## **Agent Orange Collateral Damage In Vietnam:**

*Agent Orange* Philip Jones Griffiths, 2003 In these pages are the Vietnamese and Cambodians that the American tourist never see never hear about Here are the results of the US spraying Agent Orange over these countries Never has its effects on humans been so clearly shown as in this book by Philip Jones Griffiths one of the great photographers of the war who feels we should see what Agent Orange has done It is almost unbearable but to turn away and not see the photographs is to compound the crime *A Doctor's Vietnam Journal* Carl E. Bartecchi, 2006 *Agent Orange: The Cleanup Begins* John Stapleton, 2013-05-22 Thirty seven years after the end of the Vietnam War an historic event occurred at busy Da Nang Airport an Agent Orange hot spot where tonnes of the infamous herbicide were decanted and reloaded on to cargo planes for spraying across the country's lush fields and forests Dioxin the accidental contaminant in Agent Orange responsible for many tens of thousands of birth defects and early deaths is regarded as probably the most poisonous of all the compounds ever devised by man This 10 000 word page primer records the events which lead up to the year when the wrongs of the past were finally addressed in joint efforts by the American and Vietnamese governments This short book is the perfect way to bring yourself up to date on this vexed and long running issue **American Culture in the 1960s** Sharon Monteith, 2008-10-08 This book charts the changing complexion of American culture in one of the most culturally vibrant of twentieth century decades It provides a vivid account of the major cultural forms of 1960s America music and performance film and television fiction and poetry art and photography as well as influential texts trends and figures of the decade from Norman Mailer to Susan Sontag from Muhammad Ali's anti war protests to Tom Lehrer's stand up comedy from Bob Dylan to Rachel Carson and from Pop Art to photojournalism A chapter on new social movements demonstrates that a current of conservatism runs through even the most revolutionary movements of the 1960s and the book as a whole looks to the West and especially to the South in the making of the sixties as myth and as history *Taking Southeast Asia to Market* Joseph Nevins, Nancy Lee Peluso, 2018-09-05 Recent changes in the global economy and in Southeast Asian national political economies have led to new forms of commodity production and new commodities Using insights from political economy and commodity studies the essays in *Taking Southeast Asia to Market* trace the myriad ways recent alignments among producers distributors and consumers are affecting people and nature throughout the region In case studies ranging from coffee and hardwood products to mushroom pickers and Vietnamese factory workers the authors detail the Southeast Asian articulations of these processes while also discussing the broader implications of these shifts Taken together the cases show how commodities illuminate the convergence of changing social forces in Southeast Asia today as they transform the terms practices and experiences of everyday life and politics in the global economy **Afterimages** Liam Kennedy, 2016-03 Liam Kennedy here takes as his focus the ways in which selected photographers have sought to frame the activities and effects of American foreign policy often with a critical perspective and how their work engages the dynamics of power and knowledge

that attend the American worldview What is at issue in this book is understanding relations between the geopolitical conditions of visibility and the particulars of the image Conditions of visibility for Kennedy are the ideologies that determine certain ways of seeing that support actions and representations which establish in visibilities and which police the relationship between seeing and believing the American worldview The individual photographers whose work Kennedy so insightfully dissects are those who have pushed the boundaries of photographic practice and who reflect critically on the contexts and scenery of war Larry Burrows and Philip Jones Griffiths in Vietnam Gilles Peress covering the Iranian Revolution Susan Meiselas in El Salvador and Nicaragua Ron Haviv and Gary Knight in the Balkans Ashley Gilbertson and Chris Hondros in Iraq and Tim Hetherington and Lynsey Addario in Afghanistan These individuals expanded the conception and technical repertoire of photojournalism receiving critical acclaim provoking public and professional controversy and often incurring great personal cost to themselves Afterimages presents us with a revisionary understanding of the art of conflict photography The images are often searing they sometimes demonize and dehumanize the enemy but also humanize friend or victim a focus on the human roots the range of feeling in such imagery from horror to pity Why Agent Orange Still Matters?

Ngocnga T. Nguyen, 2005 **Visual Environmental Communication** Anders Hansen, David Machin, 2016-03-17 In 2008 the editors published a well cited journal paper arguing that while scholarly work on media representations of environmental issues had made substantial progress in textual analysis there had been much less work on visual representations This is surprising given the increasingly visual nature of media and communication and in light of emerging evidence that the environment is visualized through the use of increasingly symbolic and iconic images Addressing these matters this volume marks out the present state of the field and contains chapters that represent fresh and exciting high quality scholarly work now emerging on visual environmental communication These include a range of fascinating and often alarming topics which draw on a variety of methods and forms of visual communication The book demonstrates that research needs to think much more widely about what we mean by the visual which plays a massive yet under researched role in the politics and ideology of public understanding and misunderstanding of and the environment and environmental problems The book is of relevance to students and researchers in media and communication studies cultural studies film and visual studies geography sociology politics and other disciplines with an interest in the politics of visual environmental communication This book was published as a special issue of *Environmental Communication A Journal of Nature and Culture* The Crimes of Empire Carl Boggs, 2010-02-02 Imperial nations advance their own interests by exploiting other societies To those on the receiving end this is obvious while inside the empire a powerful ideological system of justification tends to hide all but the worst excess Carl Boggs argues that that the US began life two centuries ago as a nascent colonialist regime plundering and conquering the Native Tribes The Indian wars were followed by perpetual militarism and warfare fuelled by a deep sense of national exceptionalism *The Crimes Of Empire* examines several trends in this process and illustrates the new depths plumbed since 9

in the pantheon of environmental history others are all but forgotten in the collective public mind It begins with herbicide contamination and the Cranberry Scare of November 1959 then explains the use of Agent Orange in Vietnam and its impact on the environmental movement Though the use of two nuclear weapons by the United States military ended World War II in the Pacific the inevitable arms race with the Soviet Union during the Cold War led to the testing of these weapons of mass destruction The second chapter explains how nuclear contaminated fallout became a health threat and a concern for environmentalists and the general public Overpopulation seems to be a nonissue today During the decades prior to Earth Day in 1970 the world s population numbers were a concern of monumental importance This is the focus of chapter three No credible treatment of the twentieth century environmental movement would be complete without addressing the contribution of Rachel Carson and her book Silent Spring Unlike pesticides the effects of which oftentimes surface years after exposure deteriorating air quality burned the eyes and made it difficult to breathe Polluted air particularly in the country s urban areas not only left an indelible impression in the minds of environmentalists but it also threatened public health And clean water taken for granted today by most Americans is the subject of chapter six which describes the extent to which the country s waterways were part of a multibillion dollar restoration project on the part of the states mandated by the federal government The seventh chapter is a retelling of the oil spill disaster in Santa Barbara California and the radical fringe of the environmental movement which manifested itself before Earth Day a fitting precursor to the event itself the subject of the final chapter
