Parallel Computing: Advances And Current Issues, Proceedings Of The International Conference Parco2001

Gerhard R Joubert,A Murli,F J Peters,M Vanneschi,2002-07-30 The near future will see the increased use of parallel computing technologies at all levels of mainstream computing Computer hardware increasingly employs parallel techniques to improve computing power for the solution of large scale and computer intensive applications Cluster and grid technologies make possible high speed computing facilities at vastly reduced costs These developments can be expected to result in the extended use of all types of parallel computers in virtually all areas of human endeavour Computer intensive problems in emerging areas such as financial modelling data mining and multimedia systems in addition to traditional application areas of parallel computing such as scientific computing and simulation will lead to further progress Parallel computing as a field of scientific research and development has already become one of the fundamental computing technologies This book gives an overview of new developments in parallel computing at the start of the 21st century as well as a perspective on future developments *Proceedings - 1999 International Conference on Parallel Processing* Jōhō Shori Gakkai

Charles-Edmond Bichot,Patrick Siarry,2013-01-24 Graph partitioning is a theoretical subject with applications in many areas principally numerical analysis programs mapping onto parallel architectures image segmentation VLSI design During the last 40 years the literature has strongly increased and big improvements have been made This book brings together the knowledge accumulated during many years to extract both theoretical foundations of graph partitioning and its main applications *Handbook of Research on Scalable Computing Technologies* Li, Kuan-Ching,Hsu, Ching-Hsien,Yang, Laurence Tianruo,Dongarra, Jack,Zima, Hans,2009-07-31 This book presents discusses shares ideas results and experiences on the recent important advances and future challenges on enabling technologies for achieving higher performance Provided

by publisher **Arithmetic Optimization Techniques for Hardware and Software Design** Ryan Kastner, Anup Hosangadi, Farzan Fallah, 2010-05-06 Obtain better system performance lower energy consumption and avoid hand coding arithmetic functions with this concise guide to automated optimization techniques for hardware and software design High level compiler optimizations and high speed architectures for implementing FIR filters are covered which can improve performance in communications signal processing computer graphics and cryptography Clearly explained algorithms and illustrative examples throughout make it easy to understand the techniques and write software for their implementation Background information on the synthesis of arithmetic expressions and computer arithmetic is also included making the book ideal for newcomers to the subject This is an invaluable resource for researchers professionals and graduate students working in system level design and automation compilers and VLSI CAD **On the Move to Meaningful Internet Systems 2006: CoopIS, DOA, GADA, and ODBASE** Zahir Tari, 2006-10-26 *Data Clustering in C++* Guojun Gan, 2011-03-28 Data clustering is a highly interdisciplinary field the goal of which is to divide a set of objects into homogeneous groups such that objects in the same group are similar and objects in different groups are quite distinct Thousands of theoretical papers and a number of books on data clustering have been published over the past 50 years However few books exist to teach people how to implement data clustering algorithms This book was written for anyone who wants to implement or improve their data clustering algorithms Using object oriented design and programming techniques Data Clustering in C exploits the commonalities of all data clustering algorithms to create a flexible set of reusable classes that simplifies the implementation of any data clustering algorithm Readers can follow the development of the base data clustering classes and several popular data clustering algorithms Additional topics such as data pre processing data visualization cluster visualization and cluster interpretation are briefly covered This book is divided into three parts Data Clustering and C Preliminaries A review of basic concepts of data clustering the unified modeling language object oriented programming in C and design patterns A C Data Clustering Framework The development of data clustering base classes Data Clustering Algorithms The implementation of several popular data clustering algorithms A key to learning a clustering algorithm is to implement and experiment the clustering algorithm Complete listings of classes examples unit test cases and GNU configuration files are included in the appendices of this book as well as in the downloadable resources The only requirements to compile the code are a modern C compiler and the Boost C libraries *High Performance Computing and Grids in Action* Lucio Grandinetti, 2008 Collects in four chapters single monographs related to the fundamental advances in parallel computer systems and their developments from different points of view from computer scientists computer manufacturers end users and related to the establishment and evolution of grids fundamentals implementation and deployment *High Performance Heterogeneous Computing* Jack Dongarra, Alexey L. Lastovetsky, 2009-08-11 An analytical overview of the state of the art open problems and future trends in heterogeneous parallel and distributed computing This
