Transformational CEOs Kimio Kase, Francisco J. Sáez-Martínez, Hernán Riquelme, 2005-01-01 It is hard to imagine a more enticing topic why some Japanese firms succeeded in the 1990s despite an

economy that failed The answers are both common sense operational effectiveness and CEO leadership and Japan specific break with traditions The lessons about leadership in particular have wider relevance for leaders managers consultants and academics Andrew Campbell Ashridge Strategic Management Centre UK Transformational CEOs questions why some Japanese firms succeeded in the 1990s despite an economy that failed regardless of the burst of the bubble economy a number of Japanese companies have maintained or extended their international leadership in particular sectors The authors argue that whilst some of the reasons for successes are plain common sense operational effectiveness and superior CEO leadership some are Japan specific and point to a break with traditional leadership rationale

Light Vehicle Tyres Neil Mullineux, 2004 The tyre industry is the largest single rubber manufacturing industry in the world The high performance demanded of tyres has led to extensive research and development in this field and constant innovation This report takes an overview of the latest technology combined with the market situation worldwide Three large companies Bridgestone Goodyear and Michelin now dominate the world tyre market with a share of about 56 per cent There then follow four mid sized companies which have about 18 per cent of the world market Continental Sumitomo Pirelli and Yokohama with a combined share of 17.6 per cent In total eleven companies account for 81.6 per cent of the world market Even though the largest companies have a turnover well in excess of USD10bn they remain largely specialist tyre manufacturers Many of the smaller companies also concentrate almost exclusively on tyres However the medium sized companies are diversifying away from tyre manufacturing Unusually if not uniquely in the automotive components industry the tyre manufacturers only sell a minority of their output to OEMs component is the size of the replacement market or aftermarket three quarters of road tyres are sold as replacement tyres and only one quarter as original equipment The big three tyre manufacturers dominate the OE market but other large regional players also have a share particularly in Europe Worldwide the replacement tyre market for light vehicles represents about 714m tyres The replacement tyre market is certainly more profitable for the tyre manufacturers but it has distinct problems The general problems of slow growth and market maturity are exacerbated by cyclical growth in supply to OEMs Despite the poor profitability of sales to OE customers and even though the replacement market represents over 70 per cent of the passenger car tyre industry's sales tyre makers profitability is also cyclical The replacement market is a relatively profitable sector of the overall tyre market but it cannot compensate for the vagaries of the OE market A traditional indication of market maturity is continual pricing pressure in the market small competitors to keep continual pressure on prices In broad terms a tyre which cost USD69.90 in 1979 sold for USD41.02 in 2003 The major companies within the tyre industry are all constrained by the laws of economics and subject to similar commercial pressures In very broad terms the cost of tyre manufacture breaks into three parts raw materials labour and fixed costs The tyre industry has high fixed costs making it extremely difficult to improve returns unless costs are cut or market share gained Raw materials typically represent 25 per cent of the selling price of a car tyre Labour costs represent about 30 per cent of

sales and this has led to a move for manufacture in lower labour cost countries This has been helped by relatively low transportation costs for the inter regional movement of tyres about USD1 2 for a passenger tyre In the last decade all manufacturers have tried to increase productivity in existing o0perations in order to become low cost producers The continuing drive for improved productivity has resulted in excess capacity in many areas and product sectors than demand There is a close relationship between aggregate supply and profitability for individual tyre companies As a result there have been gradual moves towards consolidation Before 1985 a dozen large companies dominated the world tyre market but after a rapid series of mergers and acquisitions seven companies emerged with three quarters of the market Marketing Michelin Stephen L. Harp,2001-12-14 Harp uses the familiar figure of Bibendum and the promotional campaigns designed around him to analyze the cultural assumptions of belle epoque France including representations of gender race and class He also considers Michelin s efforts to promote automobile tourism in France and Europe through its famous Red Guide first introduced in 1900 noting that in the aftermath of World War I the company sold tour guides to the battlefields of the Western Front and favourably positioned France s participation in the war as purely defensive and unavoidable Throughout this period the company successfully identified the name of Michelin with many aspects of French society from cuisine and local culture to nationalism and colonialism **Foreign Direct Investment in the United States** ,1991 *Foreign Direct Investment in the United States* United States.
