## **1945 The War That Never Ended:**

Poisoned Peace Gregor Dallas, 2005 This book recreates the seismic shifts that concluded the Second World War and their lasting impact on the political landscape of Europe There was no real peace settlement in 1945 and the shape of Europe was determined simply by military force dividing it into two halves which did not correspond to geography culture or previous history The book opens in Berlin on the day of Hitler s suicide where life such as it existed continued on the roofs in the attics in the streets ruins and cellars of the city We live with the armies in the field their movements determined by the cycle of seasons and with civilians particularly in booming wartime Washington bombed London liberated Paris annihilated Warsaw doomed Belin and Moscow gripped by poverty and secret terror Adapted from back cover **1945** Gregor Dallas, 2005-01-01 A history of the end of World War II that focuses on diplomatic mistakes military accidents and interactions of world leaders **National Pasts in Europe and East Asia** Peter W. Preston, 2012-07-26 With the rise of industrial capitalism in Europe and the related imposition of colonial rule in much of East Asia both Europe and East Asia have intertwined histories that continue to shape their political thinking and political decision making The contemporary interactions of the two regions now once again major trading partners will both depend upon and facilitate deeper understandings of their respective sets of national pasts This book compares national pasts as well as the current processes of change taking place in Europe and East Asia including the dynamics of the European Union in Europe and the re emergence of the historical centre of China in East Asia It argues that as the change unfolds in the economic social and political fields the various national pasts embedded with the polities of the two regions will also need to be revisited and reworked This book makes an invaluable contribution to research on comparative politics as well as studies on South East Asia and Europe **British Art in the Nuclear Age** Catherine Jolivette, 2017-07-05 Rooted in the study of objects British Art in the Nuclear Age addresses the role of art and visual culture in discourses surrounding nuclear science and technology atomic power and nuclear warfare in Cold War Britain Examining both the fears and hopes for the future that attended the advances of the nuclear age nine original essays explore the contributions of British born and gr rtists in the areas of sculpture textile and applied design painting drawing photo journalism and exhibition display Artists discussed include Francis Bacon John Bratby Lynn Chadwick Prunella Clough Naum Gabo Barbara Hepworth Peter Lanyon Henry Moore Eduardo Paolozzi Peter Laszlo Peri Isabel Rawsthorne Alan Reynolds Colin Self Graham Sutherland Feliks Topolski and John Tunnard Also under discussion is new archival material from Picture Post magazine and the Festival of Britain Far from insular in its concerns this volume draws upon cross cultural dialogues between British and European artists and the relationship between Britain and America to engage with an interdisciplinary art history that will also prove useful to students and researchers in a variety of fields including modern European history political science the history of design anthropology and media studies The Globalization of Corporate Governance Alan Dignam, Michael Galanis, 2016-03-09

The process of economic globalization as product and capital markets have become increasingly integrated since WWII has placed huge and it is argued by some irresistible pressures on the world's insider stakeholder oriented corporate governance systems. Insider corporate governance systems in countries such as Germany so the argument goes should converge or be transformed by global product and capital market pressures to the superior shareholder oriented outsider corporate governance model prevalent in the UK and the US. What these pressures from globalization are how they manifest themselves whether they are likely to cause such a convergence transformation and whether these pressures will continue lie at the heart of the exploration in this volume. *The Globalization of Corporate Governance* provides a detailed analysis of the evolution of the key corporate governance systems in the UK the US and Germany from the perspective of the development of economic globalization. As such it is a valuable resource for those interested in how economic and legal reforms interact to produce change within corporate governance systems. **The Age of Global Economic Crises** Juan Manuel

