Social Science Quotations Robert Merton,2018-04-27 Social Science Quotations has been prepared to meet an evident unmet need in the literature of the social sciences Writings on the lives and theories of individual social scientists abound but there has been no fully documented collection of memorable quotations from the social sciences as a whole The frequent use of quotations in scientific as well as literary writings that are mere summaries or paraphrases typically fail to capture the full force of formulations that have made quotations memorable This book of quotations invites the further reading or rereading of the original texts beyond the quotations themselves Sills and Merton draw extensively upon the writings that constitute the historical core of the social sciences and social thought those works with staying power often described as the classical texts Many quotations have been drawn from these classical texts because the quotations contain memorable ideas memorably expressed Both consequential and memorable these words have been quoted over the generations entering into the collective memory of social scientists everywhere and at times diffusing into popular thought and into the vernacular as well This book is useful to social scientists anthropologists economists historians political scientists psychiatrists psychologists sociologists and statisticians and for all who want to learn or verify memorable formulations and phrases concerning social thought and social theories It is particularly useful for graduate students taking courses that examine the history of their discipline **The Encyclopædia Britannica** ,1893 *Federal Republic of Germany, a Country Study* Richard F. Encyclopaedia Britannica Thomas Spencer Baynes,1878 **Chemistry in America 1876-1976** A. Thackray,J.L.
 Sturchio,P.T. Carroll,R.F Bud,2012-12-06 This study is an outgrowth of our interest in the history of modern chemistry The
 paucity of reliable quantitative knowledge about past science was brought home forcibly to us when we undertook a research
 seminar in the comparative history of modern chemistry in Britain Germany and the United States That seminar which took
 place at the University of Pennsylvania in the spring of 1975 was paralleled by one devoted to the work of the Annales School
 The two seminars together catalyzed the attempt to construct historical measures of change in aspects of one science or
 chemical indicators The present volume displays our results Perhaps our labors may be most usefully compared with the
 work of those students of medieval science who devote their best efforts to the establishment of texts Only when acceptable
 texts have been constructed from fragmentary and corrupt sources can scholars move on to the more satisfying business of
 making history So too in the modern period a necessary preliminary to the full history of any scientific profession is the
 establishing of reliable quantitative information in the form of statistical series This volume does not offer history Instead it
 provides certain element indicators that may be useful to individuals interested in the history of American chemistry and
 chemical industry and suggestive for policy *Encyclopedia of Library and Information Science* Allen Kent,1987-02-26 The
 Encyclopedia of Library and Information Science provides an outstanding resource in 33 published volumes with 2 helpful
 indexes This thorough reference set written by 1300 eminent international experts offers librarians information computer
 scientists bibliographers documentalists systems analysts and students convenient access to the techniques and tools of both
 library and information science Impeccably researched cross referenced alphabetized by subject and generously illustrated
 the Encyclopedia of Library and Information Science integrates the essential theoretical and practical information
 accumulating in this rapidly growing field *Index to the British Catalogue of Books* ,1884 **The Mazruiana Collection**
Revisited Ali Al'Amin Mazrui,2005 Consists of 650 annotated entries covering Mazrui's books dissertations edited works
 about him major essays in books academic journals and conference papers This work contains essays including pamphlets
 magazine and newspaper articles and audio visual recordings **Publisher's Monthly** ,1991 **"The" Encyclopaedia**
