Taking Shape Susannah Hagan, 2001 Taking Shape explores the evolution of scientific and academic theories that have resulted in the concept of sustainability Susannah Hagan uses this as a basis to argue for developments in the future and argues that these theories are not just an intellectual and aesthetic regression as they are often perceived to be By focusing on the impact of the new theories of sustainable technology and new materials in architecture Hagan moves the discourse and practice of environmental sustainability within architecture towards a greater degree of awareness of both its cultural significance and cultural potential In short it demonstrates the

capacity of sustainable architecture to embrace cultural and technical innovation Enables you to understand the evolution of the theoretical arguments behind sustainability Allows you to project into the future of sustainability technology rather than just examining the current situation Provides you with a valuable insight into the relationship between the physical and cultural context and architecture Living Architecture, Living Cities Christopher Day, Julie Gwilliam, 2019-11-08 It is widely accepted that our environment is in crisis Less widely recognized is that three quarters of environmental damage is due to cities the places where most of us live As this powerful new book elucidates global sustainability is therefore directly dependent on urban design In *Living Architecture Living Cities* Christopher Day and Julie Gwilliam move beyond the current emphasis on technological change They argue that eco technology allows us to continue broadly as before and only defers the impending disaster In reality most negative environmental impacts are due to how we live and the things we buy Such personal choices often result from dissatisfaction with our surroundings As perceived environment has a direct effect on attitudes and motivations improving this can achieve more sustainable lifestyles more effectively than drastic building change with its notorious performance gap limitations As it is in places that our inner feelings and material reality interact perceived environment is place based Ultimately however as the root cause of unsustainability is attitude real change requires moving from the current focus on buildings and technology to an emphasis on the non material Featuring over 400 high quality illustrations this is essential reading for anyone who believes in the value and power of good design Christopher Day's philosophy will continue to inspire students with an interest in sustainable architecture urban planning and related fields *Urban Design*, 2007 Vernacular Architecture: Towards a Sustainable Future C. Mileto, F. Vegas, L. García Soriano, V. Cristini, 2014-08-28 Sustainability is a concept that has monopolised a large number of the scientific debates in a wide range of spheres connected not only with architecture urban planning and construction but also with the product market tourism culture etc However sustainability is indissolubly linked to vernacular architecture and the lessons this architectu *Ecopolis* Dimitra Babalis, 2006 **Place-specific Design.
