1993 United Nations List Of National Parks:

Encyclopedia of the United Nations and International Agreements: N to S Edmund Jan Osmańczyk, 2003 This thoroughly revised and updated edition is the most comprehensive and detailed reference ever published on United Nations. The book demystifies the complex workings of the world's most important and influential international body. **Our National Parks and the Search for Sustainability** Bob R. O'Brien, 2011-01-20 A study of the US National Park Service's efforts to allow for as many visitors as possible in the parks that are kept in as natural a state as possible. Yosemite Valley in July of 1967 would have had to be seen to be believed. There was never an empty campsite in the valley; you had to create a space for yourself in a sea of cars, tents, and humanity. The camp next to ours had fifty people in it with rugs hung between the trees, incense burning, and a stereo set going full volume. Scenes such as this will probably never be repeated in Yosemite or any other national park, yet the urgent problem remains of balancing the public's desire to visit the parks with the parks' need to be protected from too many people and cars and too much development. In this book, longtime park visitor and professional geographer Bob O'Brien explores the National Park Service's attempt to achieve sustainability, a balance that allows as many people as possible to visit a park that is kept in as natural a state as possible. O'Brien details methods the NPS has used to walk the line between those who would preserve vast tracts of land for no use and those who would tap the Yellowstone geysers to generate electricity. His case studies of six western crown jewel parks show how rangers and other NPS employees are coping with issues that impact these cherished public landscapes, including visitation, development, and recreational use.

Ecology and Man in Mexico's Central Volcanoes Area G.W. Heil, Roland Bobbink, Nuri Trigo Boix, 2012-12-06 The main activities of the economically active population around the Iztaccuatl and Popocatepetl volcanoes region lie in the primary sector. 65-90% of the people working in this sector are dependent on agricultural or pastoral activities; generally, they have an income significantly lower than the minimum wage in Mexico. Of the activities in the area, these agricultural, pastoral, and forestry activities probably have the most direct effect on the ecology of the volcanoes and its immediate surroundings. Traditional farmers producing crops such as beans, pumpkins, and cucumbers generally work on small fields using traditional methods and animal traction. Modern farming, geared towards intensive production, develops on larger sites making use of modern machinery, fertilizers, and pesticides. As the area under agriculture continues to increase every year, the attendant opening of large forested areas, soil modification, and ensuing erosion make it almost impossible for forest recovery. Extensive forestry in the region mainly concerns cutting and collecting wood, cutting pine branches for torches or for utensils for open fire cooking, collection of mushrooms, and hunting. Although these often clandestine activities seem to be small scale, their adverse effects on the forest have been substantial. Weekend visitors from Mexico City heavily dominate recreation, with tourism concentrated near the roads leading to and inside the park. Lacking organization and facilities, most recreational activities have had significant environmental impact on the area. In many countries, the decline of nature has occurred.

