Institutions and Sustainability Volker Beckmann,Martina Padmanabhan,2009-02-07 From the first vague idea to use Konrad Hagedorn s 60th birthday as an inspi

tion for taking stock of his vibrant academic contributions this joint book project has been a great pleasure for us in many ways Pursuing Hagedorn's intellectual development we have tried to reflect on the core questions of humanity according to Ernst Bloch Who are we Where do we come from and Where are we heading In this way and without knowing it Konrad Hagedorn initiated a collective action process he would have very much enjoyed if he had been allowed to take part in it But it was our aim and constant motivation to surprise him with this collection of essays in his honour Konrad Hagedorn was reared as the youngest child of a peasant family on a small farm in the remote moorland of East Frisia Germany During his childhood in the poverty ridden years after the Second World War he faced a life where humans were heavily dependent on using nature around them for their livelihoods meanwhile he learned about the fragility of the environment As a boy he tended a one room schoolhouse where his great intellectual talents were first recognised and used for co teaching his schoolmates These early teaching experiences might have laid the foundations for his later becoming a dedicated lecturer and mentor

Natural Resources Management in Agriculture Bekele Shiferaw, H. Ade Freeman, Scott M. Swinton, 2005 In response to increasing concerns about the degradation of natural resources and the sustainability of agriculture many research programmes have been established in natural resource management NRM However although methods for evaluating the impacts of crop improvement technologies are well developed there is a dearth of methods for evaluating the impacts of NRM interventions This is partly due to the complexity of interactions among natural resources spatial and temporal dimensions of impact and the valuation of direct and indirect environmental costs and benefits This book discusses the unique features and methodological difficulties of NRM impact assessment It examines the strengths and weaknesses of various impact assessment approaches including econometric bio economic and more direct methods It also assesses and identifies data requirements for developing impact indicators and recommends suitable methodologies for assessing the impacts of NRM technologies on issues such as soil and water conservation and watershed and biodiversity management

Modern Agricultural and Resource Economics and Policy Harry de Gorter, Jill McCluskey, Johan Swinnen, David Zilberman, 2022-06-23 This volume celebrates the life and career of Gordon Rausser pioneer and leader in natural resource economics while critically overviewing the emerging literature in the field As the chair of the Agriculture and Resource Economics department at UC Berkeley Rausser led the transformation of the department from a traditional agricultural economics department to a diverse resource economics department addressing issues of agriculture food natural resources environmental economics energy and development This book builds on this theme showcasing not only the scope of Rausser's work but also key developments in the field The volume is organized into two parts The first part speaks about the lessons of Gordon Rausser's career in particular his role as a leader in different spheres his capacity to integrate teaching and entrepreneurship and his impact on the world food system The second part will address some of the significant developments in the field he contributed to and how it relates to his work The chapters include contributions from modern leaders in the

economics field and cover diverse topics from many subfields including public policy public finance law econometrics macroeconomics and water resources Providing an excellent reference as well as a celebration of a pivotal figure in the field this volume will be useful for practitioners and scholars in agricultural and resource economics especially the many individuals familiar with Gordon Rausser and his career *Economic Valuation of Water Resources in Agriculture* R. Kerry Turner, 2004-01-01 The purpose of this report is to produce a review on water resource valuation issues and techniques specifically for the appraisal and negotiation of raw as opposed to bulk or retail water resource allocation for agricultural development projects The review considers raw water in naturally occurring watercourses lakes wetlands soil and aquifers taking an ecosystem function perspective at a catchment scale and takes account of the demands from irrigated and rainfed agriculture It is hoped that the review will have particular application to developing countries where agreed methods for reconciling competing uses are often absent but nevertheless takes account of valuation approaches that have been made in post industrial economies *Resource Management by West African Farmers and the Economics of Shifting Cultivation*, *Journal of Agricultural Economics Research*, **The Journal of Agricultural Economics Research**, 1988

Handbook of Agricultural Economics Robert E. Evenson, Prabhu Pingali, 2009-10-20 Advances in agriculture offer many countries the best and only chance of reducing poverty Yet economic growth and population increases are driving higher demand for food and rising real prices What solutions have successfully promoted agriculture This volume examines national and international food agriculture policies and how they enhance agricultural productivity growth It provides unique historical reviews on policies and their effects and it clearly articulates both positive and negative lessons for promoting agriculture lead growth With chapters written by international authorities this book recognizes that agriculture is not just about providing food for today but about growing it in an environmentally sustainable way that can help people work their ways out of poverty Chapters cover international macro economic policies and trade farm structure in developing countries regional experiences in agriculture and regional studies on agricultural productivity policies *Agricultural Perspectives on Water Resource Management in the America's* Joe Makuch, 1995-08 Contains 224 citations on the topic of water resource management in the U S Canada Central South America Includes articles on rural perspectives water pollution water quality etc Most citations contain abstracts Author subject index *Farm Management, Production and Resource Economics* Mr. Rohit Manglik, 2024-04-04 EduGorilla Publication is a trusted name in the education sector committed to empowering learners with high quality study materials and resources Specializing in competitive exams and academic support EduGorilla provides comprehensive and well structured content tailored to meet the needs of students across various streams and levels *Multifunctional Rural Land Management* Floor Brouwer, C. Martijn van der Heide, 2012-05-16 The increasing demand for rural land and its natural resources is creating competition and conflicts Many interested parties including farmers nature conservationists rural residents and tourists compete for the same space Especially in densely populated areas agriculture

recreation urban and suburban growth and infrastructure development exert a constant pressure on rural areas Because land is a finite resource spatial policies which are formulated and implemented to increase the area allocated to one use imply a decrease in land available for other uses As a result at many locations multi purpose land use is becoming increasingly important This notion of multi purpose land use is reflected in the term multifunctionality This volume provides insights into viable strategies of sustainable management practices allowing multiple functions sustained by agriculture and natural resources in rural areas It shows how the rural economy and policies can balance and cope with these competing demands and includes numerous case studies from Europe North America and developing countries **Agricultural**

Perspectives on Water Resource Management in the Americas, January 1985 - July 1993 Joe Makuch, 1993

Current Issues in the Economics of Water Resource Management P. Pashardes, T.M. Swanson, A.

Xepapadeas, 2013-04-17 The marginal price elasticities estimated by Martinez Espineira conforms to expectation The price specification that accounts for the changing proportion of water users in each block yields a higher elasticity 0.47 compared to the specification ignoring this feature of the data However this difference is not found to be statistically significant a result attributed to the low power of the test small sample size limiting the accuracy of estimates In conclusion the paper provides a theoretically correct price specification for demand functions under block pricing and aggregate data The empirical findings in the paper however are not conclusive and further empirical work using more data and alternative nonlinear demand functions is needed to show the practical implications of the arguments put forward by the Martinez Espineira's paper Static empirical consumer demand functions estimated with aggregate data are well known to suffer from serial correlation and other statistical problems associated with misspecified dynamics These dynamics arise because consumers do not react immediately to a change in prices due to their largely predetermined lifestyle In the case of demand for water for example current purchases can be largely predetermined due to commitments arising from past purchases such as swimming pools bathtubs dishwashing machines etc Muellbauer and Pashardes 1992 show that the autoregressive nature of consumer demand data can be captured in a theoretically consistent manner by incorporating intertemporal aspects of consumer behaviour in the model through habit formation and durability
