**Building Ventilation** Mat Santamouris, Peter Wouters, 2006-06-01  
 Ensuring optimum ventilation performance is a vital part of building design. Prepared by recognized experts from Europe and the US and published in association with the International Energy Agency's Air Infiltration and Ventilation Centre (AIVC), this authoritative work provides organized, classified and evaluated information on advances in the key areas of building ventilation relevant to all building types. Complexities in airflow behaviour, climatic influences, occupancy patterns and pollutant emission characteristics make selecting the most appropriate ventilation strategy especially difficult. Recognizing such complexities, the editors bring together expertise on each key issue. From components to computer tools, this book offers detailed coverage on design, analysis and performance and is an important and comprehensive publication in this field. Building Ventilation will be an invaluable reference for professionals in the building services industry, architects, researchers, including postgraduate students studying building service engineering and HVAC, and anyone with a role in energy efficient building design.

**Education and Training in Indoor Air Sciences** Nadia Boschi, 2012-12-06  
 Many buildings fail to perform adequately, causing illness and productivity loss among the inhabitants. The growing impact of this problem on people and property values and the increasing litigation to which it gives rise clearly reveals the limitations in the piecemeal character of the current education of building and health professionals in addressing the relationship between a building and its occupants. Education and Training in Indoor Air Sciences introduces examples of existing educational programs that seek to bridge the gap between health and building sciences. The contributors, selected among architects, engineers, clinicians, physicists, psychologists and policymakers, discuss the design of a core curriculum for all those holding a degree within building design.

construction operation and maintenance investigation and all occupational environmental health and general practitioners  
The book also examines the obstacles to such a curriculum and ways to overcome them     NASA SP. ,1981     **FCC Record**
