Ahfs Drug Information 2017 Ashsp, 2017-02-28 With the 2017 edition the American Hospital Formulary Service AHFS marks its 59th year of continuous publication by the American Society of Health System Pharmacists ASHP First published in 1959 the Formulary Service has evolved to address increasingly complex issues related to drug therapy and formulary management Preface The ICU Book Paul L. Marino, Kenneth M. Sutin, 2012-02-13 This best selling resource provides a

general overview and basic information for all adult intensive care units The material is presented in a brief and quick access format which allows for topic and exam review It provides enough detailed and specific information to address most all questions and problems that arise in the ICU Emphasis on fundamental principles in the text should prove useful for patient care outside the ICU as well New chapters in this edition include hyperthermia and hypothermia syndromes infection control in the ICU and severe airflow obstruction Sections have been reorganized and consolidated when appropriate to reinforce concepts Drug Interactions in Infectious Diseases Stephen C. Piscitelli, Keith Rodvold, 2007-10-28 Over the past 25 years

the world's population has witnessed an explosion in knowledge about infectious diseases The global population is coming to the realization that diseases long recognized to cause substantial suffering such as malaria tuberculosis schistosomiasis and hepatitis can be diagnosed and treated and that transmission can be prevented using tools that are available and which may be becoming increasingly affordable The global population is recognizing that few infections are local the travel of humans other animals insects and food transport pathogens around the world often with astonishing rapidity New pathogens are appearing either newly recognized or newly developing such as severe acute respiratory syndrome SARS avian influenza metapneumovirus or hepatitis C which are causing human morbidity and mortality Finally there is growing fear that dangerous pathogens may be intentionally introduced into human populations by deranged individuals or terrorist organizations The potential to use drugs or biologic agents to treat and prevent infectious diseases has increased dramatically over the past quarter century as we have learned more about the biology of many of these agents and as we have developed techniques to discover new agents by high throughput screening programs and by sophisticated drug design and synthesis

Multidrug-resistant Tuberculosis I. Bastian, F. Portaels, 2012-12-06 Multidrug resistant tuberculosis past present and future Ivan Bastian and Franyoise Portaels Mycobacteriology Unit Institute of Tropical Medicine Antwerp Belgium The Lord hath created medicines out of the earth and he that is wise will not abhor them Ecclesiasticus 38:4 quoted by Selman Waksman when accepting the 1952 Nobel Prize for Medicine that was awarded for the discovery of the first effective antituberculosis drug streptomycin which was derived from the soil bacterium *Streptomyces griseus* 1 HISTORICAL PERSPECTIVE This book has been published at the close of the twentieth century when the medical profession and the general community are increasingly concerned about the threat of multidrug resistant tuberculosis MDRTB 1 2 However at

this epoch it is enlightening to move back from our immediate concerns about MDRTB hot spots in Asia South America and the former Soviet Union 3 and to place our current predicament in an historical context If the results of the global survey of antituberculosis drug resistance conducted by the World Health Organisation WHO and the International Union against Tuberculosis and Lung Disease IUATLD can be extrapolated only 2 2% of TB cases worldwide are due to multi drug resistant strains 3 At the beginning of the 20th century all TB cases were refractory to all available therapies Great advances had been made during the 19th century in the understanding of the epidemiology and pathogenesis of TB and in the diagnosis of the disease reviewed in references 4 7
