Architecture Constructed Mark Jarzombek, 2023-04-06 Architecture Constructed explores the central open secret of architecture the long suppressed conflict between arche and teckton between those who design and those who build This unresolved tension has a centuries old history in the discipline persisting through Classical and Renaissance times to the present day and yet it has rarely been addressed through a historical and theoretical lens In this book acclaimed architectural theorist Mark Jarzombek examines this tension head on and uses it to rethink the nature of the history of architecture He reveals architecture to be a troubled interconnected realm incomplete and unstable where labor craft and occupation are the invisible complements to the work of the architect Erudite entertaining and full of surprising and thought provoking juxtapositions and challenges Architecture Constructed is packed with novel insights into the internal conflicts and paradoxes of architecture and is rich with examples from modern and contemporary practice including Mies Koolhaas Potrc Hadid Bawa Diller Scofidio which demonstrate how contemporary architecture inhabits the very same tensions that have riven the discipline since the days of Alberti This provocative book will stimulate conversations among students researchers and designers as it pushes the boundaries on how we define the professional discipline of architecture and overturns entrenched assumptions about the nature of architectural history and theory
