The Psychology of Media and Politics George Comstock, Erica Scharrer, 2005-05-31 Research indicates that people discount their own opinions and experiences in favor of those of experts as espoused in the media The framing of news coverage thus has a profound impact on public opinion and political decision making as a response to public outcry However the choice of how to frame the news is typically made to solicit viewership and high ratings rather than to convey accurate and meaningful information The Psychology of Media and Politics discusses why people discount their own opinions how the media shapes the news when this drives political decision making and what the effect is on the future of society Issues addressed include How powerful are the media in shaping political beliefs judgment How has this power changed in recent years How does media influence voting behavior To what extent do media opinions affect political decision making Demonstrates the ways in which the media both constrain and facilitate democratic participation Provides insight into why individuals have varying levels of attention to and interest in politics Discusses such issues as political advertising polls debates and journalists pursuit of scandal Describes why only some Americans turn out to vote in prominent elections Offers a model of personal versus social level influences that extends beyond politics into other important topic areas Brings together research and theories from the fields of Communication Psychology and Political Science Reviews hundreds of key sources both historical and contemporary

Eli M. Noam, 2016 Who Owns the World's Media moves beyond the rhetoric of free media and free markets to provide a dispassionate and data driven analysis of global media ownership trends and their drivers Based on an extensive data collection effort from scholars around the world the book covers 13 media industries including television newspapers book publishing film search engines ISPs wireless telecommunication and others across a 10-25 year period in 30 countries *A Social History of Contemporary Democratic Media* Jesse Drew, 2013-05-02 The last few decades have helped dispel the myth that media should remain driven by high end professionals and market share This book puts forward the concept of communications from below in contrast to the globalization from above that characterizes many new developments in international organization and media practices By examining the social and technological roots that influence current media evolution Drew allows readers to understand not only the Youtubes and Facebooks of today but to anticipate the trajectory of the technologies to come Beginning with a look at the inherent weaknesses of the U.S. broadcasting model of mass media Drew outlines the early 1960s and 1970s experiments in grassroots media where artists and activists began to re-engineer electronic technologies to target local communities and underserved audiences From these local projects emerged national and international communications projects creating production models social networks and citizen expectations that would challenge traditional means of electronic media and cultural production Drew's perspective puts the social and cultural use of the user at the center not the particular media form Thus the structure of the book focuses on the local the national and the global desire for communications regardless of the means Introduction to

attitude before it is a machine or a set of codes It is an idea about the prosthetic enhancement of our capacity to communicate The writers who first woke up to this fact were not postwar postmodern or post anything else some of the best of them lived and wrote in the British Isles in the period between the World Wars

Media Ownership and Concentration in America Eli Noam, 2009-10-19 People have worried for many years about the concentration of private power over the media as evidenced by controversy over Federal Communication Commission rulings on broadcast ownership limits The fear it seems is of a media mogul with a political agenda a new William Randolph Hearst who could help start wars or run for political office using the power of the media In the light of these concerns about freedom of speech Eli Noam provides a comprehensive survey of media concentration in America covering everything from the early media empire of Benjamin Franklin to the modern day cellular phone industry
