Muscle, Matrix, and Bladder Function Stephen A. Zderic, 2013-11-21 This conference and monograph were the result of many collective efforts The whole concept was formulated one early Wednesday morning at our weekly research meeting at Children's Hospital in our division of urology We have been most fortunate to have a close collaboration with Bob Levin Ed Macarak and Pam Howard who have helped steer the course of our division's growing interest in basic science At our weekly meetings our laboratory fellow will summarize their current work Other ongoing areas of investigation in our labs and elsewhere are discussed We have always made an effort to try and understand what other groups are doing who are working in the area of bladder smooth muscle research It occurred to us that the best way to really know what everyone working in this field was doing would be to sponsor a 2 day meeting where we could all gather to discuss our ongoing work A major limitation of the annual meeting of the American Urologic Association or the urology section of the American Academy of Pediatrics is that the scientific sessions are limited as these are meant to be primarily clinical meetings as they should be For this reason the idea of a meeting devoted solely to research about the urinary bladder had great appeal In addition to allowing for longer presentations than the standard 5 to 7 minutes every effort would be made to encourage a dialogue amongst the presenters and the audience
