industries as well as policymakers began developing new problem driven edutainment prominently featuring narratives of disability from the immunocompromised The Boy in the Plastic Bubble to ABC's After School Specials and teen sick lit. Although this conjoining of disability and adolescence began as a storytelling convention, disability became much more than a metaphor as the process of medicalizing adolescence intensified by the 1990s with parenting books containing neuroscientific warnings about the incomplete and volatile teen brain. Undertaking a cultural history of youth that combines disability, queer, feminist, and comparative media studies, Elman offers a provocative new account of how American cultural producers, policymakers, and medical professionals have mobilized discourses of disability to cast adolescence as a treatable condition. By tracing the teen's uneven passage from postwar rebel to 21st century patient, *Chronic Youth* shows how teenagers became a lynchpin for a culture of perpetual rehabilitation and neoliberal governmentality.
