## **Aids In The World Ii:**

**AIDS in the World II** Global AIDS Policy Coalition, 1996 *AIDS in the World Vol 1* published in 1992 was the first full analysis of mankind's global confrontation with this disease. The AIDS scene however has been changing so rapidly that the need for a second volume was felt much earlier than expected. In *AIDS in the World II* the authors extend the international comparisons from 38 countries to the entire world and show that the AIDS pandemic has become increasingly fragmented within the world population. They present data that takes the discussion beyond the current understanding of the vulnerability of nations and communities to the worldwide spread of HIV, engaging in a detailed exploration of the social strategies that have enabled individuals to avoid infection. Mann and Tarantola chart a course into the future based on an incisive investigation of the global pandemic and response, the crucial lessons learned from the first decade, and their expert understanding of the scientific and social dimensions of the HIV challenge. The authors explain how the variety of reactions to the pandemic has contributed to a more advanced awareness of our vulnerability to HIV/AIDS and offer a blueprint for an expanded global prevention effort. Intended to serve the information needs of all professionals involved in AIDS research and care, this volume's accessibility and clarity of writing make it highly suitable for the general reader as well. *AIDS in Africa* Max Essex, Souleymane Mboup, Phyllis J. Kanki, Richard G. Marlink, Sheila D. Tlou, 2007-05-08 This comprehensive reference book addresses the unique challenges facing many African nations as poor infrastructure and economics continue to obstruct access to advanced treatments and AIDS care training. It takes into account the context of settings with limited resources. Information on how to best utilize existing resources and prioritize scaling up of infrastructure is a critical aspect of this book for those working in HIV/AIDS related fields in Africa. Confronting AIDS World Bank, 1999 This revised and updated edition of the pathbreaking report on the global AIDS epidemic outlines the strategic role that government must play in slowing the spread of HIV and mitigating the impact of AIDS. Drawing on the knowledge accumulated in the 17 years since the virus that causes AIDS was first identified, the report highlights policies that are most likely to be effective in managing the epidemic. These include early actions to minimize the spread of the virus, aiming preventive interventions at high risk groups, and evaluating measures that would assist households affected by AIDS according to the same standards applied to other health issues. This revised edition will be a valuable resource for public health policymakers, researchers, and anyone with an interest in this devastating global health crisis. *Handbook of HIV Prevention* John L. Peterson, Ralph J. DiClemente, 2012-12-06 In the nearly two decades since the HIV pandemic began, the rapid expansion of behavioral research on HIV prevention has prompted a crucial need for a sourcebook more advanced than an introductory textbook and broader and more readily accessible than a review periodical. The *Handbook of HIV Prevention* is intended as the first attempt to meet this need. The current state of affairs led us to edit a book that would represent the major areas of HIV behavioral research at a level appropriate for graduate students and experienced researchers in public health, medicine, nursing, education, and the

social and behavioral sciences In addition we expect that the handbook will be useful in advanced undergraduate courses and as a reference book for health care professionals Our plans to assemble the Handbook began in the fall of 1996 when we prepared a tentative outline of chapters and invited a large number of distinguished researchers in the field to be the authors of various chapters We received an overwhelmingly favorable response from potential authors to our letters of invitation After considerable effort by both the contributors and the editors the volume was completed in 1999 when all chapters went to press

*Global Health Policy, Local Realities* Linda M. Whiteford, Lenore Manderson, 2000 International health planners often design programmes based on the assumption that recipient nations share the same level playing field with regard to conceptions of health illness and at risk populations This volume analyzes why humanitarian projects fail to recognize ethnic identities

**Quantitative Evaluation of HIV Prevention Programs** Edward H. Kaplan, Ron Brookmeyer, 2008-10-01 How successful are HIV prevention programs Which HIV prevention programs are most cost effective Which programs are worth expanding and which should be abandoned altogether This book addresses the quantitative evaluation of HIV prevention programs assessing for the first time several different quantitative methods of evaluation The authors of the book include behavioral scientists biologists economists epidemiologists health service researchers operations researchers policy makers and statisticians They present a wide variety of perspectives on the subject including an overview of HIV prevention programs in developing countries economic analyses that address questions of cost effectiveness and resource allocation case studies such as Israel's ban on Ethiopian blood donors and descriptions of new methodologies and problems

The Origins of AIDS Jacques Pepin, 2011-09-01 It is now thirty years since the discovery of AIDS but its origins continue to puzzle doctors and scientists Inspired by his own experiences working as an infectious diseases physician in Africa Jacques Pepin looks back to the early twentieth century events in Africa that triggered the emergence of HIV AIDS and traces its subsequent development into the most dramatic and destructive epidemic of modern times He shows how the disease was first transmitted from chimpanzees to man and then how urbanization prostitution and large scale colonial medical campaigns intended to eradicate tropical diseases combined to disastrous effect to fuel the spread of the virus from its origins in Leopoldville to the rest of Africa the Caribbean and ultimately worldwide This is an essential new perspective on HIV AIDS and on the lessons that must be learnt if we are to avoid provoking another pandemic in the future

