### **Common Sense in Early 18th-Century British Literature and Culture**

Christoph Henke, 2014-10-14 While the popular talk of English common sense in the eighteenth century might seem a by-product of familiar Enlightenment discourses of rationalism and empiricism this book argues that terms such as common sense or good sense are not simply synonyms of applied reason On the contrary the discourse of common sense is shaped by a defensive impulse against the totalizing intellectual regimes of the Enlightenment and the cultural climate of change they promote in order to contain the unbounded discursive proliferation of modern learning Hence common sense discourse has a vital regulatory function in cultural negotiations of political and intellectual change in eighteenth century Britain against the backdrop of patriotic national self concepts This study discusses early eighteenth century common sense in four broad complexes as to its discursive functions that are ethical which at that time implies aesthetic as well transgressive as a corrective political in patriotic constructs of the nation and repressive of otherness The selection of texts in this study strikes a balance between dominant literary culture Swift Pope Defoe Fielding Johnson and the periphery such as pamphlets and magazine essays satiric poems and patriotic songs
