Why Don't Jumbo Jets Flap Their Wings? David Alexander,2009-06-02 What do a bumble bee and a 747 jet have in common It s not a trick question The fact is they have quite a lot in common They both have wings They both fly And they re both ideally suited to it They just do it differently Why Don t Jumbo Jets Flap Their Wings offers a fascinating explanation of how nature and human engineers each arrived at powered flight What emerges is a highly readable account of two very different approaches to solving the same fundamental problems of moving through the air including lift thrust turning and landing The book traces the slow and deliberate evolutionary process of animal flight in birds bats and insects over millions of years and compares it to the directed efforts of human beings to create the aircraft over the course of a single century Among the many questions the book answers Why are wings necessary for flight How do different wings fly differently When did flight evolve in animals What vision knowledge and technology was needed before humans could learn to fly Why are animals and aircrafts perfectly suited to the kind of flying they do David E Alexander first describes the basic properties of wings before launching into the diverse challenges of flight and the concepts of flight aerodynamics and control to present an integrated view that shows both why birds have historically had little influence on aeronautical engineering and exciting new areas of technology where engineers are successfully borrowing ideas from animals *Festivals, Affect and Identity* Lita Crociani-Windland,2011-10-15 Via an ethnographic study of the community festivals of Siena Province in central Italy Festivals Affect and Identity investigates the affective and fluid aspects of reality to establish an integrated perspective on issues of continuity and rupture tradition and modernity and nature and culture Offering an illustration of the explanatory power of continental philosophy this text demonstrates the accessibility of highly abstract critical theory when examined in relation to specific events and their detailed analysis *Beyond Market Access for Economic Development* Gerrit Faber,Jan Orbie,2009-06-17 The Economic Partnership Agreements between the European Union and the Africa Caribbean and Pacific ACP countries have drastically restructured Europe s trade architecture towards the third world This volume examines the

consequences of EPAs for development in sub Saharan Africa SSA Starting from the observation that the establishment of free trade as such will substantially impact upon economic development the different contributions focus on the potential contribution of non traditional aspects of EPAs More specifically the authors analyze the role of Aid for Trade schemes regulatory integration issues and broader foreign policy considerations How can these non market access aspects stimulate development in Africa and how have they been addressed in the EPAs In short this brings us to the question whether the light version EPAs as they currently stand are a missed chance or a blessing in disguise **The Women of the Far Right** Eviane Leidig,2023-09-19 On mainstream social media platforms far right women make extremism relatable They share Instagram stories about organic foods that help pregnant women propagate the pure white race and post behind the scenes selfies at antivaccination rallies These social media personalities model a feminine lifestyle at once promoting their personal brands and radicalizing their followers Amid discussions of issues like dating marriage and family life they call on women to become housewives to counteract the corrosive effects of feminism and champion the Great Replacement conspiracy theory which motivated massacres in Christchurch El Paso and Buffalo Eviane Leidig offers an in depth look into the world of far right women influencers exploring the digital lives they cultivate as they seek new recruits for white nationalism Going beyond stereotypes of the typical male white supremacist she uncovers how young attractive women are playing key roles as propagandists organizers fundraisers and entrepreneurs Leidig argues that far right women are marketing themselves as authentic and accessible in order to reach new followers and spread a hateful ideology This insidious and highly gendered strategy takes advantage of the structure of social media platforms where far right women influencers content is shared with and promoted to mainstream audiences Providing much needed expertise on gender and the far right this timely and accessible book also details online and offline approaches to countering extremism **Nuclear Structure Far from Stability** Aldo Covello,2008 Gives an account of advances and various perspectives in the study of nuclei far from stability This book deals with book nuclear structure models and their derivation from the basic nucleon nucleon interaction It discusses the shell model the interacting boson model and the cluster model **Global Heating and the Australian Far Right** Imogen Richards,Gearóid Brinn,Callum Jones,2023-12-01 Global Heating and the Australian Far Right examines the environmental politics of far right actors and movements in Australia exploring their broader political context and responses to climate change The book traces the development of far right pseudo environmentalism and territorial politics from colonial genocide and Australian nationalism to extreme right political violence Through a critical analysis of news and social media it reveals how denialist and resignatory attitudes towards climate change operate alongside extreme right accelerationism in a wider Australian political context characterised by reactionary fossil fuel politics and neoliberal New Right climate change agendas The authors scrutinise the manipulation of environmental politics by contemporary Australian far and extreme right actors in cross national online media They also assess the political ideological context of the contemporary far right

addressing intergovernmental approaches to security threats connected to the far right and climate change and the emergence of radical environmentalist traditions in New Catastrophism literature The conclusion synthesises key insights analysing the mainstreaming of ethnonationalist and authoritarian responses to global heating and potential future trajectories of far right movements exploiting the climate crisis It also emphasises the necessity for radical political alternatives to counter the far right s exploitation of climate change This book will be of interest to researchers of climate change the far right neoliberal capitalism extremism and Australian politics
