Abreu, João Gama, 2025-09-29 This multi volume set LNAI 16013 to LNAI 16022 constitutes the refereed proceedings of the European Conference on Machine Learning and Knowledge Discovery in Databases ECML PKDD 2025 held in Porto Portugal September 15 19 2025 if supportLineBreakNewLine endif The 300 full papers presented here together with 15 demo papers were carefully reviewed and selected from 1253 submissions The papers presented in these proceedings are from the following three conference tracks The Research Track in Volume LNAI 16013 16020 refers about Anomaly Outlier Detection Bias Fairness Causality Clustering Data Challenges Diffusion Models Ensemble Learning Graph Neural Networks Graphs Networks Healthcare Bioinformatics Images Computer Vision Interpretability Explainability Large Language Models Learning Theory Multimodal Data Neuro Symbolic Approaches Optimization Privacy Security Recommender Systems Reinforcement Learning Representation Learning Resource Efficiency Robustness Uncertainty Sequence Models Streaming Spatiotemporal Data Text Natural Language Processing Time Series and Transfer Multitask Learning The Applied Data Science Track in Volume LNAI 16020 16022 refers about Agriculture Food and Earth Sciences Education Engineering and Technology Finance Economy Management or Marketing Health Biology Bioinformatics or Chemistry Industry 4 0 5 0 Manufacturing Smart Cities Transportation and Utilities e g Energy Sports and Web and Social Networks The Demo Track in LNAI 16022 showcased practical applications and prototypes accepting 15 papers from a total of 30 submissions These proceedings cover the papers accepted in the research and applied data science tracks **Inland Aquaculture Sustainability and Effective Water Management Strategies** T. Vamsi

Nagaraju, Bhumika Das, 2025-06-14 This book attempts to unlock the intricacies of transforming inland aquaculture into a beacon of sustainability with this indispensable guide It outlines the challenges ahead and presents many innovative strategies to overcome them ensuring a future where aquaculture contributes positively to environmental social and economic well being With a focus on the pivotal role of water management this book offers a comprehensive toolkit of solutions ranging from cutting edge technologies like remote sensing and machine learning to integrating IoT and renewable energy all aimed at optimizing resource use and minimizing environmental impacts It goes beyond the technical aspects to delve into the heart of sustainability exploring the socio economic dimensions crucial for successful aquaculture operations This guide serves as a roadmap for stakeholders at all levels providing insights into sustainable feed and nutrition eco friendly construction and effective waste management while addressing the need for resilience against climate change This book does more than predict the future it does so by drawing from an extensive array of case studies and research Nevertheless it provides you with the necessary components to make it which makes it a vital tool for anybody devoted to the long term advancement of inland aquaculture Accept this advice to pave the way for a more robust productive and

sustainable aquaculture environment

Artificial Intelligence in Chemical Engineering Farooq Sher,2025-10-04

Artificial Intelligence in Chemical Engineering explores the integration of artificial intelligence AI into various facets of chemical engineering The book introduces historical information highlights current state and trends in AI applications and discusses challenges and opportunities within the field Foundational principles of AI and machine learning are thoroughly covered giving readers a solid understanding of basic AI principles machine learning algorithms and the crucial processes of model training and validation The book then delves into the critical phase of data acquisition and preprocessing for AI models addressing strategies for data collection ensuring data quality and techniques for feature engineering and selection Subsequent chapters cover a wide spectrum of AI applications in chemical engineering From supervised and unsupervised learning for process modeling to the advanced realm of deep learning applications this book explores neural networks convolutional and recurrent architectures and their real world applications in process optimization and analysis Navigates the dynamic intersection of AI and chemical engineering covering ethical considerations interdisciplinary applications and AI's impact on safety sustainability and innovation Bridges the gap between policy and implementation of AI in chemical engineering facilitating a harmonious integration of AI technologies and fostering responsible and effective use within the chemical engineering industry Offers a forward looking approach to guide professionals researchers and students in navigating the dynamic and transformative future of AI in chemical engineering

AI Technologies for Crop Breeding

Jen-Tsung Chen,2025-10-01 AI Technologies for Crop Breeding offers the latest insights into the use of artificial intelligence models to improve plant health and production Presenting applications of AI technologies in plant biology biotechnology and crop breeding it explores practices for the mitigation of biotic and abiotic stressors as well as other plant growth challenges AI based technologies are expected to advance approaches to plant functional genomics and multiple omics resulting in smarter and more efficient crop breeding for next generation agriculture helping to address the challenges of the increasing human population and the globally changing climate AI tools such as machine learning particularly deep learning have been applied to predict chief players in complicated biological networks increasing the understanding of in depth mechanisms of plant pathogen and plant environment interactions Additionally responses of plants facing stress can be modeled using AI technologies and the resulting data are valuable not only to plant stress physiology but also for stress resilient and disease resistant crop breeding This book introduces AI technologies for studying plant biology focusing on machine learning and deep learning models for integrating multiple omics approaches and revealing the knowledge of plant functional genomes Technological advancements and emerging applications of machine learning and deep learning in genomic selection genome wide association study GWAS phenotyping and constructing phenomics and transcriptomics are also featured in this book AI Technologies for Crop Breeding is an ideal reference for researchers academics and advanced level students and professors in the fields of plant sciences plant stress physiology bioinformatics systems biology and crop breeding Reviews AI based

