Agent Orange ,1982 Dioxins and Health A. Schecter,1994-12-31 This book originated in a series of cross disciplinary conversations in the years 1984 1990 between the editor who is a physician researcher involved in clinical and laboratory research and a dioxin toxicologist During the years in which the conversations took place an extraordinary amount of new scientific literature was published related to dioxins defined for purposes of this text as the chlorinated dibenzo p dioxins

dibenzofurans polychlorinated biphenyls PCBs and other compounds that are structurally and toxicologically similar to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) the most extensively studied and most toxic of this group of chemicals. Dioxins also began to interest not only chemists and toxicologists but also specialists from diverse disciplines such as wildlife and environmental science, immunology, neuroscience, public health, epidemiology, medicine, government, law, sociology, and journalism. Specialists from such varied disciplines while familiar with their own literature frequently did not have time to follow the dioxin literature outside their specialty area. In addition, each specialty had unique knowledge, methods, and perspectives. Cross-disciplinary conversation was necessary but all too frequently specialists from the various disciplines did not speak the same language, resulting in misunderstanding.

The Legacy of Vietnam Veterans and Their Families

Dennis K. Rhoades, Michael R. Leavack, James C. Hudson, 1996-07. 41 papers from 70 authors from the 1994 national symposium on the aftermath of Vietnam. Authorities and doctors of medicine and psychology speak out on the effects of Vietnam on vets and their families. Topics include the children of vets with post-traumatic stress disorder, the potential for change in the delivery of services to vets, rural vets, traumas, and transition, building on the experiences of the Agent Orange class assistance program, lingering consequences of the Vietnam War, vet families with children with disabilities or chronic illness, etc.

But is it True? Aaron B. Wildavsky, 1995. Amid the chaos of questions and conflicting information, Aaron Wildavsky arrives with just what the beleaguered citizen needs: a clear, fair, and factual look at how the rival claims of environmentalists and industrialists work, what they mean, and where to start sorting them out.

Product Liability John S. Allee, Theodore V. H. Mayer, Robb W. Patryk, 1984. This book analyzes the theory and practice of products liability litigation, whether the issue is drugs, food, chemicals, or any of the 100s of other products that may be the subject of litigation.

Vietnam Audrey Seah, Charissa M. Nair, 2004. Diversity is the spice of life, and the highly regarded *Cultures of the World* series celebrates just that. In fully updated and expanded editions, as has always been true of these outstanding titles, an abundance of vibrant photographs, including those new to this edition, stimulate the imaginations of young readers as they travel the globe. A new chapter on the environment focuses on politics and economics, as well as on endangered species and the effects of industrialization.

Additional authentic recipes add general interest, while new maps offer further easy-to-find facts in *About the Geography*, *About the Culture*, and *About the Economy* sections. Copyright Libri GmbH. All rights reserved.
