Written by distinguished historians of science and religion the thirty essays in this volume survey the relationship of Western religious traditions to science from the beginning of the Christian era to the late twentieth century This wide ranging collection also introduces a variety of approaches to understanding their intersection suggesting a model not of inalterable conflict but of complex interaction Tracing the rise of science from its birth in the medieval West through the scientific revolution the contributors describe major shifts that were marked by discoveries such as those of Copernicus Galileo and Isaac Newton and the Catholic and Protestant reactions to them They assess changes in scientific understanding brought about by eighteenth and nineteenth century transformations in geology cosmology and biology together with the responses of both mainstream religious groups and such newer movements as evangelicalism and fundamentalism The book also treats the theological implications of contemporary science and evaluates recent approaches such as environmentalism gender studies social construction and postmodernism which are at the center of current debates in the historiography understanding and application of science Contributors Colin A Russell David B Wilson Edward Grant David C Lindberg Alnoor Dhanani Owen Gingerich Richard J Blackwell Edward B Davis Michael P Winship John Henry Margaret J Osler Richard S Westfall John Hedley Brooke Nicolaas A Rupke Peter M Hess James Moore Peter J Bowler Ronald L Numbers Steven J Harris Mark A Noll Edward J Larson Richard Olson Craig Sean McConnell Robin Collins William A Dembski David N Livingstone Sara Miles and Stephen P Weldon How Evolution Shapes Our Lives Jonathan B. Losos, Richard E. Lenski, 2016-07-26

An authoritative exploration of why understanding evolution is crucial to human life today It is easy to think of evolution as something that happened long ago or that occurs only in nature or that is so slow that its ongoing impact is virtually nonexistent when viewed from the perspective of a single human lifetime But we now know that when natural selection is strong evolutionary change can be very rapid In this book some of the world's leading scientists explore the implications of this reality for human life and society With some twenty three essays this volume provides authoritative yet accessible explorations of why understanding evolution is crucial to human life from dealing with climate change and ensuring our food supply health and economic survival to developing a richer and more accurate comprehension of society culture and even what it means to be human itself Combining new essays with essays revised and updated from the acclaimed Princeton Guide to Evolution this collection addresses the role of evolution in aging cognition cooperation religion the media engineering computer science and many other areas The result is a compelling and important book about how evolution matters to humans today The contributors are Dan I Andersson Francisco J Ayala Amy Cavanaugh Cameron R Currie Dieter Ebert Andrew D Ellington Elizabeth Hannon John Hawks Paul Keim Richard E Lenski Tim Lewens

Milestones in the Evolving Theory of Evolution David Wool, 2020-11-18 The book illustrates how Darwin's theory has evolved about the development of the biological world before Darwin and great changes that took place with the incorporation of statistics and after Darwin's death of genetics and mathematics The formation of Modern Synthesis protein electrophoresis Discovery of DNA opened new avenues for the study of evolution *The Creationists* Ronald L. Numbers, 1993-01-01 Forty seven percent of the American people according to a 1991 Gallup poll believe that God made man as man is now in a single act of creation and within the last ten thousand years Ronald L Numbers chronicles the astonishing resurgence of this belief since the 1960s as well as the creationist movement's tangled roots in the theologies of late nineteenth and early twentieth century Baptists Presbyterians Lutherans Adventists and other religious groups Even more remarkable than Numbers's story of today's widespread rejection of the theory of evolution is the dramatic shift from acceptance of the earth's antiquity to the insistence of present day scientific creationists that most fossils date back to Noah's flood and its aftermath and that the earth itself is not more than ten thousand years old Numbers traces the evolution of scientific creationism and shows how the creationist movement challenges the very meaning of science *Science and Earth History* Arthur N. Strahler, 1999-11-01 In this comprehensive treatment of the ongoing conflict between creationists and evolutionary scientists well known geomorphologist Arthur Strahler carefully examines creationists' claims of scientific evidence for the six day divine creation of the universe followed by the catastrophic flood of Noah as claimed in Genesis The creationists' arguments are examined and evaluated against the findings of mainstream science in the fields of cosmology astronomy geophysics geology paleontology and evolutionary biology Updated with a new preface and responses to recent attacks on evolutionary theory *Science and Earth History* can serve as both a popular overview of earth history and as a scholarly anecdote to the fictions of creationism once again finding their way into classrooms and universities Strahler illuminates the controversy by reviewing the philosophy methodology and sociology of empirical science as contrasted with the belief systems of religion and pseudoscience The author also includes lucid criteria for distinguishing science from pseudoscience and reviews the great discoveries and developments in science that point to the evolution of life over the earth's three billion year history *Creationism in Europe* Ronald L. Numbers, 2014-12-15 American creationists efforts to export

