entered the research arena The series now includes reviews on bio chemical biological immunological physiological and medicinal aspects of drug research Researchers actively engaged in the various scientific fields forming the entity of drug research can benefit from the wealth of knowledge and experience of the respective authors and will be assisted in their endeavour to discover new pharmaceutical agents Those simply wanting to keep abreast of new developments in the complex multi discipline science can turn to the Progress in Drug Research volumes as an almost encyclopaedic source of information without having to consult the innumerable original publications Volume 33 contains 13 reviews a subject index an index for the close to 400 articles published in the series so far and an author and titles index for all 33 volumes Chemistry and Physics William M.
