Agricultural Sustainability Strategies For Assessment:

Agricultural Sustainability Gary W vanLoon, S G Patil, L B Hugar, 2005-05-01 This book describes how to develop methods for evaluating and assessing the sustainable development of agricultural systems in a micro region. A comprehensive and practical book it guides the reader through details of the methodology needed to carry out an appropriate assessment and focuses on the central problem of whether productivity can be maintained. More specifically it discusses the meanings of sustainability and sustainable development and reviews the issues related to agricultural sustainability. Examines the theory and practice of indicators and delineates the six categories considered necessary for a holistic evaluation: productivity, stability, efficiency, durability, compatibility, and equity.

Water and Agricultural Sustainability Strategies Manjit S Kang, 2010-03-25 According to the United Nations 77 million people are expected to face water shortage by 2025 if people continue to use water at the current rate. More water than available would be needed to grow the world's food during the next decade. As a result of scarcity of water, global annual food production losses could reach 350 million tons by 2025. Monitoring and evaluation of farm sustainability in the context of climate-smart agriculture interventions Colozza, D. (ed.); Schnetzer, J. (ed.); Sessa, R. (ed.), This publication represents a first step towards an updated and more holistic take on the original Climate Smart Agriculture concept that is more attentive to the multiple interconnected dimensions of sustainability and that acknowledges the synergies and trade offs between production goals, environmental conservation, and social equity. The methodology it describes will guide national and local governments, project staff, and researchers in supporting small scale producers in a more effective and targeted way and ultimately help them reap the benefits from more resilient agricultural practices that increase the productivity of their systems in a sustainable way.

Research Anthology on Strategies for Achieving Agricultural Sustainability Management Association, Information Resources, 2022-02-18 Agriculture has been an enduring human tradition key to survival and civilization. However, after the advent of industrialization and agricultural growth, the industry has been met with several challenges including pollution, land use, and food insecurity. With the agricultural industry contributing to pollution and emissions, many have found it imperative to investigate the causes and seek out solutions. The Research Anthology on Strategies for Achieving Agricultural Sustainability discusses the issues that the agricultural industry currently faces and the technological opportunities that can be explored to help protect and predict crop growth and achieve more resilient agricultural processes. It analyzes the impact of agricultural pollution and food insecurity on a global scale but also proposes solutions to promote agricultural sustainability. Covering topics such as bio farming, smart farming, and population growth, this book is an indispensable resource for government officials, agricultural scientists, farmers, students, and professors of higher education, activist groups, researchers, and academicians.

Methods and Procedures for Building Sustainable Farming Systems Ana Alexandra Marta-Costa, Emilian L. D. G. Soares da Silva, 2012-10-20 Showing how the method of sustainability assessment plays a key

role in choosing the best agricultural productive mode this book guides the reader through the process of selecting from among the various approaches for building farming systems the method of decision making that will result in the most appropriate outcome given the context Case studies hail from polities as diverse as Portugal and Canada Argentina and Lebanon The work thus offers a valuable critical survey of the assessment methods that account for sustainability and economics and which have developed considerably in the last two decades The heterogeneous approaches covered here make this volume appropriate for consultation in a wide variety of social political and geographical contexts

Implementation of an indicator-based framework for farm sustainability assessment in Ecuador Blanco-Gutiérrez, I.; Arbonès Domingo, G.; Esteve Bengoechea, P.; Heredia Rengifo, M.G.; Morales Opazo, C., Cocoa is one of Ecuador's most emblematic and traditional export products The cocoa sector is vital to the country's economy and is an essential source of livelihood for many households in rural areas Cocoa production has grown significantly in the last decade However it faces intricate socioeconomic and environmental problems including poverty inequality and deforestation that threaten the sustainability of the cocoa value chain Although efforts have been made to assess the sustainability of cocoa farms in Ecuador the number of studies is still low and their usefulness is hampered by methodological issues Existing sustainability assessment tools often provide a partial view focusing on one or two of the classic sustainability dimensions often on the economic social or environmental dimensions This study applies a novel indicator based framework FARMTOOLS that assesses five dimensions of sustainability economic social environmental nutrition and health and governance thus offering a fully integrated perspective of sustainability The framework has been applied to cocoa farms in Manab one of the largest cocoa producing areas in Ecuador to assess and compare the sustainability of farms cultivating fine flavour cocoa and CCN 51 cocoa the two main varieties grown in the country The study highlights critical aspects affecting cocoa farm sustainability and as such it helps to identify areas where policy interventions might contribute to more sustainable practices thus improving the sustainability of cocoa farms in the country
