Puente,Robert J. McCaffrey,2013-11-11 The growth of clinical neuropsychology has been unprecedented This growth has been oriented more toward the provision of than toward the foundation for services Thus while a greater number of psychologists are performing a greater number of neuropsychological procedures there seems to us an uneven parallel growth between these services and the empirical foundations for them It should come to no one s surprise that increasingly aggressive attacks on the field have been leveled Despite these attacks clinical neuropsychology con tinues to enjoy exceptional growth within psychology and acceptance by other health practitioners insurance companies legislators judges juries and above all consumers of our services Growth without self reflection is a dangerous enterprise as is growth without directions We find it disconcerting that existing and limited self analysis has assumed that neuropsychological dysfunction is immune to the same variables that affect psychological dysfunction Some attention has been paid to the most obvious ones such as age but all others have been ignored and or misunderstood This neglect has spawned a body of knowledge replete with questionable data and unfounded conclusions Hence it is surprising that clinical neuropsychologists consider themselves to be more scientifically sound than their regular clinical counterparts *Magnetic Resonance in Multiple Sclerosis* David H. Miller,1997-07-17 Magnetic resonance MR imaging and spectroscopy are powerful tools for demonstrating and monitoring pathological processes of the brain and spinal cord Multiple sclerosis MS a common and as yet incurable disease of the brain and spinal cord is being studied intensively using these techniques They perform a major role in facilitating the diagnosis understanding the mechanisms of symptoms and monitoring the effect of new treatments Written by experts in the field this extensively illustrated text provides a comprehensive review of the benefits and limitations of MR in the study of MS Coverage ranges through the contributions of MR the variety of techniques available diagnosis and differential diagnosis MR as a predictor of the clinical course MR views of pathophysiology and finally monitoring new treatment efficacy **The year book of neurology and neurosurgery, 1989.
