The View of

the Courts from the Hill Mark C. Miller, 2009-05-29 The View of the Courts from the Hill explores the current interactions and relationship between the U S Congress and federal courts using a governance as dialogue approach which argues that constitutional interpretation in the United States is a continuous and complex conversation among all the institutions of government Expanding on his previous work on this important theme Mark C Miller has interviewed numerous key players specifically for this book His subjects include members of Congress federal judges congressional staff employees of the judicial branch lobbyists and others with an interest in the courts Their candid and thorough comments provide an invaluable resource for students and scholars eager to explore the dynamics between congressional and judicial forces as they have evolved over the past two decades The book examines customary interactions between Congress and the federal courts especially the U S Supreme Court as well as extraordinary conflicts between the two branches of government both today and throughout American history Miller gives special attention to recent attempts by social conservatives in Congress to silence the voice of the courts in the inter institutional dialogue through the use of court stripping measures threats of impeachment of federal judges and a proposal for an inspector general for the courts Particular focus is placed on the interactions between the courts and the House Judiciary Committee under Republican control as well as the approach taken by the Religious Right toward federal judges and the federal courts in general The book concludes with a call for the protection of judicial independence in order to preserve the voice of the federal courts in the constitutional interpretation dialogue

Prisoner Radicalization and Terrorism Detention Policy Tinka Veldhuis, 2016-05-20 Correctional policies for Islamist violent extremist offenders are often based on the premise that prisons can be hotbeds of radicalization The perception that inmates are susceptible to violent extremist belief systems has given rise to a fervent international public political and scholarly debate and has led to the introduction of drastic often expensive policies to counter the threat of prison radicalization But is the introduction of these policies justified A key question is whether violent extremist offenders should be concentrated in separate high security prisons or whether they should be integrated into the mainstream inmate population Prisoner Radicalization and Terrorism Detention Policy argues that concentration strategies to manage violent extremist offenders are often flawed based on untested potentially false assumptions that are rooted in fear rather than in facts Little academic evidence has been produced that can valuably inform policy making in this area As a result policies to detain violent extremist offenders may be inadequately tailored to achieve their objectives and could even lead to an intensification of the violent extremist threat This book is the first to present a detailed and systematic case study of the decision making and implementation process behind terrorism detention policy It will be essential reading for students scholars and policymakers researching criminal justice terrorism and extremism

Establishing Child Centred Practice in a Changing World, Part B Sam Frankel, 2023-06-09 Furthering dialogues around the applied relevance of key principles in childhood studies this diverse edited collection is an important contribution to the fields of education sociology childcare and youth policy and

practice The Criminalisation of Youth Francis Bailleau, Yves Cartuyvels, 2010 Transformations to the criminal justice system in Western societies are often linked with broader social and cultural changes and this work presents the recent changes in juvenile justice in Canada and nine European countries and the sociopolitical context in which they take place The study provides a comparison of the sentencing practices of each country focusing on three dimensions related to the sanction practices the custodial sanctions the alternative sanctions and the extension of the judicial thinking into relative fields such as school training and social policies With clear and thoroughly developed research methods this analysis illustrates that changes in juvenile justice policies are not specifically the result of differences in crime rates or the evolution of deviant youth behavior but rather the effect of complex interactions with a variety of social economical cultural and political factors
