Hwang,2012-12-06 One of the strongest trends in the design and manufacture of modern electronics packages and assemblies is the utilization of surface mount technology as a replacement for through hole tech nology The mounting of electronic devices and components onto the surface of a printed wiring board or other substrate offers many advantages over inserting the leads of devices or components into holes From the engineering viewpoint much higher lead counts with shorter wire and interconnection lengths can be accommo dated This is critical in high performance modern electronics packaging From the manufacturing viewpoint the application of automated assembly and robotics is much more adaptable to high lead count surface mounted devices and components Indeed the insertion of high lead count parts into fine holes on a substrate might often be nearly impossible Yet in spite of these surface mounting advantages the utilization of surface mount technology is often a problem primarily due to soldering problems The most practical soldering methods use solder pastes whose intricacies are frequently not understood by most of those involved in the engineering and manufacture of electronics assemblies This publication is the first book devoted exclusively to explanations of the broad combination of the chemical metallurgical and rheological principles that are critical to the successful use of solder pastes The critical relation ships between these characteristics are clearly explained and pre sented In this excellent presentation Dr Hwang highlights three impor tant areas of solder paste technology **Handbook of Adhesives and Sealants** Philippe Cognard,2005-07-14 Handbook of Adhesives and Sealants is the most comprehensive Adhesives and Sealants Handbook ever published with the cooperation of around 35 authors from all over the world each one a specialist in their field It will include 80 chapters dealing with general information theory of bonding and sealing design of bonding parts technical characteristics chemistry types of adhesives application equipment controls standards etc Industrial applications such as automotive aeronautics building and civil engineering electronics packaging wood furniture metals plastics and composites textiles footwear etc Over 1 000 real life examples illustrate the do s and don ts of using adhesives Every scientific and technical issue concerning every chemical type in every industry Designed to help solve problems quickly the content is structured to allow readers to navigate this comprehensive resource in 4 different ways Surface Mount and Related Technologies Gerald L.
