Birrer,2012-12-06 Now more than ever Family Medicine is alive and well in the United States The base of this medical specialty has traditionally been in the smaller cities suburban communities and rural areas of this country Over the past decade however there has been a resurgence of interest in primary care in our major metropolitan areas as a solution to the high tech subspecialty pace of the tertiary care environment A rebirth of urban family medicine has

accompanied these pioneering efforts To date the accomplishments are substantial and the prospects are bright There is still a long way to go and there are a significant number of hurdles to cross Although diseases are generally the same wherever you are their effects as illness on the individual and the family are strongly influenced by the environment and social milieu Urban families have distinctive and diverse problems cultural economic and ethnic Training programs situated in the large cities must recognize these issues and include special emphasis on the situations that the family physician is likely to encounter during and after his training There is very little research literature on the background and nature of special urban problems and these areas are the subject of several chapters of this long overdue volume devoted specifically to urban family medicine Dr Birrer has persuaded true experts to share their knowledge with the reader Health, United States Office of Public Health and Science, Health and Human Services Department, 2015-05-20 This is the 37th annual report prepared for the Secretary of the Department of Health and Human Services by the Centers for Disease Control and Prevention's National Center for Health Statistics The report includes a compilation of health data from state and federal health agencies and the private sector Health United States 2013 features 135 tables on key health measures through 2012 from a number of sources within the federal government and in the private sector The tables cover a range of topics including birth rates and reproductive health life expectancy and leading causes of death health risk behaviors health care utilization and insurance coverage and health expenditures The Health United States series presents an annual overview of national trends in health statistics The report contains a Chartbook that assesses the nation's health by presenting trends and current information on selected measures of morbidity mortality health care utilization and access health risk factors prevention health insurance and personal health care expenditures This year's Chartbook includes a Special Feature on Prescription Drugs that contains an array of statistics The report also contains 135 Trend Tables organized around four major subject areas health status and determinants health care utilization health care resources and health care expenditures Keywords Antibiotics pain relievers hydrocortisone drug poisoning acute pain chronic pain American Indian Alaska Native Hispanics White Caucasian prescription drug spending Affordable Care Act ACA insurance private health insurance private health insurance co pays co pay spending out of pocket spending Medicare Medicaid Medicare Part D physicians dentists nurses nurse practitioners cholesterol lowering drugs cardiovascular agents high blood pressure diabetes heart disease kidney disease anti acid reflux drugs blood clots depression and related disorders Antidepressants Anticoagulants Analgesics Central nervous system stimulants attention deficit disorder ADD ADHD Black origin Mexican origin Influenza Influenza vaccinations Health care visits community hospitals nursing homes Life expectancy Motor Vehicle related death rates automobile deaths teenage childbearing teenage child bearing cigarette smoking obesity Obesity Adult Obesity Child Obesity Overweight Vaccinations Emergency Department use Emergency Department Visits Dental Care Personal Healthcare Spending personal healthcare spending personal health care spending Personal Health care spending long term treatment long term treatment of chronic

The Impaired Physician Stephen Scheiber, 2013-11-11 The Oath of Hippocrates administered to generations of physicians as they embark on their profession begins I will look upon him who shall have taught me this art even as one of my parents I will share my substance with him and I will supply his necessities if he be in need Despite that solemn promise we have too often ignored or neglected the physician in trouble Even if we could put aside the human concerns of one physician for an impaired colleague can our profession truly permit that we must concede that our society can ill afford it This book which has been assembled and edited by Stephen C Scheiber and Brian B Doyle may be a lifesaver for the doctor in trouble and will be a health saver for the population of our country A land which decried the lack of physicians a quarter century ago and spent the vast resources to double the number of graduates in medicine cannot permit a tenth of all doctors to be out of commission That would be a large and for the most part preventable addition to the cost of health care in America In this book Scheiber and Doyle have gathered the expertise of many psychiatrists who are knowledgeable about the impaired physician
