New Perspectives in Global Public Archaeology Katsuyuki Okamura, Akira Matsuda, 2011-09-03 Since its very beginning archaeology has in many senses always related to a much wider constituency than just archaeologists This relationship between archaeology and the public has often been overlooked and constantly changes Public archaeology as a field of research and practice has been developing since the 1970s in English speaking countries particularly in the United States Britain and Australia and is today beginning to spread to other parts of the world Global expansion of public

archaeology comes with the recognition of the need for a careful understanding of local contexts particularly the culture and socio political climate This volume critically examines the current theories and practices of public archaeology through relevant case studies from different regions throughout the world including Japan China South Korea New Caledonia South Africa Senegal Jordan Italy Peru Canada the United Kingdom the United States and Australia These case studies are examined from a wide variety of theoretical contexts to provide a thorough and comprehensive guide to the state of public archaeology today as well as implications for its future As the theory and practice of public archaeology continues to change and grow archaeology's relationship with the broader community needs to be critically and openly examined The contributions in this wide ranging work are a key source of information for anyone practicing or studying archaeology in a public context

Facing the Wild Chilla Bulbeck, 2012 What do wild animals mean to humans Will they survive both rampant habitat loss and extinction caused by human encroachment and as ecotourists our enthusiasm for them With ecotourism now the fastest growing segment of tourism and encounters with wild animals be it swimming with dolphins going on safari or bird watching ever more popular these are critical questions Yet until now little has been known about why people crave encounters with wild animals and the meaning for the ecotourism industry conservation efforts and society at large Facing the Wild is the first serious empirical examination of why people seek out animals in their natural environment what the desire for this experience tells us about the meanings of animals nature authenticity and wilderness in contemporary industrialized societies and whether visitors change their environmental perspectives and behaviour as the custodians of wildlife parks would like them to The book explores the contradictions and ambivalence that so many people experience in the presence of wild nature in loving it we may diminish it and in the act of wanting to see it we may destroy it Ultimately the book makes a case for respectful stewardship of a hybrid nature and provides insight for both practitioners and ecotourists alike

Behavioral Genetics of the Fly (*Drosophila Melanogaster*) Josh Dubnau, 2014-06-26 The common fruit fly *Drosophila melanogaster* has been the subject of genetics research since the early twentieth century The complete genomic sequence of *Drosophila* was published in 2000 and it is still the model organism par excellence for the experimental study of biological phenomena and processes It is also by far the best model for studying gene function in mammals including humans Presenting state of the art studies on the behaviour of *Drosophila* this volume discusses normal and pathological models of neurobehavioral disorders and encompasses the specialised methods that have been used from anatomical histological immunohistological and neurophysiological to genomic genetic and behavioural assays A comprehensive and thorough reference this volume is a valuable resource for students and researchers alike across several disciplines of life sciences including behavioral genetics neurogenetics behavioral neuroscience molecular biology evolutionary biology and population biology
