Office of the Federal Register,1987 A Military History of the Cold War, 1962-1991 Jonathan M. House,2020-09-24 Study of the Cold War all too often shows us the war that wasn't fought The reality of course is that many hot conflicts did occur some with the great powers weapons and approval others without It is this reality and this period of quasi war and semiconflict that Jonathan M House plumbs in *A Military History of the Cold War 1962 1991* a complex case study in the Clausewitzian relationship between policy and military force during a time of global upheaval and political realignment This volume opens a new perspective on three fraught decades of Cold War history revealing how the realities of time distance resources and military culture often constrained and diverted the inclinations or policies of world leaders In addition to the Vietnam War and nuclear confrontations between the USSR and the United States this period saw dozens of regional wars and insurgencies fought throughout Asia Africa and Latin America Cuba Pakistan Indonesia Israel Egypt and South Africa pursued their own goals in ways that drew the superpowers into regional disputes Even clashes ostensibly unrelated to the politics of East West confrontation such as the Nigerian Biafran conflict the Falklands Malvinas War and the Indonesian occupation of East Timor involved armed forces weapons and tactics developed for the larger conflict and thus come under House's scrutiny His study also takes up nontraditional or specialized aspects of the period including weapons of mass destruction civil military relations civil defense and control of domestic disorders The result is a single integrated survey and analysis of a complex period in geopolitical history which fills a significant gap in our knowledge of the organization logistics operations and tactics involved in conflict throughout the Cold War History of Strategic and Ballistic Missile Defense: Volume I Barry Leonard,2010-11 As part of a larger study of the strategic arms competition which developed after World War II between the U S and the U S S R this study of the two countries' strategies for air and ballistic missile defense addresses two broad subjects 1 How did each country approach the problem of defense against the threat from the air 2 Why did each country accent particular elements of an air defense strategy at various periods between 1945 and 1972 The first question concerns the means that

leaders chose for defense against an increasingly sophisticated offensive threat Includes several appendices of chronologies tables charts maps and notes *Annual Report* Maine. Board of Agriculture,1899 **A Photographic History of Amphibious Warfare 1939-1945** Simon Forty,Jonathan Forty,2023-04-06 contains a plethora of after action reports diagrams and text which makes the work a thorough and engaging study of amphibious landings during the war WWII History Magazine Amphibious operations have always been an important element of warfare but they reached their climax during the Second World War when they were carried out on a large scale in every theater of the conflict That is why this wide ranging highly illustrated history of amphibious warfare 1939 1945 by Simon and Jonathan Forty is of such value Their book gives graphic accounts of the main amphibious assaults launched by the major combatants in particular the British American German and Japanese not just large scale landings like those in North Africa Normandy the Philippines and Okinawa but also raids such as Dieppe and St Nazaire and evacuations like Dunkirk and Kerch The rapid development of amphibious tactics and equipment is an essential element of the story as are the vital roles played by the navies air forces armies and special forces in each complex combined operation There is also a section on amphibious operations that were planned but didn't happen such as the German invasion of Britain and the Italian and German operation against Malta

forces he also provides illuminating glimpses of Israeli and Japanese contributions to combined arms doctrine Expanding his insightful analysis of the world wars and the wars in Korea and Vietnam House also offers much new material focused on the post Vietnam period Throughout he analyzes such issues as command and control problems of highly centralized organizations the development of special operations forces advances in weapons technology including ballistic and anti ballistic missile systems the trade offs involved in using heavy versus light armed forces and the enduring obstacles to effective cooperation between air and land forces His strong critique of the air superiority propaganda that came out of the Gulf War is sure to spark some heated debates Rigorously comparative House s study addresses significant questions about how nations prepare for war learn or don t learn its harsh lessons and adapt to changing times and technologies Unique in the annals of the literature on warfare it will be the standard work on this subject for a long time to come