*Preventing HIV in Developing Countries* Laura Gibney, Ralph J. DiClemente, Sten H. Vermund, 2006-04-11 Globally action to prevent HIV spread is inadequate Over 16 000 new infections occur every day Yet we are not helpless in the face of disaster as shown by the rich prevention experience analyzed in this valuable new compendium Best practice exists a set of tried and tested ways of slowing the spread of HIV of persuading and enabling people to protect themselves and others from the virus Individually features of best practice can be found almost everywhere The tragedy on a world scale is that prevention is spotty not comprehensive the measures are not being applied on anywhere near the scale needed or with the right focus or synergy The

national response may concentrate solely on sex workers for example Elsewhere efforts may go into school education for the young but ignore the risks and vulnerability of men who have sex with men Action may be patchy geographically AIDS prevention may not benefit from adequate commitment from all parts and sectors of society compromising the sustainability of the response In some countries matters are still worse there is still hardly any action at all against AIDS and scarcely any effort to make HIV visible It is no wonder that the epidemic is still emerging and in some places is altogether out of control

*Committing to Results* Martha Ainsworth, Denise Vaillancourt, Judith Hahn Gaubatz, 2005 This evaluation assesses the development effectiveness of the World Bank's country level HIV AIDS assistance defined as policy dialogue analytic work and lending with the explicit objective of reducing the scope or impact of the AIDS epidemic The evaluation identifies findings from this experience and makes recommendations to improve the relevance efficiency and efficacy of ongoing and future activities This is the first comprehensive evaluation of the World Bank's HIV AIDS support to countries from the beginning of the epidemic through mid 2004 Because the Bank's assistance is for implementation of government programs by government it provides important insights on how national AIDS programs can be made more effective **An**

**Introduction to Global Health Delivery** Joia Mukherjee, 2022 In 2019 a child born in Japan will live to the age of 84 whereas a child born in Sierra Leone will only live until the age of 54 1 Similar disparities exist between rich and poor communities within countries 2 These differences in life expectancy are not caused by genetics biology or culture Health inequities are caused by poverty racism a lack of medical care and other social forces that influence health A critical analysis of the historical roots of this gross and systemic inequality and of the political economy that continues inequality is a fundamental part of the study of global health **World Population Profile: 1998, With a Special Chapter Focusing on**

**HIV/AIDS in the Developing World, WP/98, Issued February 1999**, 1999 **The HIV Pandemic** Peter Piot, 2007-12-14

As we approach the 25th anniversary of the first recognition of HIV AIDS in 1981 this book reflects on the international impact of the disease It has persistently remained a global issue with more than 50 million people worldwide estimated to have been infected since that date This ambitious book written by 165 authors from 30 countries offers a multi country comparative study that examines how the response to the common global threat of HIV is shaped by the history culture institutions and health systems of the individual countries affected Increasingly the shift of health systems has been from prevention only as the main containment strategy to a strategy that includes scaling up HIV treatment and care and prevention services including antiretroviral therapy Thus all parts of the health system must be involved policy makers healthcare professionals and users of the services have been forced to think differently about how services are financed how resources are allocated how systems are structured and organized how services are delivered to patients and how the resulting activity is monitored and evaluated in order to improve the effectiveness efficiency equity and acceptability of the response This book is unique in attempting to describe and assess a range of responses across the globe by situating them

within the characteristics of each country and its health system Most chapters combine a health policy expert with an HIV specialist allowing both a top down health system approach and a bottom up HIV specific perspective There are thematic and analytical sections which provide an overview and some suggestions for solutions to the most serious outstanding issues and chapters which analyse specific country and organisational responses There is no perfect health system but the evidence provided here allows the sharing of knowledge and a opportunity to assess the impact and reactions to an epidemic that must be considered a long term issue

The International Struggle for New Human Rights Clifford Bob,2011-03-19 In recent years aggrieved groups around the world have routinely portrayed themselves as victims of human rights abuses Physically and mentally disabled people indigenous peoples AIDS patients and many others have chosen to protect and promote their interests by advancing new human rights norms before the United Nations and other international bodies Often these claims have met strong resistance from governments and corporations More surprisingly even apparent allies such as Amnesty International Human Rights Watch and other nongovernmental organizations have voiced misgivings arguing that rights proliferation will weaken efforts to protect their traditional concerns civil and political rights Why are certain global problems recognized as human rights issues while others are not How do local activists transform long standing problems into universal rights claims When and why do human rights groups governments and international organizations endorse new rights The International Struggle for New Human Rights is the first book to address these issues Focusing on activists who advance new rights the book introduces a framework for understanding critical strategies and conflicts involved in the struggle to persuade the human rights movement to move beyond traditional problems and embrace pressing new ones Essays in the volume consider rights activism by such groups as the South Asian Dalits sexual minorities and children of wartime rape victims while others explore new issues such as health rights economic rights and the right to water Examining both the successes and failures of such campaigns The International Struggle for New Human Rights will be a key resource not only for scholars but also for those on the front lines of human rights work
