The Oxford Handbook of European Romanticism Paul Hamilton, 2016 The Oxford Handbook of European Romanticism focuses on the period beginning with the French Revolution and extending to the uprisings of 1848 across Europe It brings together leading scholars in the field to examine the intellectual literary philosophical and political elements of European Romanticism The volume begins with a series of chapters examining key texts written by major writers in languages including French German Italian Spanish Russian Hungarian Greek and Polish amongst others Then follows a second section based on the naturally interdisciplinary quality of Romanticism encapsulated by the different discourses with which writers of the time set up an internal comparative dynamic These chapters highlight the sense a discourse gives of being written knowledgeably against other pretenders to completeness or comprehensiveness of understanding and the Enlightenment encyclopaedic project Discourses typically push their individual claims to resume European culture collaborating and trying to assimilate each other in the process The main examples featuring here are history geography drama theology language geography philosophy political theory the sciences and the media Each chapter offers original and individual interpretation of individual aspects of an inherently comparative world of individual writers and the discursive idioms to which they are historically subject Together the forty one chapters provide a comprehensive and unique overview of European Romanticism

The Oxford Handbook of Hellenic Studies George Boys-Stones, Barbara Graziosi, Phiroze Vasunia, 2009-08-20 The Oxford Handbook of Hellenic Studies is a unique collection of some seventy articles which together explore the ways in which ancient Greece has been and might be studied It is intended to inform its readers but also importantly to inspire them and to enable them to pursue their own research by introducing the primary resources and exploring the latest agenda for their study The emphasis is on the breadth and potential of Hellenic Studies as a flourishing and exciting intellectual arena and also upon its relevance to the way we think about ourselves today *Entangled Histories of the Balkans - Volume Four* Roumen Dontchev Daskalov, Diana Mishkova, Tchavdar Marinov, Alexander Vezhenkov, 2017-02-06 The present volume is the last in the Entangled Balkans series and marks the end of several years of research guided by the

transnational entangled history and histoire croise approaches The essays in this volume address theoretical and methodological issues of Balkan or Southeast European regional studies not only questions of scholarly concepts definitions and approaches but also the extra scholarly ideological political and geopolitical motivations that underpin them These issues are treated more systematically and by a presentation of their historical evolution in various national traditions and schools Some of the essays deal with the articulation of certain forms of Balkan heritage in relation to the geographical spread and especially the cultural definition of the Balkan area Concepts and definitions of the Balkans are thus complemented by self representations that reflect on their cultural foundations

Who Owns Antiquity? James Cuno, 2010-10-18 Whether antiquities should be returned to the countries where they were found is one of the most urgent and controversial issues in the art world today and it has pitted museums private collectors and dealers against source countries archaeologists and academics Maintaining that the acquisition of undocumented antiquities by museums encourages the looting of archaeological sites countries such as Italy Greece Egypt Turkey and China have claimed ancient artifacts as state property called for their return from museums around the world and passed laws against their future export But in *Who Owns Antiquity* one of the world's leading museum directors vigorously challenges this nationalistic position arguing that it is damaging and often disingenuous Antiquities James Cuno argues are the cultural property of all humankind evidence of the world's ancient past and not that of a particular modern nation They comprise antiquity and antiquity knows no borders Cuno argues that nationalistic retention and reclamation policies impede common access to this common heritage and encourage a dubious and dangerous politicization of antiquities and of culture itself Antiquities need to be protected from looting but also from nationalistic identity politics To do this Cuno calls for measures to broaden rather than restrict international access to antiquities He advocates restoration of the system under which source countries would share newly discovered artifacts in exchange for archaeological help and he argues that museums should again be allowed reasonable ways to acquire undocumented antiquities Cuno explains how *partage* broadened access to our ancient heritage and helped create national museums in Cairo Baghdad and Kabul The first extended defense of the side of museums in the struggle over antiquities *Who Owns Antiquity* is sure to be as important as it is controversial Some images inside the book are unavailable due to digital copyright restrictions

The Routledge Handbook of Architecture, Urban Space and Politics, Volume I Nikolina Bobic, Farzaneh

