*Anonymous Art at Auction* Anne-Sophie V. Radermecker,2021-05-25 Working with a data set accounting for 13 000 auction sales results Anne Sophie V Radermecker explores what contemporary buyers value when purchasing paintings of unknown or uncertain authorship and which variables influence price formation mechanisms in this market segment The principle finding of this book is not only that historical names matter in the art market but so do all other alternative identification strategies that art market players use to label anonymous paintings Indirect names provisional names and spatiotemporal designations function as substitutes for real names that simulate identities create ex post stories around the artworks offered for sale and consequently reduce information asymmetry about an artist s identity with at time quite unexpected effects on price      **British Union-catalogue of Periodicals** ,1964 The British union catalogue of periodicals BUCOP in its new form is concerned with the recording of new periodical titles for the period in and after 1960      **Histories of Transnational Crime** Gerben Bruinsma,2015-05-13 Histories of Transnational Crime provides a broad historical framework for understanding the developments in research of transnational crime over the centuries This volume provides examples of transnational crime and places them in a broad historical context which has so far been missing from this field of study The contributions to this comprehensive volume explore the causes and historical precursors of six main types of transnational crime piracy human smuggling arms trafficking drug trafficking art and antique trafficking corporate crime The historical contributions demonstrate that transnational crime is not a novel phenomenon of recent globalization and that beyond organized crime groups powerful individuals governments and business corporations have been heavily involved Through a systematic historical and contextual analysis of these types of transnational crime the contributions to this volume provide a fundamental understanding of why and how various forms of transnational crime are still present in the contemporary world In the past two decades the study of transnational crime has developed from a subset of the study of organized crime to its own recognized field of study covering distinct societal threats and requiring a particular approach
