1950s Plastics Design Everyday Elegance:

Everyday Elegance Holly Wahlberg, 1994 **1950s Plastics Design** Holly Wahlberg, 1999-01 This newly revised book presents a factual discussion of the wide variety of colorful and popular plastics housewares made between 1945 and 1960. Wonderful advertisements that announced to the world what new designs were possible with this experimental material are shown. Many color photographs of today's highly collectible plastics objects demonstrate the variety of colors and useful forms that were manufactured. Vinyl, Lucite, Melamine, and Formica to name but a few have become common household names since their introduction in this era. Here are chairs, tables, dishes, cups, radios, lampshades, draperies, cooking containers, car interiors, floors, and more, all made of plastics. A very useful Collectors Guide providing information about all the major manufacturers and trade names is organized by product types for easy reference. For 1950s families with small budgets and small homes, the magic of plastics chemistry promised unprecedented practical benefits mingled with the glamour and drama of sleek modern forms. At last, plastics had stepped out of the kitchen and bath to enter almost every area of home design. In a single decade, plastics had won favor among an astonishingly diverse group, from dime-store shoppers and young marrieds to gifted designers and prestigious proponents of affordable good design. In tracing plastic's whirlwind rise from wartime sham to postwar miracle, this book explores not only the history of an important segment of 1950s collectibles but also the history of a culture redefining its way of life.

It will provide the basic behaviors in what to consider when designing plastic products to meet performance and cost requirements. Important aspects are presented, such as understanding the advantages of different shapes and how they influence designs. Information is concise, comprehensive, and practical. Review includes designing with plastics based on material and process behaviors. As designing with any materials, plastic, steel, aluminum, wood, etc., it is important to know their behaviors in order to maximize product performance to cost efficiency. Examples of many different designed products are reviewed. They range from toys to medical devices to cars to boats to underwater devices to containers to springs to pipes to buildings to aircraft to spacecraft. The reader's product to be designed can directly or indirectly be related to product design reviews in the book. Important are behaviors associated and interrelated with plastic materials: thermoplastics, thermosets, elastomers, reinforced plastics, etc., and fabricating processes: extrusion, injection molding, blow molding, forming, foaming, rotational molding, etc. They are presented so that the technical or non-technical reader can readily understand the interrelationships.

As Long as It's Pink Penny Sparke,1995 Why do car manufacturers use paisley interiors to sell their products to women and does it work Is women s taste really different to men s Who says so And does it matter In this highly original book Penny Sparke uses familiar objects of our everyday environments furniture cars and domestic appliances and interiors to look at how taste has become a gendered issue in our culture Ever since the industrial revolution the cluttered interior has been associated with femininity while the minimal forms of modernist architecture have acted as markers of a masculine aesthetic As Long as It s Pink argues that taste has been a quality assigned to women while design is a man made construction which has taken aesthetic authority away from women This in turn has succeeded in trivializing and marginalizing women s material culture Ranging across histories of domesticity feminine consumption and home making