technologies in crop plant functional genomics Presents integration of AI tools with high throughput omics Advances understanding of the potential impact of AI technologies in addressing the UN Sustainable Development Goals **Advances in Aerospace Engineering** Hande Girard,Durdu Hakan Utku,2025-10-14 This book Advances in Aerospace Engineering Artificial Intelligence Structures Materials and Optimization explores cutting edge AI and machine learning methods that are revolutionizing aerospace and aviation With chapters covering key topics such as AI driven research structural analysis using Python optimization of aircraft design and the future of high strength materials like borophene the book provides insights into how recent advancements contribute to efficiency sustainability and innovation in the industry From energy efficient UAV routing to sustainable aviation fuels each chapter offers valuable applications and advanced techniques making this a comprehensive guide for professionals and researchers in aerospace engineering and AI **Applied Neural Networks in the AI Era: From Theory to Real-World Impact** Benziane, Sarah,Guerroudj Meddah, Fatiha,2025-06-11 In the era of artificial intelligence AI applied neural networks transition from theoretical constructs to powerful tools driving innovation across sectors Neural networks can learn patterns make predictions and adapt to complex data From powering image and speech recognition systems to enabling autonomous vehicles and enhancing medical diagnostics their impact is continually expanding Advances in computational power big data and algorithmic design accelerate this transformation making neural networks critical to AI applications As these models become integrated into everyday technologies further research into their design limitations and ethical implications becomes pivotal Applied Neural Networks in the AI Era From Theory to Real World Impact explores the integration of intelligent technologies into neural networks It examines the application of neural networks in various sectors including transportation medicine computing etc This book covers topics such as biology cloud computing and smart robotics and is a useful resource for engineers business owners academicians researchers and computer scientists Machine Learning: ECML 2001 Luc de Raedt,Peter Flach,2003-06-30 This book constitutes the refereed proceedings of the 12th European Conference on Machine Learning ECML 2001 held in Freiburg Germany in September 2001 The 50 revised full papers presented together with four invited contributions were carefully reviewed and selected from a total of 140 submissions Among the topics covered are classifier systems naive Bayes classification rule learning decision tree based classification Web mining equation discovery inductive logic programming text categorization agent learning backpropagation reinforcement learning sequence prediction sequential decisions classification learning sampling and semi supervised learning **Philosophy of Artificial Intelligence and Its Place in Society** Moutinho, Luiz,Cavique, Luís,Bigné, Enrique,2023-10-16 The early 2020s have been marked by a surge of interest in artificial intelligence AI and it has grown to be one of the hottest topics in computer science business technology research and educational technologies Despite AI winters in the 1970s and 1990s where interest and subsequently adequate funding for AI research ceased and as the technology and its usefulness become more perceptible often with brilliant results society is once

again ready to investigate this powerful technology and its potential. However a challenge arises when AI is called into question in an ethical context. It is important that we explore how it can contribute to the resolution of ethical, social and environmental issues and also to address growing concerns around AI developing emergent bias as well as the human application of AI for malicious purposes. With recent AI based writing technologies concerns around academic integrity abound and challenge our perceptions of authenticity in writing. A careful assessment of these technologies, their usefulness and potential harm and strategic solutions to maintaining ethical standards and regulation of the technology is a necessity for the maintenance of civilized life amidst these tools.

Philosophy of Artificial Intelligence and Its Place in Society evaluates various aspects of artificial intelligence including the range of technologies, their advantages and disadvantages and how AI systems operate. Spanning from machine learning to deep learning, philosophical insights, societal concerns and the newest approaches to AI, it helps to develop an appreciation for and breadth of knowledge across the full range of AI sub disciplines including neural networks, evolutionary computation, computer vision, robotics, expert systems, speech processing and natural language processing.

Led by Dr Luiz Moutinho of the University of Suffolk in the United Kingdom, who has won several awards for his academic literature, this book provides academic market scholars, researchers and students of philosophy, sociology, economics and education as well as corporate scientists with a comprehensive collection of core research elements, concepts, advances, applications, evidence and outcomes related to artificial intelligence.

Computer Vision - ECCV 2022 Shai Avidan, Gabriel Brostow, Moustapha Cissé, Giovanni Maria Farinella, Tal Hassner, 2022-10-22. The 39 volume set comprising the LNCS books 13661 until 13699 constitutes the refereed proceedings of the 17th European Conference on Computer Vision ECCV 2022 held in Tel Aviv, Israel during October 23-27, 2022. The 1645 papers presented in these proceedings were carefully reviewed and selected from a total of 5804 submissions. The papers deal with topics such as computer vision, machine learning, deep neural networks, reinforcement learning, object recognition, image classification, image processing, object detection, semantic segmentation, human pose estimation, 3d reconstruction, stereo vision, computational photography, neural networks, image coding, image reconstruction, object recognition, motion estimation.

HCI in Business, Government and Organizations Keng Leng Siau, Fiona Fui-Hoon Nah, 2025-05-25. This two volume set of HCIBGO 2025 constitutes the refereed proceedings of the 12th International Conference on HCI in Business, Government and Organizations held as part of the 27th International Conference HCI International 2025 which took place in Gothenburg, Sweden during June 22-27, 2025. Two volumes of the HCII 2025 proceedings are dedicated to this year's edition of the HCIBGO conference. The first volume covers topics related to User Experience Design and Digital Engagement, Artificial Intelligence in Digital Transformation and Business Processes and Social Media and Market Insights. The second volume focuses on topics related to Roles, Skills and Technology Adoption in Modern Workplaces and Collaboration, Communication and Work Dynamics.
