Aims Of Education A Quest For Rethinking:

Better Mental Health in Schools Alison Woolf, 2022-09-20 *Better Mental Health in Schools* recognises the value of school staff in supporting mental health in children and young people and introduces new skills for enhancing the therapeutic benefits of environments and relationships in schools. This book discusses and links to provision in schools and to supporting good mental health in pupils across four key areas for enhancing mental health and wellbeing: Cognition, Compassion, Containment, and Connection. Based in relevant and timely research, it provides an accessible insight into practical ways to change practice. Rather than prescribe one programme or suggest one curriculum design, the book shows how strengthening knowledge and understanding of some basic underpinnings of good mental health will scaffold the development of better mental health in schools and offers illustrations of how that could look in everyday practice. Written for practitioners and based on many years of experience in classrooms across a variety of education provisions, this book reflects the lived experiential perspective of a teacher and school therapist. Through paying attention to these four key areas of daily life in school, staff can create an environment that supports mental wellbeing while not depleting their own mental health.

Thinking and Rethinking the University Ronald Barnett, 2014-11-27 In the World Library of Educationalists series, international scholars compile career-long selections of what they judge to be among their finest pieces so the world has access to them in a single manageable volume. Readers are able to follow the themes and strands and see how their work contributes to the development of the field. Over more than three decades, Professor Ronald Barnett has acquired a distinctive position as a leading philosopher of the university and higher education, and this volume brings together 15 of his key writings, particularly papers from leading journals. This volume also includes as his introductory chapter an intellectual autobiography in which Professor Barnett recounts the history of his scholarship and writing, traces its development across five stages, and identifies the themes and sources of inspiration that lie within his corpus of work. Ronald Barnett has described his corpus of work as a social philosophy of the university that is at once conceptual, critical, practical, and imaginative. His concepts of criticality, critical interdisciplinarity, supercomplexity, and the ecological university have been taken up in the literature across the world. Through telling examples and with an incisive clarity of writing, Ronald Barnett's scholarship has helped to illuminate in fresh ways and reorient practices in the university and in higher education. The chapters in this volume reveal all of these qualities, so making this volume a compelling overview of a passionate and yet constructive critic of the university. *Rethinking Reflection and Ethics for Teachers* R. Re-thinking Picturebooks for Intermediate and Advanced Learners: Perspectives for Secondary English Language Education Grit Alter,Thorsten

Merse,2023-11-27 Der didaktische Wert von Picturebooks für den Englischunterricht in der Grundschule gilt als unumstritten. Jedoch gibt es in Forschung und Unterrichtspraxis derzeit kaum Ansätze wie der Transfer dieses vermeintlich kindlichen Literaturmediums in die Sekundarstufe gelingen kann. Dieser Band legitimiert Picturebooks als komplex angelegte Textform, die sich auch mit fortgeschrittenen Lernenden zu kompetenz- und inhaltsorientierter Arbeit im Englischunterricht anbietet. Die im Band versammelten konzeptuellen und empirischen Perspektiven zeigen angehenden und praktizierenden Lehrkräften konkret auf, wie vielfältig Picturebooks den Unterricht bereichern können. Eine große Bandbreite praktischer Beispiele verdeutlicht ihr Potenzial für den Englischunterricht der Sekundarstufen von der Förderung verschiedener Literacies und literarischen Lernens bis hin zur Fokussierung von Themen wie Umwelt, sozialer Gerechtigkeit oder kultureller Diversität.

It makes connections between video games and time-tested pedagogical techniques such as discovery learning and feedback to improve student engagement and learning. It also examines the social nature of gaming such as techniques for driver, navigator, partners, small groups, and whole class structures to help make thinking visible. It expands the traditional design process teachers engage in by encouraging use of video game design techniques such as playtesting. The author emphasizes designing curricular games for problem solving and warns against designing games that are simply Alex Trebek host of Jeopardy wearing a mask. By drawing on multiple fields such as systems thinking, design theory, assessment, and curriculum design, this book relies on theory to generate techniques for practice. Single Mothers, Patriarchy and Citizenship in India: Rethinking Lone Motherhood through the Lens of Socio-legal and Policy Framework Adv. Dr. Shalu Nigam, 2024-02-18 Motherhood is a powerful virtue. However, in a patriarchal society, it is construed narrowly to uphold the heteronormative family norms which prioritize men over women. This traditional framework overlooks the diverse family forms and alienates female-headed households. Rather, families headed by lone mothers are chastened and labelled as broken.

pathological and degenerative. Despite constitutional guarantees of equality and justice, the state and society alienate them, deny them visibility, and absolve themselves of the responsibilities of protecting their citizenship rights. Nevertheless, for ages, single mothers, despite all hardships, have been defying patriarchal norms and are bringing up their children solely with little support available from their families, society, or the state. Rather, they are challenging the dominant and hegemonic male breadwinner and provider model. This work examines this active and empowered notion of motherhood or feminist and emancipatory mothering while focusing on how lone mothers are redefining and reshaping the socio-cultural norms to pave the social transformation through their maternal activism. With the increase in the number of female-headed households, this work recommends the need for an alternative approach to disrupt the dominant themes of victimhood, poverty, destitution, and neglect by deploying the axis of intersectionality. It suggests that the state needs to evolve a comprehensive empowerment framework to specifically recognize the entitlements of single mothers as citizens and take steps to advance their citizenship rights.

Rethinking Gifted Education James H. Borland, 2003-01-01 Gifted education is in a period of transition unlike any it has experienced in this generation. Thinkers within the field and without are questioning the practice of gifted education, the theoretical foundations on which this practice rests, and even the value and legitimacy of the concept of giftedness. This fresh and provocative volume contains essays by leading thinkers on gifted education and by writers outside the field who have examined it critically. Each author examines, reconsiders, and challenges the assumptions and beliefs underlying the theory and practice of gifted education, providing a roadmap to guide both current considerations of and future planning for gifted education programs.

Universities with a Social Purpose Kerry Shephard, V. Santhakumar, 2024-01-05 This book is a narrative of conversations between two professors with different backgrounds, academic disciplines, life experiences, and from different continents. It shows how their discourse has brought them to a single destination defined by a mutual interest in the social purposes of universities and a hope in common that their academic efforts will somehow do good in the world. The seventeen internationally agreed Sustainable Development Goals (SDGs) provide focus for aspirations and plans regarding sustainability, but notably the SDGs' targets and indicators rarely provide detailed accounts of who is expected to enact change. This book addresses the role of higher education in this context and explores the social purposes of universities and their relation to the Sustainable Development Goals. It presents an academic analysis of this complex situation based on insights from published literature on higher education and the personal but very different experiences of two professors with this shared interest.

Teaching Africa George J. Sefa Dei,2009-12-04 One is always struck by the brilliant work of George Sefa Dei but nothing so far has demonstrated his pedagogical leadership as much as the current project With a sense of purpose so pure and so thoroughly intellectual Dei shows why he must be credited with continuing the motivation and action for justice in education

He has produced in this powerful volume *Teaching Africa* the same type of close reasoning that has given him credibility in the anti racist struggle in education Sustaining the case for the democratization of education and the revising of the pedagogical method to include Indigenous knowledge are the twin pillars of his style A key component of this new science of pedagogy is the crusade against any form of hegemonic education where one group of people assumes that they are the masters of everyone else Whether this happens in South Africa Canada United States India Iraq Brazil or China Dei s insights suggest that this hegemony of education in pluralistic and multi ethnic societies is a false construction We live pre eminently in a world of co cultures not cultures and sub cultures and once we understand this difference we will have a better approach to education and equity in the human condition
