Agricultural Science And The Quest For Legitimacy:

Agricultural Science and the Quest for Legitimacy Alan I. Marcus, 1985-01-01 *Agricultural Science and the Quest for Legitimacy* Alan I. Marcus, 1985 **Publicly Funded Agricultural Research and the Changing Structure of U.S. Agriculture** National Research Council, Division on Earth and Life Studies, Board on Agriculture and Natural Resources, Committee to Review the Role of Publicly Funded Agricultural Research on the Structure of U.S. Agriculture, 2002-03-18 The U S Department of Agriculture USDA requested that the Board on Agriculture and Natural Resources of the National Research Council NRC convene a panel of experts to examine whether publicly funded agricultural research has influenced the structure of U S agriculture and if so how The Committee to Review the Role of Publicly Funded Agricultural Research on the Structure of U S Agriculture was asked to assess the role of public sector agricultural research on changes in the size and numbers of farms with particular emphasis on the evolution of very large scale operations

Nineteenth-Century Science A.S. Weber, 2000-03-10 *Nineteenth Century Science* is a science anthology which provides over 30 selections from original 19th century scientific monographs textbooks and articles written by such authors as Charles Darwin Mary Somerville J W Goethe John Dalton Charles Lyell and Hermann von Helmholtz The volume surveys scientific discovery and thought from Jean Baptiste Lamarck s theory of evolution of 1809 to the isolation of radium by Marie and Pierre Curie in 1898 Each selection opens with a biographical introduction situating each scientist and discovery within the context of history and culture of the period Each entry is also followed by a list of further suggested reading on the topic A broad range of technical and popular material has been included from Mendeleev s detailed description of the periodic table to Faraday s highly accessible lecture for young people on the chemistry of a burning candle The anthology will be of interest to the general reader who would like to explore in detail the scientific cultural and intellectual development of the nineteenth century as well as to students and teachers who specialize in the science literature history or sociology of the period The book provides examples from all the disciplines of western science chemistry physics medicine astronomy biology evolutionary theory etc The majority of the entries consist of complete unabridged journal articles or book chapters from original 19th century scientific texts **Agricultural Economics and Rural Sociology** Wallace C. Olsen, 1991 The first of an eight volume series *The Literature of the Agricultural Sciences* this book analyzes the trends in the published literature of agricultural economics and rural sociology during the past fifty years It uses citation analysis and other bibliometric techniques to identify the primary journals report series and monographs of current importance to the developed industrial countries as well as those in the Third World **The Broken Promise of Agricultural Progress** Cameron Muir, 2014-06-05 Food and the global agricultural system has become one of the defining public concerns of the twenty first century Ecological disorder and inequity is at the heart of our food system This thoughtful and confronting book tells the story of how the development of modern agriculture promised ecological and social stability but instead descended into

dysfunction Contributing to knowledge in environmental cultural and agricultural histories it explores how people have tried to live in the aftermath of ecological imperialism The Broken Promise of Agricultural Progress An environmental history journeys to the dry inland plains of Australia where European ideas and agricultural technologies clashed with a volatile and taunting country that resisted attempts to subdue and transform it for the supply of global markets Its wide ranging narrative puts gritty local detail in its global context to tell the story of how cultural anxieties about civilisation population and race shaped agriculture in the twentieth century It ranges from isolated experiment farms to nutrition science at the League of Nations from local landholders to high profile moral crusaders including an Australian apricot grower who met Franklin D Roosevelt and almost fed the world This book will be useful to undergraduates and postgraduates on courses examining international comparisons of nineteenth and twentieth century agriculture and courses studying colonial development and settler societies It will also appeal to food concerned general readers The Rise of the Agricultural Welfare State Adam D.

Sheingate,2021-05-11 A long dominant reading of American politics holds that public policy in the United States is easily captured by special interest groups Countering this view Adam Sheingate traces the development of government intervention in agriculture from its nineteenth century origins to contemporary struggles over farm subsidies His considered conclusion is that American institutions have not given agricultural interest groups any particular advantages in the policy process in part because opposing lobbies also enjoy access to policymakers In fact the high degree of conflict and pluralism maintained by American institutions made possible substantial retrenchment of the agricultural welfare state during the 1980s and 1990s In Japan and France two countries with markedly different institutional characters than the United States powerful agricultural interests and a historically close relationship between farmers bureaucrats and politicians continue to preclude a roll back of farm subsidies This well crafted study not only puts a new spin on agricultural policy but also makes a strong case for the broader claim that the relatively decentralized American political system is actually less prone to capture and rule by subgovernments than the more centralized political systems found in France and Japan Sheingate s historical comparative approach also demonstrates in a widely useful way how past institutional developments shape current policies and options

Education Roger L. Geiger, 2017-07-05 This work provides a critical reexamination of the origin and development of America's land grant colleges and universities created by the most important piece of legislation in higher education. The story is divided into five parts that provide closer examinations of representative developments. Part I describes the connection between agricultural research and American colleges. Part II shows that the responsibility of defining and implementing the land grant act fell to the states which produced a variety of institutions in the nineteenth century. Part III details the first phase of the conflict during the latter decades of the nineteenth century about whether land colleges were intended to be agricultural colleges or full academic institutions. Part IV focuses on the fact that full fledged universities became dominant institutions of American higher education. The final part shows that the land grant mission is alive and well in university colleges of agriculture and in fact is inherent to their identity. Including some of the best minds the field has to offer, this volume follows in the fine tradition of past books in Transaction's Perspectives on the History of Higher Education series.

