Loewen, 2018-07-17 Every teacher every student of history every citizen should read this book It is both a refreshing antidote to what has passed for history in our educational system and a one volume education in itself Howard Zinn A new edition of the national bestseller and American Book Award winner with a new preface by the author Since its first publication in 1995 *Lies My Teacher Told Me* has become one of the most important and successful history books of our time Having sold nearly two million copies the book also won an American Book Award and the Oliver Cromwell Cox Award for Distinguished Anti Racist Scholarship and was heralded on the front page of the New York Times For this new edition Loewen has added a new preface that shows how inadequate history courses in high school help produce

adult Americans who think Donald Trump can solve their problems and calls out academic historians for abandoning the concept of truth in a misguided effort to be objective What started out as a survey of the twelve leading American history textbooks has ended up being what the San Francisco Chronicle calls an extremely convincing plea for truth in education In *Lies My Teacher Told Me* James W Loewen brings history alive in all its complexity and ambiguity Beginning with pre Columbian history and ranging over characters and events as diverse as Reconstruction Helen Keller the first Thanksgiving the My Lai massacre 9 11 and the Iraq War Loewen offers an eye opening critique of existing textbooks and a wonderful retelling of American history as it should and could be taught to American students *Mapping Latin America* Jordana Dym, Karl Offen, 2011-12-01 For many a map is nothing more than a tool used to determine the location or distribution of something a country a city or a natural resource But maps reveal much more to really read a map means to examine what it shows and what it doesn't and to ask who made it why and for whom The contributors to this new volume ask these sorts of questions about maps of Latin America and in doing so illuminate the ways cartography has helped to shape this region from the Rio Grande to Patagonia In *Mapping Latin America* Jordana Dym and Karl Offen bring together scholars from a wide range of disciplines to examine and interpret more than five centuries of Latin American maps Individual chapters take on maps of every size and scale and from a wide variety of mapmakers from the hand drawn maps of Native Americans to those by famed explorers such as Alexander von Humboldt to those produced in today's newspapers and magazines for the general public The maps collected here and the interpretations that accompany them provide an excellent source to help readers better understand how Latin American countries regions provinces and municipalities came to be defined measured organized occupied settled disputed and understood that is how they came to have specific meanings to specific people at specific moments in time The first book to deal with the broad sweep of mapping activities across Latin America this lavishly illustrated volume will be required reading for students and scholars of geography and Latin American history and anyone interested in understanding the significance of maps in human cultures and societies **Library of Congress Information Bulletin**, 1996 **Princeton Alumni Weekly**, 1992 *Monthly Catalogue, United States Public Documents*, 1992-11

Sacred and Profane in Chaucer and Late Medieval Literature Will Robins, 2010-01-01 Literary depictions of the sacred and the secular from the Middle Ages are representative of the era's widely held cultural understandings related to religion and the nature of lived experience Using late Medieval English literature including some of Chaucer's writings these essays do not try to define a secular realm distinct and separate from the divine or religious but instead analyze intersections of the sacred and the profane suggesting that these two categories are mutually constitutive rather than antithetical With essays by former students of John V Fleming the collection pays tribute to the Princeton University professor emeritus through wide ranging scholarship and literary criticism Including reflections on depictions of Bathsheba Troilus and Criseyde the Legend of Good Women Chaucer's Pardoner and Margery Kempe these essays focus on literature while ranging into

history philosophy and the visual arts Taken together the work suggests that the domain of the sacred as perceived in the Middle Ages can variously be seen as having a hierarchical or a complementary relationship to the things of this world
