Anderson,Joseph D. Anderson,2009-03-26 Philosophers and students of the arts have wondered since the time of Aristotle about the nature of aesthetic experience and how this experience can seemingly be evoked by works of art For more than a century producers and directors of motion pictures have made decisions about how to craft them based upon assumptions about complex stylistic devices and the effects such patterns of organization have on viewers Over the past few years film scholars have made considerable progress in analyzing the manifold connections that exist between stylistic patterns and aesthetic effects for moving images of all kinds In doing so they have increasingly drawn upon insights and methodologies derived from psychology The international conference from which this volume takes its contributions and its title was organized to encourage the seeking of descriptive models pertaining to those elements of filmic construction that account for specific aesthetic experience The focus of the current selection of twenty essays is therefore on the elements of filmic narration and their presumed aesthetic effects The editors are pleased to strengthen the link between film studies and psychology in the interest of gaining tangible insight into the ancient mystery of the link between art and aesthetic experience **Narrative of Chinese and Western Popular Fiction** Yonglin Huang,2018-09-26 This book presents a

comprehensive and systematic study of the narrative history and narrative methods of Chinese and Western popular fiction from the perspectives of narratology comparative literature and art and literature studies by adopting the methodology of parallel comparison The book is a pioneering work that systematically investigates the similarities and differences between Chinese and Western popular fiction and traces the root causes leading to the differences By means of narrative comparison it explores the conceptual and spiritual correlations and differences between Chinese and Western popular fiction and by relating them to the root causes of cultural spirit allows us to gain an insight into the cultural heritage of different nations The book is structured in line with a cause and effect logical sequence and moves from the macroscopic to the microscopic from history to reality and from theory to practice The integration of macro level theoretical studies and micro level case studies is both novel and effective This book was awarded Second Prize at the Sixth Outstanding Achievement Awards in Scientific Research for Chinese Institutions of Higher Learning Humanities Social Sciences 2013 *Writing Crime Fiction* ,

Creating Suspense and Surprise in Short Literary Fiction: a Stylistic and Narratological Approach , Suspense and surprise as common and crucial elements of interest realised in literary fiction are analysed closely in a sample of short stories so as to develop a detailed explanation of how these forms of interest are created in literary texts and to propose models for them Creating suspense involves more conditions necessary and optional and more complication than surprise the several optional conditions mainly serve to intensify the feeling of suspense the reader experiences Surprise requires two necessary and sufficient conditions with only a couple of optional conditions to maintain or ensure coherence in the text The differences are considered attributable to a more fundamental difference between suspense and surprise as emotions Suspense can be regarded as a progressive emotion whereas surprise is a perfective emotion As such suspense as an interest is considered as a process oriented interest while surprise is an effect oriented one Suspense is mostly experienced while reading and has the reader involved with the story Surprise drives the reader to reassess the story in the new light it throws on events and to look for some further message this is often a main aim of the literary fiction which ends in surprise Mini Horror Fiction Writing Guide HowExpert,Randal Schaffer,2017-03-20 Have you ever wanted to write a horror story but didn't know how to start or proceed In this easy step by step guide HowExpert presents Randal Schaffer a horror fiction writer enthusiast and fan who will walk you through the process of not only writing a compelling horror story but writing fiction stories in general In this book you'll learn How to pick a topic for your book that will bring your readers along until the very end How to choose a setting for your book that your readers can understand and mentally insert themselves into How to write characters that your readers will care about and either root for or against How to build suspense in order to create that perfect page turner that all writers seek How to use gore in such a way that you'll make your readers squirm but not be so disgusted that they put the book down General tips on writing such as keeping the story believable within the universe that you're creating and editing out anything that doesn't serve the story How to wrap your story up in a satisfying way that will

Proceedings of the 2023 2nd International Conference on Social Sciences and Humanities and Arts (SSHA 2023) Mohd Fauzi bin Sedon,Intakhab Alam Khan,Mehmet CÜNEYT BİRKÖK,KinSun Chan,2023-06-29 This is an open access book With the progress of social civilization social science and its research are becoming more and more important Theoretically and practically the study of social phenomena and social problems and the development of prosperous social sciences are the eternal themes of human beings At present social science research and its results can hardly meet the needs of social development especially the unscientific evaluation of social science results which has aroused great concern from all walks of life and has produced dirt and questions on social science thus affecting the proper development of social science Max Weber once said that the most important function of social science in modern times is to keep people clear headed and to resist the delusions of prophetic legislators Humanities and arts are the process of perceiving realizing thinking manipulating and expressing objective or subjective objects through capturing and excavating feeling and analyzing integrating and applying

or displaying the stage results in the form obtained through feeling seeing hearing smelling touching The social sciences and humanities and arts contain content that will directly affect our lives and the way society functions And by reacting to today s increasingly intricate problems and situations through systematic and professional discussions they will further contribute to the improvement of institutions and the development of society By thinking about issues and looking at problems and the world from different perspectives by putting the two together it may be possible to have more comprehensive appropriate and better responses for example the development of laws requires a deeper understanding of the environment in which they are implemented international trade requires a certain understanding of the customs of different countries and the development of tax and economic policies requires a certain understanding of the population consumer demand etc
