations. Population Division,2004 This is the fifth report in the series of publications which examine the prevalence of contraceptive use around the world It contains data covering 160 countries including 125 developing countries and 35 developed countries representing 96 per cent of the world population The review is based primarily on data obtained from nationally representative sample surveys and includes two new chapters analysing contraceptive use dynamics and national policies relating to fertility contraception and population growth
