Power World Book, Inc,1983      Learning Mathematics in a Mobile App-Supported Math Trail Environment Adi Nur  
Cahyono,2018-07-19 This brief presents the results of a study on the development of the mobile app supported math trail  
program for learning mathematics This study is a part of the MathCityMap Project a project of the MATIS I Team from IDMI  
Goethe Universit t Frankfurt Germany that comprises math trails around the city that are supported by the use of GPS  
enabled mobile phone technology The project offers an activity that is designed to support students in constructing their own  
mathematical knowledge by solving the prepared mathematical tasks on the math trail and interacting with the environment  
including the digital environment The brief focuses specifically on the development of a model for a mobile app supported  
math trail programme and the implementation of this programme in Indonesia It offers both an empirical exploration of its  
implementation as well as critical assessment of students motivation in mathematics their own performance as well as  
teachers mathematics beliefs It concludes with a future forward perspective by recommending strategies for implementation  
in schools among the general public of the existing math trails including its supporting tool It also discusses strategies for  
developing and designing new trails and suggests further research in other geographical regions and contexts for continued  
project development and implementation Learning Mathematics in a Mobile App Supported Math Trail Environment  
articulates an innovative and exciting future for integrating real mathematical tasks and geographic and digital environment  
into effective mathematics education      **Small Press Review** ,1993      Mathematics Teaching and Professional Learning in

Helenius,Maria L. Johansson,Troels Lange,Anna Wernberg,2016-01-22 This book presents chapters based on papers  
presented at the second POEM conference on early mathematics learning These chapters broaden the discussion about  
mathematics education in early childhood by exploring the debate about construction versus instruction Specific sections  
investigate the teaching and learning of mathematical processes and mathematical content early childhood teacher

development transitions for young children between home and preschool between home and school and between preschool and school The chapters use a range of innovative theoretical and methodological approaches which will form an interesting basis for future research in this area

**Touch Screen Tablets Touching Children's Lives** Joanne Tarasuik, Gabrielle Strouse, Jordy Kaufman, 2018-02-28 Touch screen tablets have greatly expanded the technology accessible to preschoolers toddlers and even infants given that they do not require the fine motor skills required for using traditional computers Many parents and educators wish to make evidence based decisions regarding young children s technology use yet technological advancements continue to occur faster than researchers can keep up with Accordingly despite touch screen tablets entering society more than 5 years ago we are in the infancy of research concerning interactive media and children The topic has gained traction in the past couple of years For example theoretical papers have discussed how interactive media activities differ from physical toys and passive media Christakis 2014 and how educational apps development should utilise the four pillars of learning Hirsh Pasek et al 2015 Yet there has been little experimental research published on young children and touch screen use

**Cases on Informal Learning for Science and Mathematics Education** Sun, Li, Lin, Cheng-Yao, 2025-04-17 Many educators face the challenge of engaging students in science and mathematics often struggling to bridge the gap between theoretical concepts taught in classrooms and their real world applications This disconnect can lead to disinterest and disengagement among students hindering their learning outcomes Cases on Informal Learning for Science and Mathematics Education offers a solution to this problem by showcasing how informal learning experiences can significantly enhance students understanding and engagement in these subjects This book demonstrates the potential of informal learning to support and complement formal classroom instruction by presenting a rich collection of case studies It highlights how activities such as cooking budgeting visiting museums and participating in after school math clubs can serve as valuable informal learning experiences that deepen students understanding of science and mathematics concepts The book also addresses the challenge of recognizing the value of informal knowledge in problem solving offering insights and strategies for educators to help students leverage their informal learning experiences

**Subject Guide to Books in Print** ,1993 **Handbook of Digital Resources in Mathematics Education** Birgit Pepin, Ghislaine Gueudet, Jeffrey Choppin, 2024-06-21 This handbook presents the state of the art scholarship on theoretical frames mathematical content learning environments pedagogic practices teacher professional learning and policy issues related to the development and use of digital resources in mathematics education With the advent of more and more open access digital resources teachers choose from the web what they see fit for their classroom students choose in the moment what they need for their projects and learning paths However educators and students often find it difficult to choose from the abundance of materials on offer as they are uncertain about their quality and beneficial use It is clear that at a time of bouleversement of the teaching learning processes it is crucial to understand the quality and the potentially transformative

aspects of digital resources This book provides comprehensive analyses of and insights into the transformative aspects of digital resources     Paperbound Books in Print 1995 Reed Reference Publishing, 1995-12     *The Cumulative Book Index* ,1992 A world list of books in the English language     *Using Mobile Technologies in the Teaching and Learning of Mathematics* Nigel Calder, Kevin Larkin, Nathalie Sinclair, 2018-08-09 Mobile technologies influence the way that we interact with the world the way that we live We use them for communication entertainment information and research In education settings there has been substantial investment in mobile devices often without a concomitant investment in developing pedagogy and practices With mobile technologies evolving rapidly and the number of educational apps growing there is a need for research into how they facilitate mathematics learning Such research is of particular importance regarding how such devices may be used to open up new ways of envisaging mathematics and mathematics education and to help develop conceptual rather than procedural or declarative knowledge This volume draws upon international research and reports on a range of research projects that have incorporated mobile technologies for mathematics education It presents research on the use of mobile technologies such as iPads iPods iPhones Androids and Tablets across a diverse range of cultures year levels and contexts It examines the ways in which mobile technologies including apps might influence students engagement cognition collaboration and attitudes through the reshaping of the learning experience In addition the book presents appropriate ways to integrate mobile technologies into teaching and learning programmes It is a significant reference book for those involved with teaching mathematics or using mobile technologies in education while also offering insights and examples that are applicable to the use of digital technologies in education generally     *Children's Books in Print* R R Bowker Publishing, Bowker, 1999-12     Transnational and Borderland Studies in Mathematics Education Richard S. Kitchen, Marta Civil, 2012-08-06 Every year significant numbers of immigrant children from Mexico enter classrooms in the United States These immigrants comprise a heterogeneous group of students with diverse needs abilities and experiences Transnational and Borderland Studies in Mathematics Education is the first collection to offer research studies across these communities Providing invaluable research on both sending and receiving communities in Mexico and the US this collection considers the multiple aspects of children's experiences with mathematics including curriculum classroom participation structures mathematical reasoning and discourse both in and out of school and parents perceptions and beliefs about mathematics instruction An important treatment of an insufficiently documented subject this collection brings together researchers on both sides of the border to foster and support an interest in documenting evidence that will set the stage for future studies in mathematics education
