Aging In Liver And Gastrointestinal Tract:

Aging in Liver and Gastrointestinal Tract Leonardo Bianchi, 1988-01-01 **Aging and the Gastrointestinal Tract** A. Pilotto, P. Malfertheiner, P. R. Holt, Tamàs Fülöp, 2003-07 With the dramatic increase of the aging population the study and care of gastrointestinal disorders in the elderly have become priority topics for both clinicians and researchers The geriatric approach which includes the epidemiology and pharmacokinetics of drugs as well as a comprehensive multidimensional assessment is particularly important in managing older patients with gastrointestinal disorders since these patients are likely to have multiple interacting problems that interfere with their daily function and complicate their treatment This book presents the results of recent studies in geriatric gastroenterology and reviews both basic and clinical aspects of the field An important section is devoted to the close examination of the structural and functional effects of aging on the physiology of the gastrointestinal tract Recent advances in diagnostic tools and the treatment of elderly patients with dysphagia and gastroesophageal reflux disease as well as with NSAID related or Helicobacter pylori associated gastroduodenal diseases are reported in updated chapters The physician's approach to the management of disorders of the small intestine colon pancreas and liver is discussed highlighting the specific aspects of such disorders in old age As it is important that the geriatric assessment of elderly patients is carried out by a multidisciplinary team which includes experienced specialists as well as primary care physicians and community health workers the book addresses a wide readership general physicians specialists in geriatrics and gastroenterology and health care providers involved in planning care for elderly patients with gastrointestinal disorders *Physiological Basis of Aging and Geriatrics* Paola S. Timiras, 2007-08-16 Extensively revised and updated to reflect the current state of knowledge in the study of aging this Fourth Edition offers a complete profile of the aging process at all levels from molecules and cells to demography and evolution Written by international experts in current basic and clinical aging research this text includes aspects of individual comparative and differential aging and discussions of theories and mechanisms of aging This invaluable reference illustrates how bodily systems organs and functions are affected with aging describes how genetic and environmental factors influence age related changes and addresses some of the clinical consequences of these changes for health and longevity Well illustrated with numerous tables and graphs this book presents up to date information from internationally renowned experts in various bio medical fields **Physiology of the Gastrointestinal Tract** Kim E. Barrett, Faye K. Ghishan, Juanita L. Merchant, Hamid M. Said, Jackie D. Wood, 2006-05-10 FROM THE PREFACE The original purpose of the First Edition of Physiology of the Gastrointestinal Tract to collect in one set of volumes the most current and comprehensive knowledge in our field was also the driving force for the Fourth Edition The explosion of information at the cellular level made possible in part by the continued emergence of powerful molecular and cellular techniques has resulted in a greater degree of revision than that of any other edition The first section now titled Basic Cell Physiology and Growth of the GI Tract contains numerous new chapters on topics such as transcriptional

regulation signaling networks in development apoptosis and mechanisms in malignancies Most of the chapters in this section were edited by Juanita L Merchant Section II has been renamed Neural Gastroenterology and Motility and has been expanded from seven chapters with rather classic titles to more than twenty chapters encompassing not only the movement of the various parts of the digestive tract but also cell physiology neural regulation stress and the regulation of food intake Almost all of the chapters were recruited and edited by Jackie D Wood The third section is entirely new and contains chapters on Immunology and Inflammation which were edited by Kim E Barrett The fourth section on the Physiology of Secretion consists of chapters with familiar titles but with completely updated information to reflect the advances in our understanding of the cellular processes involved in secretion The last section on Digestion and Absorption contains new chapters on the intestinal barrier protein sorting and ion channels along with those focusing on the uptake of specific nutrients These chapters were recruited and edited by Hamid M Said and Fayez K Ghishan Collected in one set the most current and comprehensive coverage of gastrointestinal physiology Information presented in a style that is both readable and understandable Valuable to the specialized researcher the clinical gastroenterologist the teacher and the student Features an entirely new section on Immunology and Inflammation Each section edited by the preeminent scientist in the field Aging of the Organs and Systems Richard Aspinall, 2013-06-29 During the last 40 years the study of the biological basis of aging has progressed tremendously and it has now become an independent and respectable field of study and research This volume on Aging of Organs and Systems is an attempt to bring understanding to both the aging process and the disease processes of old age Bringing together contributions from an international team of authors it will be of interest to graduates and postgraduates in the fields of medicine and nursing researchers of different aspects of biogerontology and those in the pharmaceutical cosmeceutical nutraceutical and health care industry *Guyton's Textbook of Medical Physiology, 4th South Asia Edition - E-Book* Mario Vaz, Anura Kurpad, Tony Raj, 2024-08-08 Guyton and Hall Textbook of Medical Physiology continues this bestselling title's tradition as the world's favorite physiology textbook presenting complex principles in language that is easy to read and understand The main aim of the Fourth South Asia Edition of Guyton Hall Textbook of Medical Physiology is to meet the needs of undergraduate medical students and faculty in South Asia by aligning the book to modern recommended teaching methods in the subcontinent The South Asia Edition incorporates several features aimed at aiding learning for students while retaining the flow and explanatory approach Implementation of the one chapter one lecture model aligning the text with curriculum objectives to enhance appeal for students and faculty Introduction of easy to read boxes containing clinical information summaries lists and vignettes providing accessible and relevant content Incorporation of updated Learning Objectives and a Glossary of Terms at the beginning of every chapter facilitating focused learning and understanding Addition of new multiple choice questions MCQs for each chapter promoting active learning and assessment opportunities **Cells, Aging, and Human Disease** Michael Fossel, 2004 It explains both the limited and

general model of cell senescence as the central component in human clinical aging BOOK JACKET *Lewis's Adult Health Nursing I and II: Assessment and Management of Clinical Problems* 5SAE 2V - E-Book Chintamani, Dr. L.

Pilotto, 2007-01-01 The study and care of gastrointestinal disorders in the elderly have become priority topics for both clinicians and researchers as the aged constitute an ever increasing part of the overall population This publication presents the results of recent studies in geriatric gastroenterology reviewing both basic research and clinical aspects A significant part is devoted to the physician s clinical approach to the elderly suffering from specific gastroenterological problems Another focal point is diagnostic testing which becomes very important in old age because clinical features such as history

and physical signs are often very difficult to interpret clinical manifestations and the response to therapy may seem to differ because the older patient has several concomitant disorders that may distort the classic features of the primary gastrointestinal disease Also discussed are the effects of aging on the physiology of the gastrointestinal tract and liver functions as well as the management of disorders of the small intestine colon and liver This publication will be useful for general physicians specialists in geriatrics and gastroenterology and all healthcare providers who are involved in planning care management of elderly people with gastrointestinal disorders