Matés-Barco, María Vázquez-Fariñas, 2023-06-02 The frequency and repetition of economic crises over the last hundred years demands an analysis that allows us to discover the root causes of these situations and the problems they have generated in the world economy. This book investigates these cycles throughout the 20th and the early 21st century. Economic crises can be the result of political or military conflict but they have also been the consequence of bad practices unbridled speculation excessive greed or poor management by the rulers and leaders of nations. The contributors to this volume analyse the causes and consequences of economic crises from the Great Depression to the present day incorporating post World War II reconstruction the oil crisis of the 1970s and the lost Latin American decade of the 1980s among others. This longer term view allows the book to provide insights into understanding economic cycles in the long run not just at a specific moment in time and the ways in which they have spread internationally. This historical analysis also helps to shed new light on the current Covid impacted situation as it provides another reading of the main crises of recent centuries and their causes and consequences as well as the measures and policies adopted to overcome the difficulties. This book will be of significant interest to readers in economic history business history politics and economics and history more broadly. **2005** Massimo Mastrogregori, 2009-12-22 Annually published since 1930 the *International Bibliography of Historical Sciences* IBOHS is an international bibliography of the most important historical monographs and periodical articles published throughout the world which deal with history from the earliest to the most recent times. The bibliography contains a geographical index and indexes of persons and authors. **World War Two: Behind Closed Doors** Laurence Rees, 2012-04-24 When do you think the Second World War ended? If the end of the war was supposed to have brought freedom to countries that suffered under

Nazi occupation then for millions it did not really end until the fall of Communism In the summer of 1945 many of the countries in Eastern Europe simply swapped the rule of one tyrant Adolf Hitler for that of another Joseph Stalin Why this happened has remained one of the most troubling questions of the entire conflict and is at the heart of Laurence Rees dramatic book *In World War II Behind Closed Doors* Rees provides an intimate behind the scenes history of the West's dealings with Joseph Stalin an account which uses material only available since the opening of archives in the East as well as new testimony from witnesses from the period An enthralling mix of high politics and the often heart rending personal experiences of those on the ground it will make you rethink what you believe about World War II

*Stalin's War* Sean McMeekin, 2021-04-08 SHORTLISTED FOR THE DUKE OF WELLINGTON MEDAL AND THE GILDER LEHRMAN PRIZE FOR MILITARY HISTORY 2022 A terrific read McMeekin is a superb writer David Aaronovitch The Times Gripping authoritative accessible and always bracingly revisionist Simon Sebag Montefiore Impressive A new look at the conflict which poses new questions and provides new and often unexpected answers to the old ones Serhii Plokhy The Guardian In this remarkable ground breaking new book Sean McMeekin marks a generational shift in our view of Stalin as an ally in the Second World War Stalin s only difference from Hitler he argues was that he was a successful murderous predator With Hitler dead and the Third Reich in ruins Stalin created an immense new Communist empire Among his holdings were Czechoslovakia and Poland the fates of which had first set the West against the Nazis and of course China and North Korea the ramifications of which we still live with today Until Barbarossa wrought a public relations miracle turning him into a plucky ally of the West Stalin had murdered millions

subverted every norm of international behaviour invaded as many countries as Hitler had and taken great swathes of territory he would continue to keep In the larger sense the global conflict grew out of not only German and Japanese aggression but Stalin's manoeuvrings orchestrated to provoke wars of attrition between the capitalist powers in Europe and in Asia Throughout the war Stalin chose to do only what would benefit his own regime not even aiding in the effort against Japan until the conflict's last weeks Above all Stalin's War uncovers the shocking details of how the US government to the detriment of itself and its other allies fuelled Stalin's war machine blindly agreeing to every Soviet demand right down to agents supplying details of the atomic bomb

**Entrepreneurship Research** Vanessa Ratten, 2023-08-22 This book explores how the COVID 19 pandemic has changed entrepreneurial business practices and policies The role of digitalization and de internationalisation as part of entrepreneurial business thinking is discussed in this book as a way of keeping track with new research avenues Due to the fundamental way the COVID 19 pandemic shocked and surprised entrepreneurs it becomes important to develop new business patterns The discussion in this book centres on the question how has business practices changed in the post COVID 19 era and what needs to be learnt Each chapter in this edited book presents a different way to understand these changes and make sense of alterations in the global business environment thereby ensuring that business academics policy makers and practitioners are kept abreast of changes Whilst there have been books on the COVID 19 pandemic this book goes a step further by presenting new research into the post COVID 19 pandemic era that is of a recent nature This means it is amongst the first edited book to focus on patterns in terms of business marketing and management that have an entrepreneurial nature This is helpful to gain a better nuanced and detailed understanding about the implications that are ongoing and future orientated arising from the COVID 19 pandemic