Haghighi,2022-10-28 For architecture and urban space to have relevance in the 21st Century we cannot merely reignite the approaches of thought and design that were operative in the last century This is despite or because of the nexus between politics and space often being theorized as a representation or by product of politics As a symbol or an effect the spatial dimension is depoliticized Consequently architecture and the urban are halted from fostering any systematic change as they are secondary to the event and therefore incapable of performing any political role This handbook explores how architecture and urban space can unsettle the unquestioned construct of the spatial politics of governing Considering both ongoing and unprecedented global problems from violence and urban warfare the refugee crisis borderization detention camps terrorist attacks to capitalist urbanization inequity social unrest and climate change this handbook provides a comprehensive and multidisciplinary research focused on the complex nexus of politics architecture and urban space Volume I starts by pointing out the need to explore the politics of spatialization to make sense of the operational nature of spatial oppression in contemporary times The operative and active political reading of space is disseminated through five thematics Violence and War Machines Security and Borders Race Identity and Ideology Spectacle and the Screen and Mapping Landscapes and Big Data This first volume of the handbook frames cutting edge contemporary debates and presents studies of actual theories and projects that address spatial politics This Handbook will be of interest to anyone seeking to meaningfully disrupt the reduction of space to an oppressive or neutral backdrop of political realities Chapters 1 and 23 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution CC BY 4.0 license

The Best of All Possible Islands Richard Maddox,2012-02-01 The 1992 world's fair in Seville serves as a vantage point from which to examine Spain's developing democracy and Europe's emerging unification according to Richard Maddox in *The Best of All Possible Islands* Visited by over fourteen million people the Seville Expo drew the participation of more than one hundred countries and dozens of corporations As part of Spain's miraculous year in which Barcelona hosted the summer Olympics and Madrid was designated the Cultural Capital of Europe the Expo advanced a remarkably optimistic cosmopolitan and liberal vision of the past present and future of the new Spain and the new Europe Yet no aspect of this vision went unchallenged and the Expo was at the center of fierce political rivalries and dramatic manifestations of popular discontent In an engaging and accessible narrative Richard Maddox demonstrates how visitors and local residents understood the significance of the event in ways that largely escaped the knowledge and control of the Expo's organizers Understanding how and why this occurred casts critical light on the transformation of Spain since the end of the Franco dictatorship in 1976 and illuminates some of the key cultural and political dilemmas that processes of European and global integration pose for citizens of democratic societies

The Body Impolitic Michael Herzfeld,2004 *The Body Impolitic* is a critical study of tradition not merely as an ornament of local and national heritage but also as a millstone around the necks of those who are condemned to produce it Michael Herzfeld takes us inside a rich variety of small town Cretan artisans

workshops to show how apprentices are systematically thwarted into learning by stealth and guile This harsh training reinforces a stereotype of artisans as rude and uncultured Moreover the same stereotypes that marginalize artisans locally also operate to marginalize Cretans within the Greek nation and Greece itself within the international community What Herzfeld identifies as the global hierarchy of value thus frames the nation's ancient monuments and traditional handicrafts as evidence of incurable backwardness Herzfeld's sensitive observations offer an intimately grounded way of understanding the effects of globalization and of one of its most visible offshoots the heritage industry on the lives of ordinary people in many parts of the world today

Armstrong, 2006 If psychoanalysis is the return of repressed antiquity distorted to be sure by modern desire yet still bearing the telltale traces of the ancient archive then would not our growing distance from the archive of antiquity also imply that we are in the process of losing our grip on psychoanalysis itself as Freud conceived it from Chapter 1 As he developed his striking new science of the mind Sigmund Freud had frequent recourse to ancient culture and the historical disciplines that draw on it *A Compulsion for Antiquity* fully explores how Freud appropriated figures and themes from classical mythology and how the theory and practice of psychoanalysis paralleled contemporary developments in historiography archaeology philology and the history of religions Drawing extensively from Freud s private correspondence and other notes and documents Richard H Armstrong touches on Freud s indebtedness to Sophocles and the Oedipus complex his interest in Moses and the Jewish religion and his travels to Athens and Rome Armstrong shows how Freud turned to the ancient world to deal with the challenges posed by his own scientific ambitions and how these lessons influenced the way he handled psychic evidence and formulated the universal application of what were initially isolated clinical truths Freud s narrative reconstructions of the past also related to his sense of Jewishness linking the historical trajectory of psychoanalysis with contemporary central European Jewish culture Ranging across the breadth of Freud s work *A Compulsion for Antiquity* offers fresh insights into the roots of psychoanalysis and fin de si cle European culture and makes an important contribution to the burgeoning discipline of mnemohistory
