Finally, it discusses the future of numeric data services including the integration of statistics and data into library instruction and the use of Web 2.0 tools to visualize data. Written for a general reference audience with little knowledge of data services and sources who would like to incorporate support into their general reference practice. Combines information on establishing data services with an introduction to available statistical and numeric data sources. Trends in Mortality and Differential Mortality Jacques Vallin, France Meslé, Tapani Valkonen, 2001. The average life expectancy for Europeans has increased from 45 years to 73 years during the last century. However, important differences in mortality risks are still present throughout Europe. For example, there is a higher mortality rate in Eastern Europe and in some eastern European countries life expectancy is actually decreasing. This study examines mortality trends in the Council of Europe member states over the last 50 years, including life expectancy, the reduction in infant mortality, trends in main groups of deaths, and the health crisis in eastern and central Europe. It also considers the links between life expectancy and socio-economic indicators for 11 European countries.