*Flashpoint* Andrew Murray, 1997 Offering a terrifying but very possible scenario of a world on the edge of disaster this work suggests that World War III has become a real threat Germany and Japan have gathered military strength the US has retrenched to make way for economic globalization the UN is widely discredited and NATO has lost its way In their place the bodies controlling the global economic order hold a growing authority in an increasingly unstable world In this book the author sets out to demonstrate that World Wars I and II were both preceded by trade disputes minor conflicts in peripheral zones and vain attempts to reconcile competing interests peacefully He argues that history is repeating itself and that the changing balance between the Great Powers after the collapse of the USSR have set the conditions for new conflict He maintains that there is a very real risk that the next flashpoint will ignite to create World War III

*Adapting Superman* John Darowski, 2021-05-29 Almost immediately after his first appearance in comic books in June 1938 Superman began to be adapted to other media The subsequent decades have brought even more adaptations of the Man of Steel his friends family and enemies in film television comic strip radio novels video games and even a musical The rapid adaptation of the Man of Steel occurred before the character and storyworld were fully developed on the comic book page allowing the adaptations an unprecedented level of

freedom and adaptability The essays in this collection provide specific insight into the practice of adapting Superman from comic books to other media and cultural contexts through a variety of methods including social economic and political contexts Authors touch on subjects such as the different international receptions to the characters the evolution of both Clark Kent s character and Superman s powers the importance of the radio how the adaptations interact with issues such as racism and Cold War paranoia and the role of fan fiction in the franchise By applying a wide range of critical approaches to adaption and Superman this collection offers new insights into our popular entertainment and our cultural history *Collisions*

Michael Kimmage,2024 On February 24 2022 Vladimir Putin launched a massive invasion of Ukraine setting in motion changes that have been felt around the globe Collision is the story of this war s origins It begins in 2008 when Barack Obama came to power in the United States and Dmitry Medvedev came to power in Russia a period of optimism and new beginnings It then traces a steady parting of the ways between the United States and Russia from the return of a newly aggressive Putin to the Kremlin in 2012 to the outbreak of a revolution in Ukraine and the subsequent Russian annexation of Crimea and invasion of Eastern Ukraine

**Arsenal of World War II** Paul A. C. Koistinen,2004 Prolific munitions production keyed America s triumph in World War II but so did the complex economic controls needed to sustain that production Artillery tanks planes ships trucks and weaponry of every kind were constantly demanded by the military and readily supplied by American business While that relationship was remarkably successful in helping the U S win the war it also raised troubling issues about wartime economies that have never been fully resolved Paul Koistinen s fourth installment of a monumental five volume series on the political economy of American warfare focuses on the mobilization of national resources for a truly global war Koistinen comprehensively analyzes all relevant aspects of the World War II economy from 1940 through 1945 describing the nation s struggle to establish effective control over industrial supply and military demand and revealing the growing partnership between the corporate community and the armed services Koistinen traces the evolution of federal agencies mobilizing for war including the National Defense Advisory Commission the Office of Production Management and the Supply Priorities and Allocation Board and then focuses on the work of the War Production Board from 1942 1945 As the war progressed the WPB and related agencies oversaw the military s supply and procurement systems stabilized the economy while financing the war closely monitored labor relations and controlled the shipping and rationing of fuel and food In chronicling American mobilization Koistinen reveals how representatives of industry and the armed services expanded upon their growing prewar ties to shape policies for harnessing the economy and how federal agencies were subsequently riven with dissension as New Deal reformers and anti New Deal corporate elements battled for control over mobilization itself As the armed services emerged as the principal customers of a command economy the military industrial nexus consolidated its power and ultimately succeeded in bending the reformers to its will The product of exhaustive archival research Arsenal of World War II shows that mobilization meant more than simply harnessing the economy for war it also

involved struggles for power and position among a great many interest groups and ideologies Nearly two decades in the making it provides an ambitious and enormously insightful overview of the emergence of the military industrial economy one that still resonates today as America continues to wage wars around the globe