their beliefs have succeeded in Europe beyond their own expectations winning followers across creed and country For decades the creationist movement was primarily situated in the United States Then in the 1970s American creationists found their ideas welcomed abroad first in Australia and New Zealand then in Korea India South Africa Brazil and elsewhere including Europe where creationism plays an expanding role in public debates about science policy and school curricula In this the first comprehensive history of creationism in Europe leading historians philosophers and scientists narrate the rise of and response to scientific creationism creation science intelligent design and organized antievolutionism in countries and religions throughout Europe Providing a unique map of creationism in Europe the authors chart the surprising history of creationist activities and strategies there Over the past forty years creationism has spread swiftly among European Catholics Protestants Jews Hindus and Muslims even as anti creationists sought to smother its flames Antievolution messages gained such widespread approval in fact that in 2007 the Parliamentary Assembly of the Council of Europe passed a resolution advising member states to defend and promote scientific knowledge and firmly oppose the teaching of creationism as a scientific discipline on an equal footing with the theory of evolution Creationism in Europe offers a discerning introduction to the cultural history of modern Europe the variety of worldviews in Europe and the interplay of science and religion in a global context It will be of interest to students and scholars in the history and philosophy of science religious studies and evolutionary theory as well as policy makers and educators concerned about the spread of creationism in our time

Lamport,2016-11-10 From the Founding Fathers through the present Christianity has exercised powerful influence in the United States from its role in shaping politics and social institutions to its hand in inspiring art and culture The Encyclopedia of Christianity in the United States outlines the myriad roles Christianity has played and continues to play This masterful five volume reference work includes biographies of major figures in the Christian church in the United States influential religious documents and Supreme Court decisions and information on theology and theologians denominations faith based organizations immigration art from decorative arts and film to music and literature evangelism and crusades the significant role of women racial issues civil religion and more The first volume opens with introductory essays that provide snapshots of Christianity in the U S from pre colonial times to the present as well as a statistical profile and a timeline of key dates and events Entries are organized from A to Z The final volume closes with essays exploring impressions of Christianity in the United States from other faiths and other parts of the world as well as a select yet comprehensive bibliography Appendices help readers locate entries by thematic section and author and a comprehensive index further aids navigation *Geoscience Documentation* ,1988 Perspectives on Science and Christian Faith ,2007 **Books & Culture** ,1999 Science on Trial Douglas J. Futuyma,1983 Oracles of Science Karl Giberson,Mariano Artigas,2006-12-28 Biologists Stephen Jay Gould Richard Dawkins and Edward O Wilson and physicists Carl Sagan Stephen Hawking and Steven Weinberg have

become public intellectuals articulating a much larger vision for science and what role it should play in the modern worldview The scientific prestige and literary eloquence of each of these great thinkers combine to transform them into what can only be called oracles of science Curiously the leading oracles of science are predominantly secular in ways that don't reflect the distribution of religious beliefs within the scientific community Many of them are even hostile to religion creating a false impression that science as a whole is incompatible with religion Karl Giberson and Mariano Artigas offer an informed analysis of the views of these six scientists carefully distinguishing science from philosophy and religion in the writings of the oracles

The Structure of Evolutionary Theory Stephen Jay Gould, 2002-03-21 The world's most revered and eloquent interpreter of evolutionary ideas offers here a work of explanatory force unprecedented in our time a landmark publication both for its historical sweep and for its scientific vision With characteristic attention to detail Stephen Jay Gould first describes the content and discusses the history and origins of the three core commitments of classical Darwinism that natural selection works on organisms not genes or species that it is almost exclusively the mechanism of adaptive evolutionary change and that these changes are incremental not drastic Next he examines the three critiques that currently challenge this classic Darwinian edifice that selection operates on multiple levels from the gene to the group that evolution proceeds by a variety of mechanisms not just natural selection and that causes operating at broader scales including catastrophes have figured prominently in the course of evolution Then in a stunning tour de force that will likely stimulate discussion and debate for decades Gould proposes his own system for integrating these classical commitments and contemporary critiques into a new structure of evolutionary thought In 2001 the Library of Congress named Stephen Jay Gould one of America's eighty-three Living Legends people who embody the quintessentially American ideal of individual creativity conviction dedication and exuberance Each of these qualities finds full expression in this peerless work the likes of which the scientific world has not seen and may not see again for well over a century
