Aids Dictionary:

The AIDS Dictionary Sarah Watstein, Karen Chandler, 1998 AIDS has made a huge impact on our society medically socially politically legally and psychologically Sarah Watstein encapsulates this interdisciplinary issue into approximately 4 000 terms and explains them objectively clearly and readably for high school students adults and medical professionals The terms include related diseases such as Kaposi s Sarcoma treatments such as interleukin jargon no code and slang bareback sex The appendixes list statistics toll free telephone numbers Web sites nonprofit and government organizations clinical trials databases and payment assistance programs Highly recommended for all libraries Outstanding Reference Sources the 1999 Selection of New Titles American Libraries May 1999 Comp by the Reference Sources Committee RUSA ALA [Aids to Reflection, and The Confessions of an Inquiring Spirit](#) Samuel Taylor Coleridge, 1884 [Religious Responses to HIV and AIDS](#) Miguel Munoz-Laboy, Jonathan Garcia, Joyce Moon-Howard, Patrick A. Wilson, Richard Parker, 2016-01-08 Religious institutions shaped the ways individuals communities and societies responded to HIV and AIDS since the 1980s This book draws on research studies ranging in context from sites in sub Saharan Africa to New York City in the USA to examine the complexity of responding to the epidemic both globally and locally Religious systems of meaning practices and institutions have been central to the articulation of projects for social change and inversely sometime strongly resistant to change in diverse institutional responses to HIV and AIDS Sometimes religious movements provided powerful forces for community mobilisation in response to the social vulnerability economic exclusion and health problems associated with HIV In other contexts religious cultures have reproduced values and practices that have seriously impeded more effective approaches to mitigate the epidemic By highlighting these complex and sometimes contradictory social processes this book provides new insights about the potential for religious institutions to address the HIV epidemic more effectively More broadly it shows how research can be done on religion in the area of global public health showing how civil society organizations shape opportunities for health promotion a crucial and new area of global public health research This book was originally published as a special issue of Global Public Health **HIV and Psychological Issues** IJIP.In, 2015-12-01 The International Journal of Indian Psychology is going to organize annual special issue HIV and Psychological Issues published in 1st December 2015 World AIDS Day on the World The annual special issue aims to provide the opportunity to build connections and offering a unique insight into the recent research and development about HIV patients and their Psychological problems *AIDS: The Threat to World Security* , [HIV / AIDS, Health and the Media in China](#) Johanna Hood, 2011-01-25 HIV AIDS is an increasingly serious problem in China with an increasing number of new cases every year As a result HIV organizations have boomed with both state and non governmental organisations responding to the threat with campaigns to increase public awareness of the disease utilising the media as the primary tool to reshape citizens understandings and views of HIV AIDS This book explores how HIV AIDS is portrayed in China s media It argues that despite increasing education campaigns media

coverage and social and academic openness towards HIV AIDS many Chinese of the majority Han ethnic group regard infection as a distant possibility believing themselves to be immune and infection a problem only for certain non Han ethnic groups with perceived lower moral standards in particular black Africans The book explores how HIV AIDS is reported analysing the language used in constructing and encoding the health narrative its subjects and ideas about the disease It demonstrates how China s media frequently employs negative events to present the most extreme possibilities of poverty danger disasters and disease with black Africa portrayed as an antiquated distant and socioculturally and politically backward place uniquely unsuitable for the containment of disease in contrast with the progressive scientifically sophisticated and morally upstanding Chinese It argues that this discourse has had the effect of distancing many Chinese from the perceived possibility of infection thus compromising the effectiveness of public health campaigns on HIV AIDS It suggests that the key to combating the spread of the disease lies in challenging the racialised narratives through which the disease is portrayed in China s media rather than simply by aiming to educate greater numbers of people

A Study of the Lack of Hiv/Aids Awareness Among African American Women: a Leadership Perspective Betty L. Ragsdale - Hearn, 2012-09 I wrote this dissertation for the School of Advanced Studies at University of Phoenix Arizona in 2011 To do the research for the dissertation I spent quite a bit of time at the Center of Disease Control and Prevention archives as a graduate student I also interviewed medical doctors and others who knew about the subject matter Since I wrote this dissertation there has been more research published that I will continue to research and add to my archival collection The issues of this dissertation were discussed as the emergent theoretical model and its components which included implications of research practice stigma burden advocacy and awareness Leadership education and community resources were the dominant themes that emerged in the study The study findings imply an increased need for leaders to present public awareness about the affects HIV AIDS has on the African American community Future research should consider the explicit nature of the answers which benefited the study The information would be helpful while improving the quality of life available for African American women and would enable leaders to interact with a leadership perspective USAID 2009
