Normal Human Aging Gerontology Research Center (U.S.),1984 The Emotional and Sexual Lives of Older People H. B. Gibson,2013-12-14 **Aging, a Challenge to Science and Society** D. Danon,Nathan Wetherill Shock,Maurice Marois,1981 **Old Age** Haim Hazan,1994-04-28 Haim Hazan is a leading specialist on old age in anthropology and has published several books on particular communities of old people The latest book is an essay on the realities of old age as it is experienced as opposed to the ideas about the old current in western societies It argues that the construction of this world by outsiders is inevitably affected by deeply ingrained social attitudes and structures such as the spatial segregation of the aged as a population and the fear of death with which they are associated By approaching the subject from the social constructionist perspective and by drawing on a variety of detailed ethnographic accounts the author describes a unique and nuanced social world This is a sophisticated and original book which should have a significant impact on a field still dominated by a social problems approach Exploring the Second Language Mental Lexicon David Michael Singleton,1999-02-11 This volume provides a review of L1 and L2 lexical research issues as well as new research The Age Factor in Second Language Acquisition David Michael Singleton,Zsolt Lengyel,1995-01-01 This book takes a hard look at some of the assumptions that are customarily made concerning the role of age in second language acquisition The evidence and arguments the contributors present run counter to the notion that an early start in second language learning is of itself either absolutely sufficient or necessary for the attainment of native like mastery of a second language Another theme of the book is a doubt that there is a particular stage of maturity beyond which language learning is no longer fully possible In short the book presents a challenge to those who take it as given that second language learning is inevitably different in its essential nature from language acquisition in the childhood years and that second language knowledge acquired beyond the critical period is in all circumstances and in all respects doomed to fossilize at a non native like level *Aging : a Challenge to Science and Society : Vol.3 : Behavioural Sciences : Conclusions and Perspectives* Institut de la vie,1983 **Ageing in Society** John Bond,Peter Coleman,Sheila M Peace,1993-11-01 This Second Edition has been extensively revised and expanded to take account of recent theory and research A new chapter has been added dealing with issues of death and dying and particular attention has been paid to issues of gender and ethnicity in the social structuring of later life It has been adopted by The Open University as a set book for its course K256 An Ageing Society *Functional Capacity of Men Born in 1906-10, 1926-30, and 1946-50* ,1984 Routledge Library Editions: Philosophy of Time Various Authors,2021-03-05 Reissuing five works originally published between 1937 and 1991 this collection contains books addressing the subject of time from a mostly philosophic point of view but also of interest to those in the science and mathematics worlds These texts are brought back into print in this small set of works addressing how we think about time the history of the philosophy of time the measurement of time theories of relativity and discussions of the wider thinking about time and space among other

aspects One volume is a thorough bibliography collating references on the subject of time across many disciplines