because of changes in land use *Understanding Emerging Security Challenges* Ashok Swain, 2013 This book offers an overview of emerging security challenges in the global environment in the post Cold War era After the fall of the Berlin Wall and the subsequent shifting of international political environment a new broader concept of security began to gain acceptance This concept encompassed socio economic environmental challenges such as resource scarcity and climate change water sharing issues deforestation and forest protection measures food and health security and large population migration The book examines the causes and consequences of these emerging security threats and retains a critical focus on evolving approaches to address these issues The author attempts to develop a framework for sustainable security in a rapidly changing global political landscape which seeks to bring states and societies together in a way that addresses weaknesses of the evolving international system Moreover through a detailed analysis of the emerging security issues and their pathways the book further argues that the evolving processes not only pose critical challenges but also provide remarkable opportunity for cooperation and collaboration among and within various stakeholders This book will be of much interest to students of global security war and conflict studies peace studies and IR in general *Protecting Nature* Jeffrey A. McNeely, 1994 This volume describes the major issues facing protected areas both terrestrial and marine and discusses the approaches needed to address these issues An additional section drawing upon the expertise of CNPPA's vice chair marine and members of 14 task forces specifically addresses protected area issues in the coastal marine environment Terrestrial Ecoregions of the Indo-Pacific Eric D. Wikramanayake, 2002 *Terrestrial Ecoregions of the Indo Pacific* offers a comprehensive examination of the state of the Indo Pacific's biodiversity and habitats moving beyond endangered or charismatic species to quantify for the first time the number of mammal and bird species including endemics in each ecoregion Uncommons in the Commons Rucha Ghatge, 2004 It Is A Study Of Five Truly Forest Dependent Communities Analyses The Process Of Formations And Working Of Community Forest Associations And Identities The Factors Responsible For The Success Of Community Efforts In Some Places Partial Success In Some Failure In Some Others And Lack Of Initiative In Still Others Has Seven Chapters The Last Being On Lessons Learnt An Appendix **Conserving Biodiversity in East African Forests** W.D. Newmark, 2013-04-17 Tanzania is one of the most biologically diverse nations in the world Traveling from west to east across Tanzania one encounters an incredible array of ecosystems and species Beginning at Lakes Victoria Tanganyika and Nyasa that form much of the western boundary of Tanzania one finds the most diverse and some of the most spectacular concentrations of endemic fish in any of the world's lakes Moving further inland from the lakes one meets the woodlands and plains of Serengeti Ngorongoro Tarangire and Lake Manyara The assemblages and movements of large mammals in these protected areas are unparalleled worldwide Traveling yet further to the east one comes to Mount Kilimanjaro the highest mountain in Africa Mount Kilimanjaro is of sufficient height to not only contain seven major vegetation zones but also maintain permanent glaciers Finally shortly before arriving at the Indian Ocean one encounters the Eastern Arc Mountains a

series of isolated and geologically ancient mountains which due to their height and proximity to the Indian Ocean intercept sufficient precipitation to support in many areas moist tropical forest The Eastern Arc Mountains are among the richest sites biologically in all of Africa and harbor unusually high concentrations of endemic species species whose geographic distribution are restricted to these mountains Unfortunately much of Tanzania s biodiversity is threatened by habitat alteration destruction and exploitation The Eastern Arc forests face some of the most severe threats to any of Tanzania s biologically unique sites

Planning at the Landscape Scale Paul Selman,2006-11-22 Traditionally landscape planning has involved the designation and protection of exceptional countryside However whilst this still remains important there is a growing recognition of the multi functionality of rural areas and the need to encourage sustainable use of the whole countryside rather than just its hotspots With an inter disciplinary assessment of the rural environment this book draws on theories of landscape values people place relationships sustainable development and plan implementation It focuses on the competing influences of globalization and localization seeing the role of planning as the reconciliation of these conflicting demands reinforcing character and distinctiveness without museum izing rural areas Taking a landscape scale approach to the topic this book responds to the interest sparked by concern for rural landscapes and by recent local and national policy shifts in this area

Integrated Protected Area Management Michael Walkey,Ian R. Swingland,Shaun Russell,2012-12-06 Protected areas have become an increasingly important tool both in the conservation of biodiversity and in revenue generation through sustainable use This is the only sure way to guarantee the protection necessary for many species habitats and ecosystems in the future Integrated Protected Area Management features contributions that consider the design management and sustainable use of these regions Three principal aspects are considered the theory and practice of designation community based conservation and the concept of sustainability identifying priorities for management The emphasis throughout is on the importance of an interdisciplinary approach to planning and the active involvement of all stakeholders in decision making processes as a means of ensuring long term sustainability

Marine Protected Areas S. Gubbay,2012-12-06 Marine protected areas MPAs have an important role in marine conserva tion programmes around the world Although most have been established relatively recently when compared with protected areas on land there is considerable expertise on their identification setting up and management Some techniques have been adapted from those used on land Others are novel and unique to marine conservation The chapters in this book give an insight into this fast developing field where experiment and innovation work alongside techniques which have been tried and tested The guiding princi ples behind key stages in the setting up and management of MP As are described and case studies illustrate how they have worked While it is most encouraging to read about the successes the case studies also point to difficulties which have been encountered Not all of the examples are new or recent but together they illustrate what is happening in this field
