Traditional Neutrality Revisited Elizabeth Chadwick,2021-11-01 This volume explores the extent to which frameworks of traditional neutrality might remain useful in modern contexts of peace and war notwithstanding the technical prohibition of war in the Charter of the United Nations Traditional neutrality constituted a system through which non belligerent states could remain at peace with warring states and thereby avoid attack and continue peacetime trading relations The essays here collected deal with the rules of neutrality as they had developed and operated generally by the outbreak of World War 1 those variations in and alternatives to traditional neutrality which arose in the aftermath of World War 1 and particular aspects of the legacy of neutrality which continue to survive in the post 1945 era It is argued that the operable rules of traditional neutrality foundered in the face of industrialized warfare but that the retreat from the logic of neutrality in the modern era has been premature [Bibliographic Guide to Art and Architecture](#) New York Public Library.

European International Law Traditions Peter Hilpold, 2020-11-20 International Law is usually considered at least initially to be a unitary legal order that is not subject to different national approaches Ex definition it should be an order that transcends the national and one that merges national perspectives into a higher understanding of law It gains broad recognition precisely because it gives expression to a common consensus transcending national positions The reality however is quite different Individual countries approaches to International Law and the meanings attached to different concepts often diverge considerably The result is a lack of comprehension that can ultimately lead to outright conflicts In this book several renowned international lawyers engage in an enquiry directed at sorting out how different European nations have contributed to the development of International Law and how various national approaches to International Law differ In doing so their goal is to promote a better understanding of theory and practice in International Law

Tradition and Change in American Party Politics Joyce Gelb, Marian Lief Palley, 1975 The Break-Up of Britain Tom Nairn, 2021-06-22 The classic text with a new introduction by Anthony Barnett In this classic text first published in 1977 Tom Nairn memorably depicts the slow foundering of the United Kingdom on the rocks of constitutional anachronism its fall from empire and the gathering force of civic nationalism Rich in comparisons between the nationalisms of the British Isles and those of the wider world The Break Up of Britain concludes by reflecting on the Janus faced nature of national identity Postscripts from the Thatcher and New Labour years trace the political strategies whose upshot accelerated the demise of a British order they were intended to serve As a second Scottish independence referendum beckons a new introduction by openDemocracy's Anthony Barnett underlines the book's enduring relevance **Structure and Dissolution in English Writing, 1910-1920** Stuart Sillars, 2016-07-27 This book explores key texts Howards End The Rainbow and the poetry of Owen Sassoon and Edward Thomas to show the mingled continuation and rejection of convention as their characteristic achievement exploring features often seen as failures It also discusses the writing's increasing concern with the inadequacies of language seeing it within the frame of contemporary society and deconstructive theory and attempting to locate them in relation to high Modernism Paths to Development in Asia Tuong Vu, 2010-03-22 Why have some states in the developing world been more successful at facilitating industrialization than others Challenging theories that privilege industrial policy and colonial legacies this book focuses on state structure and the politics of state formation arguing that a cohesive state structure is as important to developmental success as effective industrial policy Based on a comparison of six Asian cases including both capitalist and socialist states with varying structural cohesion Tuong Vu proves that it is state formation politics rather than colonial legacies that have had decisive and lasting impacts on the structures of emerging states His cross national comparison of South Korea Vietnam Republican and Maoist China and Sukarno's and Suharto's Indonesia which is augmented by in depth analyses of state formation processes in Vietnam and Indonesia is an important contribution to understanding the dynamics of state formation and economic development in Asia
