Crafters Garden At A Glance:

Do Not Separate Her from Her Garden Carlyn E. Ferrari, 2022-12-01 Anne Spencer's identity as an artist grew from her relationship to the natural world. During the New Negro Renaissance with which she is primarily associated, critics dismissed her writings on nature as apolitical and deracinated. *Do Not Separate Her from Her Garden* corrects that misconception, showing how Spencer used the natural world in innovative ways to express her Black womanhood, feminist politics, spirituality, and singular worldview. Employing ecopoetics as an analytical frame, Carlyn Ferrari recenters Spencer's archive of ephemeral writings to cut to the core of her artistic ethos. Drawing primarily on unpublished, undated poetry and prose, this book represents a long overdue reassessment of an underappreciated literary figure. Not only does it resituate Spencer in the pantheon of American women of letters, but it uses her environmental credo to analyze works by Alice Walker, Zora Neale Hurston, and Dionne Brand, positioning ecocritical readings as a new site of analysis of Black women's writings. *Garden Alchemy* Barrett Williams, ChatGPT, 2025-02-27 Unlock the Secrets of Eco-Friendly Gardening with *Garden Alchemy*. Eugenics in the Garden Fabiola López-Durán,2018-03-01 As Latin American elites strove to modernize their cities at the turn of the twentieth century they eagerly adopted the eugenic theory that improvements to the physical environment would lead to improvements in the human race Based on Jean Baptiste Lamarck s theory of the inheritance of acquired characteristics this strain of eugenics empowered a utopian project that made race gender class and the built environment the critical instruments of modernity and progress Through a transnational and interdisciplinary lens Eugenics in the Garden reveals how eugenics fueled by a fear of social degeneration in France spread from the realms of medical science to architecture and urban planning becoming a critical instrument in the crafting of modernity in the new Latin world Journeying back and forth between France Brazil and Argentina Fabiola L pez Dur n uncovers the complicity of physicians and architects on both sides of the Atlantic who participated in a global strategy of social engineering legitimized by the authority of science In doing so

she reveals the ideological trajectory of one of the most celebrated architects of the twentieth century Le Corbusier who deployed architecture in what he saw as the perfecting and whitening of man The first in depth interrogation of eugenics influence on the construction of the modern built environment Eugenics in the Garden convincingly demonstrates that race was the main tool in the geopolitics of space and that racism was and remains an ideology of progress **Garden Design**