Disciplining Reproduction Adele E. Clarke, 2022-03-25 Reproductive issues from sex and contraception to abortion and cloning have been controversial for centuries and scientists who attempted to turn the study of reproduction into a discipline faced an uphill struggle. Adele Clarke's engrossing story of the search for reproductive knowledge across the twentieth century is colorful and fraught with conflict. Modern scientific study of reproduction human and animal began in the United States in an overlapping triad of fields: biology, medicine, and agriculture. Clarke traces the complicated paths through which physiological approaches to reproduction led to endocrinological approaches, creating along the way new technoscientific products from contraceptives to hormone therapies to new modes of assisted conception for both humans and animals. She focuses on the changing relations and often uneasy collaborations among scientists and the key social worlds most interested in their work: major philanthropists and a wide array of feminist and medical birth control and eugenics advocates. She recounts vividly how the reproductive sciences slowly acquired standing. By the 1960s reproduction was disciplined and the young and contested scientific enterprise proved remarkably successful at attracting private funding and support. But the controversies continue as women the targeted consumers create their own reproductive agendas around the world. Elucidating the deep cultural tensions that have permeated reproductive topics historically and in the present, *Disciplining Reproduction* gets to the heart of the twentieth century's drive to rationalize reproduction human and nonhuman in order to control life itself. This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, *Voices Revived* makes high quality peer reviewed scholarship accessible once again using print on demand technology. This title was originally published in 1998. [Evan Pugh's Penn State](#) Roger L. Williams, 2018-03-12 When Evan Pugh became the first president of Pennsylvania's Farmers High School later to be known as The Pennsylvania State University, the small campus was in disrepair and in dire need of leadership. Pugh was young, barely into his 30s, but he was energetic.

educated and visionary During his tenure as president he molded the school into a model institution of its kind America's first scientifically based agricultural college In this volume Roger Williams gives Pugh his first book length biographical treatment Williams recounts Pugh's short life and impressive career from his early days studying science in the United States and Europe to his fellowship in the London Chemical Society during which he laid the foundations of the modern ammonium nitrate fertilizer industry and back to Pennsylvania where he set about developing upon the soil of Pennsylvania the best agricultural college in the world and worked to build an American academic system mirroring Germany's state sponsored agricultural colleges This last goal came to fruition with the passage of the Morrill Act in 1862 just two years prior to Pugh's death Drawing on the scientist academic administrator's own writings and taking a wide focus on the history of higher education during his lifetime Evan Pugh's Penn State tells the compelling story of Pugh's advocacy and success on behalf of both Penn State and land grant colleges nationwide Despite his short life and career Evan Pugh's vision for Penn State made him a leader in higher education This engaging biography restores Pugh to his rightful place in the history of scientific agriculture and education in the United States

Charles Valentine Riley W. Conner Sorensen, Edward H. Smith, Janet R. Smith, 2019-07-16 Riley propelled entomology from a collector's parlor hobby of the nineteenth century to the serious study of insects in the Modern Age This definitive biography is the first full account of a fascinating American scientist whose leadership created the modern science of entomology that recognizes both the essential role of insects in natural systems and their challenge to the agricultural food supply that sustains humankind Charles Valentine Riley Founder of Modern Entomology tells the story of how Riley 1843 1895 a young British immigrant to America with classical schooling only a smattering of natural history knowledge and with talent in art and writing but no formal training in science came to play a key role in the reorientation of entomology from the collection and arrangement of specimens to a scientific approach to insect evolution diversity ecology and applied management of insect pests Drawing on Riley's personal diaries family records correspondence and publications the authors trace Riley's career as farm laborer Chicago journalist Missouri State Entomologist chief federal entomologist founder of the National Insect Collection and initiator of the professional organization that became the Entomological Society of America Also examined in detail are his spectacular campaigns against the Rocky Mountain Locust that stalled western migration in the 1870s the Grape Phylloxera that threatened French vineyards in the 1870s and 80s the Cotton Worm that devastated southern cotton fields after the Civil War and the Cottony Cushion Scale that threatened the California citrus industry in the 1880s The latter was defeated through importation of the Vedalia Beetle from Australia the spectacular first example of biological control of an invasive insect pest by its introduced natural enemy A striking figure in appearance and deed Riley combined scientific literary artistic and managerial skills that enabled him to influence every aspect of entomology A correspondent of Darwin and one of his most vocal American advocates he discovered the famous example of mimicry of the Monarch butterfly by the Viceroy and described the intricate

coevolution of yucca moths and yuccas a complex system that fascinates evolutionary scientists to this day Whether applying evolutionary theory to pest control promoting an American silk industry developing improved spray technologies or promoting applied entomology in state and federal government and to the public Riley was the central figure in the formative years of the entomology profession In addition to showcasing his own renderings of the insects he investigated this comprehensive account provides fresh insight into the personal and public life of an ingenious colorful and controversial scientist who aimed to discover understand and outsmart the insects **Planting the Seeds of Research** Louis A. Ferleger, 2020-01-31 Planting the Seeds of Research explores why by the beginning of the twentieth century the United States dominated agricultural production worldwide The thesis is that the ultimate investments made by the United States Department of Agriculture and State governments created the research structure that made American agriculture spectacularly successful The social commitment by business government and farmers built the productive capabilities that generated sustainable prosperity in American agriculture The ultimate investment in agriculture enabled Americans over time to spend less of their disposable income on food and more on other goods and services and compete in international agricultural markets **The Evolution and Development of Biotechnology** Joel Schor, 1994
