Work Appropriation and Social Inequality Antonia Kupfer, 2021-09-07 This volume is a collection of subject oriented studies on paid work Each chapter refers to the social structures that form conditions for peoples working contexts and interprets workers and employees narrations on work Work appropriation a process of formation of subjectivity in which workers and employees relate to the social status of their occupations and the use value of their work in actively dealing with the work s content and conditions serves as a comprehensive concept for each varying subject oriented approach in the volume Work Appropriation and Social Inequality focuses on social inequality understood as the distribution of life chances that privilege some and discriminate others and reveals the unequal conditions for and outcomes of work appropriation By analyzing work appropriation it uses a broader concept than that of meaning of work or meaningful work as it includes the practice and processes of working The volume s subject oriented approach to work differs from the stream subjectivation in going beyond individuals desires for self realization in work and to companies requirements of accessing emotional and personal dimensions of their workforce The volume contains three parts the first lays out basic approaches to work appropriation and social inequality the second analyses current threats to work appropriation in the UK and Germany and
